RE: HIGHWAY 1 SAN PEDRO CREEK BRIDGE REPLACEMENT, PACIFICA, CalTrans CONTRACT 04-265604

SUBJECT: PROPOSAL FOR PHOTO DOCUMENTATION, AND VIBRATION MONITORING DURING CONSTRUCTION

Please find herein our proposal for photo surveys and vibration monitoring in connection with the **Construction on state highway in San Mateo County from 0.3 mile south of Linda Mar Boulevard to Linda Mar Boulevard Intersection (CalTrans Contract # 04-265604).** With extensive experience in various forms of geotechnical instrumentation and vibration monitoring, we are uniquely qualified to handle this assignment. With eighty (80) seismographs, thirty (30) high end sound level meters, multiple in-situ inclinometer sensors, multiple vibrating wire joint meters and dataloggers in service, we do more of this work than any firm west of the Mississippi. In addition:

*** We are Reliable ***

Over 22 years experience and a strong record of repeat clients/business.

*** We are Experienced ***

We have conducted more pre-construction photo surveys and performed more vibration monitoring than anyone on the West Coast.

*** We are Safety Conscious ***

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given orientation and training for work adjacent to active railroad lines, on freeways, and inside of tunnels. **Our personnel are e-railsafe certified.**

* * We are experienced in Community Relations * *

We have conducted extensive large scale pre-construction photo survey projects and have successfully coordinated with public agencies and local Police/Sheriff organizations.

PRECONSTRUCTION PHOTO SURVEYS

Municon specializes in pre-construction photo surveys with large numbers of buildings (as many as 350) and the document control of data. Municon has completed preconstruction surveys for blasting projects throughout California and Nevada, for highway and road improvement projects in San Francisco, Oakland, Fremont, San Jose, and elsewhere throughout the Bay Area. We have performed photo surveys for the seismic retrofit of the historic San Francisco City Hall, the Richmond Transport Tunnel, the New Irvington Tunnel, and multiple projects at the San Francisco International Airport.

SOUND MONITORING

We have monitored construction generated noise with sound level meters during multiple contracts on the San Francisco Oakland Bay Bridge East Span replacement, for the Oakland Airport Connector project. We have recorded air overpressure on numerous blasts in Reno and the Sierra foothills. We have been remotely monitoring sound at the Doyle Drive project in San Francisco for the past 3 years, are concluding two years of remote sound monitoring at the New Irvington Tunnel Jobsites, are currently monitoring at the I-10/I-605 flyover in Baldwin Park, and have started sound monitoring at the Cathedral Hill Hospital project in San Francisco.

PROJECT DESRIPTION

We reviewed the project plans and specifications, and Addenda 1 through 4, available on the CalTrans website, to determine the extent of photo/video documentation, noise monitoring, vibration monitoring and geotechnical instrumentation required for the Project.

Our review finds a requirement for a pre-construction and post-construction photo/video survey of two (2) adjacent properties, along with crack monitoring at those properties. Vibration monitoring is required at one of the two properties. Settlement monitoring using riser pipes is required; we do not perform this work. Sound or noise monitoring is not required.

Our proposal for pre construction photo/video surveys, crack monitoring and vibration monitoring at the San Pedro Creek Bridge Replacement project follows. Please call me at 415-641-2570 with any questions or email me at anthony@municon.net. Thank you for your consideration – we look forward to working with you on this and other projects!

2.00 VIBRATION MONITORING

Special Provisions section 14-8.03A(1) requires "*...vibration monitoring to protect the following properties and underground facilities from excess vibration from construction activities.*

1223-1353 Linda Mar Shopping Center

5400-5550 Pacific Coast Highway

PG&E Gas Line (South of the Bridge)

The maximum particle velocity for adjacent properties and underground utilities must not exceed 0.2 inch/second.

Special Provisions section 14-8.03A(3) requires the Contractor to: *"Submit vibration measurement and recording report no later than 24 hours after each monitoring. Include information such as measurement location, date, and source of vibration. Include measured vibration levels at three axes and associated frequencies. Include the highest measured vibration levels for each axis and their relationship to the criteria."*

Special Provisions section 14-8.03A(4) requires *"The person responsible for the vibration monitoring and analysis must have the following qualifications:*

1. Professional Engineer, Geologist, Bachelor of Science or higher degree from a qualified program in engineering, geology or physics offered by an accredited university or college, and five years experience in vibration monitoring and control.

2. Demonstrated substantial and responsible experience in preparing and implementing construction vibration monitoring plans and analyzing vibration impacts in an urban setting.

A technician under the supervision of the qualified person may conduct the actual measurements..

Special Provisions section 14-8.03C requires the Contractor *"Conduct vibration measurements and recordings before and during the course of all pile-driving, hauling of dirt, placing of base material, compaction, and during paving operations or other significant activity when that activity occurs within 200 feet of the above listed facilities. Conduct baseline vibration monitoring at each work site before the start of construction activities or when there is a break in the construction activities.*

Furnish and install properly functioning vibration monitoring instruments before any construction within 200 feet of the above listed properties or underground facilities. Place vibration monitoring instruments on the side of the properties/underground facilities facing the

work site. Place vibration monitoring instruments in a manner such that no part of the above listed facilities is more than 20 feet from the monitoring instruments for work that is within 200 feet of the above listed facilities.

Set up vibration monitoring instruments to give immediate warning when peak particle velocity equal to or exceeding 75 percent of the maximum velocity of vibration specified above is measured.

Based on our review of the plans, we anticipate that vibration monitoring will be required at two separate times during piledriving, for up to two weeks each time. The buildings in the Pedro Point Shopping Center are more than 200 feet from any piledriving, and therefore, will not require vibration monitoring.

The special provisions require monitoring "***during the course of all pile-driving, hauling of dirt, placing of base material, compaction, and during paving operations or other significant activity***". However, it has been our experience that hauling of dirt, compaction, and paving operations do not generate vibrations likely to cause damage or complaints when more than 25 to 50 feet away from existing buildings, and that CalTrans does not usually require monitoring for such work at the distances in this project. Therefore, we have **not** included an allowance for vibration monitoring during any hauling of dirt, placing of base material, compaction, or during paving operations. If monitoring is required during grading and paving operations, we will perform the monitoring at the rates given below; however, **given the possible durations of grading and paving work, our costs will be substantially higher than shown below**.

2.01 General

Municon Consultants has personnel who meet the requirements for the "person responsible for the vibration monitoring and analysis" as specified.

Based on our review of the plans, we anticipate that piledriving work will require monitoring at two locations along the Linda Mar Shopping Center building, and one location for the PG&E gas line.

2.02 Vibration Monitoring Work Plan

If required, we will prepare a work plan including the name and qualifications of the instrumentation specialist and other personnel, manufacturer's product specifications and operators' manual, methods of installation and monitoring, monitoring schedule, and other data as required by the Special Provisions, for a **LUMP SUM** of .....**$1,500**.

2.20 Installation and Set Up of Monitoring Stations.

We will configure our seismographs to record vibrations per the Speical Provisions, and to have flasher alarms or SMS (text-message) alarms when specified vibration levels are exceeded. We will set up our seismographs in our Christy utility vaults with lockable covers. We will bolt or otherwise secure the vaults to concrete surfaces where available, or secure the seismographs and Christy utility vaults to posts, fences or poles. We may require you to provide traffic control where vibration monitoring locations are within the travelled way of any streets or highways. Removal of the monitoring location after it is no longer needed is included. We include an allowance to set up three (3) monitoring locations at two (2) separate times, for $700/ea location x 6 deployments= .....**$4,200.**

2.30 Seismograph Use charges.

We anticipate providing for our use up to three (3) of our industry standard construction monitoring seismographs to monitor vibrations at any one time. We will charge a seismograph equipment use charge of $700 per month or fraction thereof for each seismograph for an average three (3) seismographs x estimated two (2) months (or fractions thereof) for a total use charge of = ...**$4,200.**

2.30 Maintenance Services During Construction.

Where vibration monitoring locations will remain in place for more than two weeks, we will have our experienced technicians visit the site to service the seismographs and change batteries monthly during the construction work. We will charge an allowance of $600/month (for all seismographs) if monitoring lasts more than two weeks in any calendar month. However, we anticipate not needing to charge for this work = ...**$0.**

2.40 Professional Services for Vibration Monitoring

We will have our experienced technicians download data from the seismographs regularly and produce a report documenting the results of the vibration monitoring **every day.** We will generate the reports and provide them to you via email. The reports will include the monitoring equipment used, a deployment sketch showing the location of the seismograph and the nearby structures and the data results of our vibration monitoring.
We will prepare reports for $300/day x 20 days = ...**$6,000.**

TOTAL VIBRATION MONITORING ALLOWANCE.....$15,900.

3.00 SETTLEMENT MONITORING

Special Provisions section 19-6.03F(3) requires the Contractor to ***"Install settlement monitoring pipe riser devices at the following seven (7) locations:***

> ***1. Four settlement monitoring pipe riser devices on the approach embankment behind Abutment 1***
>
> ***2. Three settlement monitoring pipe riser devices on the approach embankment behind Abutment 3***

Maintain all settlement monitoring devices functional for the entire duration of the settlement monitoring program. Repair or replace malfunctioning or damaged device. At the completion of the settlement monitoring program, remove the upper portion of the control pipe and protective sleeve of the pipe riser settlement device to a depth of at least 2 feet below finish grade.

Settlement monitoring data collection must be performed by a land surveyor registered in the State of California.

Municon Consultants does not install nor monitor pipe-riser or survey-monument type settlement monitors, and we are not licensed land surveyors; this work should be performed by the General Contractor and the construction surveyor.

RE: HIGHWAY 1 SAN PEDRO CREEK BRIDGE REPLACEMENT, PACIFICA, CalTrans CONTRACT 04-265604

SUBJECT: PROPOSAL FOR PHOTO DOCUMENTATION, AND VIBRATION MONITORING DURING CONSTRUCTION

Please find herein our proposal for photo surveys and vibration monitoring in connection with the **Construction on state highway in San Mateo County from 0.3 mile south of Linda Mar Boulevard to Linda Mar Boulevard Intersection (CalTrans Contract # 04-265604).** With extensive experience in various forms of geotechnical instrumentation and vibration monitoring, we are uniquely qualified to handle this assignment. With eighty (80) seismographs, thirty (30) high end sound level meters, multiple in-situ inclinometer sensors, multiple vibrating wire joint meters and dataloggers in service, we do more of this work than any firm west of the Mississippi. In addition:

** *We are Reliable* **

Over 22 years experience and a strong record of repeat clients/business.

** *We are Experienced* **

We have conducted more pre-construction photo surveys and performed more vibration monitoring than anyone on the West Coast.

** *We are Safety Conscious* **

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given orientation and training for work adjacent to active railroad lines, on freeways, and inside of tunnels. **Our personnel are e-railsafe certified.**

* * *We are experienced in Community Relations* * *

We have conducted extensive large scale pre-construction photo survey projects and have successfully coordinated with public agencies and local Police/Sheriff organizations.

Vibration Monitoring, Construction Instrumentation, Photo Surveys

PRECONSTRUCTION PHOTO SURVEYS

Municon specializes in pre-construction photo surveys with large numbers of buildings (as many as 350) and the document control of data. Municon has completed preconstruction surveys for blasting projects throughout California and Nevada, for highway and road improvement projects in San Francisco, Oakland, Fremont, San Jose, and elsewhere throughout the Bay Area. We have performed photo surveys for the seismic retrofit of the historic San Francisco City Hall, the Richmond Transport Tunnel, the New Irvington Tunnel, and multiple projects at the San Francisco International Airport.

SOUND MONITORING

We have monitored construction generated noise with sound level meters during multiple contracts on the San Francisco Oakland Bay Bridge East Span replacement, for the Oakland Airport Connector project. We have recorded air overpressure on numerous blasts in Reno and the Sierra foothills. We have been remotely monitoring sound at the Doyle Drive project in San Francisco for the past 3 years, are concluding two years of remote sound monitoring at the New Irvington Tunnel Jobsites, are currently monitoring at the I-10/I-605 flyover in Baldwin Park, and have started sound monitoring at the Cathedral Hill Hospital project in San Francisco.

PROJECT DESRIPTION

We reviewed the project plans and specifications, and Addenda 1 through 4, available on the CalTrans website, to determine the extent of photo/video documentation, noise monitoring, vibration monitoring and geotechnical instrumentation required for the Project.

Our review finds a requirement for a pre-construction and post-construction photo/video survey of two (2) adjacent properties, along with crack monitoring at those properties. Vibration monitoring is required at one of the two properties. Settlement monitoring using riser pipes is required; we do not perform this work. Sound or noise monitoring is not required.

Our proposal for pre construction photo/video surveys, crack monitoring and vibration monitoring at the San Pedro Creek Bridge Replacement project follows. Please call me at 415-641-2570 with any questions or email me at anthony@municon.net. Thank you for your consideration – we look forward to working with you on this and other projects!

2.00 VIBRATION MONITORING

Special Provisions section 14-8.03A(1) requires "*...vibration monitoring to protect the following properties and underground facilities from excess vibration from construction activities.*

1223-1353 Linda Mar Shopping Center

5400-5550 Pacific Coast Highway

PG&E Gas Line (South of the Bridge)

The maximum particle velocity for adjacent properties and underground utilities must not exceed 0.2 inch/second.

Special Provisions section 14-8.03A(3) requires the Contractor to: *"Submit vibration measurement and recording report no later than 24 hours after each monitoring. Include information such as measurement location, date, and source of vibration. Include measured vibration levels at three axes and associated frequencies. Include the highest measured vibration levels for each axis and their relationship to the criteria."*

Special Provisions section 14-8.03A(4) requires *"The person responsible for the vibration monitoring and analysis must have the following qualifications:*

1. Professional Engineer, Geologist, Bachelor of Science or higher degree from a qualified program in engineering, geology or physics offered by an accredited university or college, and five years experience in vibration monitoring and control.

2. Demonstrated substantial and responsible experience in preparing and implementing construction vibration monitoring plans and analyzing vibration impacts in an urban setting.

A technician under the supervision of the qualified person may conduct the actual measurements..

Special Provisions section 14-8.03C requires the Contractor *"Conduct vibration measurements and recordings before and during the course of all pile-driving, hauling of dirt, placing of base material, compaction, and during paving operations or other significant activity when that activity occurs within 200 feet of the above listed facilities. Conduct baseline vibration monitoring at each work site before the start of construction activities or when there is a break in the construction activities.*

Furnish and install properly functioning vibration monitoring instruments before any construction within 200 feet of the above listed properties or underground facilities. Place vibration monitoring instruments on the side of the properties/underground facilities facing the

work site. Place vibration monitoring instruments in a manner such that no part of the above listed facilities is more than 20 feet from the monitoring instruments for work that is within 200 feet of the above listed facilities.

Set up vibration monitoring instruments to give immediate warning when peak particle velocity equal to or exceeding 75 percent of the maximum velocity of vibration specified above is measured.

Based on our review of the plans, we anticipate that vibration monitoring will be required at two separate times during piledriving, for up to two weeks each time. The buildings in the Pedro Point Shopping Center are more than 200 feet from any piledriving, and therefore, will not require vibration monitoring.

The special provisions require monitoring "***during the course of all pile-driving, hauling of dirt, placing of base material, compaction, and during paving operations or other significant activity***". However, it has been our experience that hauling of dirt, compaction, and paving operations do not generate vibrations likely to cause damage or complaints when more than 25 to 50 feet away from existing buildings, and that CalTrans does not usually require monitoring for such work at the distances in this project. Therefore, we have **not** included an allowance for vibration monitoring during any hauling of dirt, placing of base material, compaction, or during paving operations. If monitoring is required during grading and paving operations, we will perform the monitoring at the rates given below; however, **given the possible durations of grading and paving work, our costs will be substantially higher than shown below**.

2.01 General

Municon Consultants has personnel who meet the requirements for the "person responsible for the vibration monitoring and analysis" as specified.

Based on our review of the plans, we anticipate that piledriving work will require monitoring at two locations along the Linda Mar Shopping Center building, and one location for the PG&E gas line.

2.02 Vibration Monitoring Work Plan

If required, we will prepare a work plan including the name and qualifications of the instrumentation specialist and other personnel, manufacturer's product specifications and operators' manual, methods of installation and monitoring, monitoring schedule, and other data as required by the Special Provisions, for a **LUMP SUM** of .....**$1,500**.

2.20 Installation and Set Up of Monitoring Stations.

We will configure our seismographs to record vibrations per the Speical Provisions, and to have flasher alarms or SMS (text-message) alarms when specified vibration levels are exceeded. We will set up our seismographs in our Christy utility vaults with lockable covers. We will bolt or otherwise secure the vaults to concrete surfaces where available, or secure the seismographs and Christy utility vaults to posts, fences or poles. We may require you to provide traffic control where vibration monitoring locations are within the travelled way of any streets or highways. Removal of the monitoring location after it is no longer needed is included. We include an allowance to set up three (3) monitoring locations at two (2) separate times, for $700/ea location x 6 deployments= .....**$4,200.**

2.30 Seismograph Use charges.

We anticipate providing for our use up to three (3) of our industry standard construction monitoring seismographs to monitor vibrations at any one time. We will charge a seismograph equipment use charge of $700 per month or fraction thereof for each seismograph for an average three (3) seismographs x estimated two (2) months (or fractions thereof) for a total use charge of = ...**$4,200.**

2.30 Maintenance Services During Construction.

Where vibration monitoring locations will remain in place for more than two weeks, we will have our experienced technicians visit the site to service the seismographs and change batteries monthly during the construction work. We will charge an allowance of $600/month (for all seismographs) if monitoring lasts more than two weeks in any calendar month. However, we anticipate not needing to charge for this work = ...**$0.**

2.40 Professional Services for Vibration Monitoring

We will have our experienced technicians download data from the seismographs regularly and produce a report documenting the results of the vibration monitoring **every day**. We will generate the reports and provide them to you via email. The reports will include the monitoring equipment used, a deployment sketch showing the location of the seismograph and the nearby structures and the data results of our vibration monitoring.
We will prepare reports for $300/day x 20 days = ...**$6,000.**

TOTAL VIBRATION MONITORING ALLOWANCE.....$15,900.

3.00 SETTLEMENT MONITORING.

Special Provisions section 19-6.03F(3) requires the Contractor to ***"Install settlement monitoring pipe riser devices at the following seven (7) locations:***

> ***1. Four settlement monitoring pipe riser devices on the approach embankment behind Abutment 1***
>
> ***2. Three settlement monitoring pipe riser devices on the approach embankment behind Abutment 3***

Maintain all settlement monitoring devices functional for the entire duration of the settlement monitoring program. Repair or replace malfunctioning or damaged device. At the completion of the settlement monitoring program, remove the upper portion of the control pipe and protective sleeve of the pipe riser settlement device to a depth of at least 2 feet below finish grade.

Settlement monitoring data collection must be performed by a land surveyor registered in the State of California.

Municon Consultants does not install nor monitor pipe-riser or survey-monument type settlement monitors, and we are not licensed land surveyors; this work should be performed by the General Contractor and the construction surveyor.

13. Supply and operation of any light plants for shift work;
14. Any and all water treatment;
15. Protection/restoration of all surfaces, hardscapes, etc. including grading and patching;
16. Survey from which we can precisely establish or layout and determine ground elevations;
17. Permits, fees, taxes and bond costs;

3.0 PRICE

Our lump sum price to perform the scope above is $315,000 to include mobilization, labor, equipment and material. Unit rates are as follows:

Item	Description	Quantity	Unit	Unit Price	Extended Price
1	Wick Drain/Strip Drain Install	1	LS	$ 315,000	$ 315,000

Plus Applicable Taxes **TOTAL $ 315,000**

Pricing assumes work can be completed continuously in a single mobilization to site with fully assembled tracked access across San Pedro Creek Bridge, with no delays. Additional costs will apply if equipment breakdown is required to access adjacent work pads.

Costs resulting from delays which are not caused by and not under the control of the actions of HB are to be compensated at the rate of $300 per hour. This includes delays due to traffic control, site access and dealing with obstructions.

4.0 VALIDITY

Price will remain open for acceptance for 60 days from the date of this proposal. Prices quoted are based upon the assumption that the works will commence within 90 days from the date of this proposal. If authorization to proceed is delayed beyond this time period, HB shall be allowed to increase the quoted prices in proportion to the actual increases in labor and materials costs incurred.

5.0 SCHEDULE

We anticipate that our scope of work can be completed in approximately 5 weeks. This schedule assumes work is performed on a single shift basis, 10 hours per day, and 5 days per week with the following conditions:

1. At HB's discretion and subject to approval, additional hours or longer weekend work hours may be performed, without incurring any additional cost for site supervision or inspection;
2. This schedule is exclusive of delays due to the weather, operations by others, or other cause beyond the control of HB;
3. HB shall have continuous, uninterrupted, and systematic access to the worksite for the duration of the project;
4. Subject to availability, HB can provide additional equipment to meet the owner or general contractor's requirements, and reserves the right to renegotiate the mobilization price based on the situation.

6.0 PAYMENT:

1. HB will be paid in full within 30 days of substantial completion of the HB Scope of work. We will not wait for the General Contractor to complete the contract for holdback or retention.
2. Should the final quantity change by 10% or more HB reserves the right to an equitable adjustment in the unit rate.

We appreciate this opportunity to submit this Bid, and we look forward to working with you. If you require any additional information, or clarification of any aspect of this Bid, please do not hesitate to contact me at 805-395-0142.

Respectfully submitted,

HB General Conditions-Wick Drain Installation

GENERAL CONDITIONS - WICK DRAIN INSTALLATION

1. SUBMITTALS AND MATERIALS SHIPMENT
Material samples and other submittals, as required, will be forwarded for approval within ten (10) working days after receipt of an executed contract. Shipment of materials can begin within four (4) weeks after receipt, by HB, of written approval of submittals.

2. SURFACE PREPARATION AND ACCEPTANCE
The General Contractor or Owner shall be responsible for preparing the work site to the required standard, suitable for installation of the Wick Drains. Included in such site preparation is the removal of any asphalt roadway base course material or other debris; identification, and relocation if necessary, of all underground and overhead utility works that may be in conflict with the wick drain installation operation; and ensuring that there is a smooth, relatively level working surface capable of supporting a 185,000 lb. hydraulic excavator and installation mast (16 psi track pressure).

ACCEPTANCE BY HB OF THE SITE PREPARATION AND COMMENCEMENT OF WORK SHALL NOT RENDER HB LIABLE OR RESPONSIBLE FOR ANY LOSSES OR DAMAGE TO THE CONSTRUCTED PROJECT OR EXISTING WORKS RESULTING FROM SUBSEQUENT CHANGE OR DETERIORATION OF THE CONDITION OF THE PREPARED SITE.

3. PROJECT SUPERVISION
All phases of the installation will be under the supervision of a qualified HB Site Manager, and conduct of the work will be solely under his control and at his discretion, subject to the terms of the Contract.

4. PROJECT SCHEDULE
Completion of the project is anticipated within the time period set out in the body of the Proposal. If HB is delayed in the performance of their work, by an act or omission of the Owner, Consultant, other Contractors, or other causes beyond the control of HB, the completion date of the Contract shall be extended accordingly, and HB shall be compensated for all reasonable costs incurred due to such delays.

HB SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL OR CONSEQUENTIAL LOSSES OR DAMAGES SUFFERED BY THE OWNER OR GENERAL CONTRACTOR, HOWEVER CAUSED AND HOWSOEVER RESULTING WHETHER FROM DELAYS IN COMPLETION OF THE WORK OR OTHERWISE.

5. MOBILIZATIONS
The Proposal Price provides for one (1) mobilization and demobilization to and from the site for one Wick Drain Installation unit. If the overall construction program requires more than one mobilization, HB will, upon receiving reasonable written notice, accommodate the needs and desires of the Owner or General Contractor, to the best of HB's ability, subject to other HB commitments for installation personnel and/or equipment. HB shall be paid additional compensation to cover expenses incurred as a result of such remobilizations.

6. PAYMENT TERMS
The Proposal Price presented above is based on the finished lengths of wick drain (including cut-off tab) and appurtenant works installed, as set out in the Proposal on a Unit Price Basis. Upon completion of the works, and at interim periods as necessary for progress evaluation, a measurement will be conducted by HB and the Owner's representative, to determine quantities for interim payments and major changes in the scope of the work. Any dimensional variations from those shown in the Bid Documents will result in proportional changes in the Contract Price. Compensation for such changes will be resolved between HB and the Owner's representative, prior to completion of the works.

Payment for works covered under this Proposal, shall be made in accordance with the Contract Documents with the following exception: Invoices for work completed, will be submitted by HB on a monthly basis, and shall be payable net thirty (30) days. All invoices not paid in accordance with the above will be subject to interest at the rate of eighteen percent (18%) per annum.

7. LIABILITY AND INDEMNITY
HB will be liable for and agrees to indemnify the Owner with respect to claims in contract, tort or otherwise for losses, liabilities, judgments, penalties or expenses, resulting from bodily injury, death or property damage, whether suffered or incurred by the Owner or any third party, arising from the performance of the Work by HB, its agents, employees or Subcontractors, except where the injury, death, loss or property damage is caused by the negligence of the Owner.

In no event shall HB be liable in contract, tort or otherwise for consequential, indirect or special loss or damage, including without limiting the generality of the foregoing, economic loss, loss of profits or losses arising from business interruption, whether suffered or incurred by the Owner, or any third party.

The Owner shall and does hereby indemnify and save harmless HB, its officers, servants, agents, subcontractors and assigns from and against any and all claims made by third parties, arising from:

a. All claims in contract, tort or otherwise for losses, liabilities, judgments, penalties or expenses resulting from bodily injury, death or property damage whether suffered or incurred by HB or any third party arising from the negligence of the Owner.
b. Any act or omission of HB in the performance of the Work in respect of all consequential, indirect or special loss or damage, including without limiting the generality of the foregoing, economic loss, loss of profits and losses arising from business interruption.

8. QUANTITY
Should the estimated project quantity change by more than 10%, HB reserves the right to an equitable Adjustment.

9. ATTORNEY'S FEES
In the event of legal action the prevailing party will be entitled to attorney's fees.
