Regarding: **Caltrans Project 04-4S0304, Hwy 128 Napa County**
Subject: **Sheet Pile Shoring Proposal, Used Sheet Pile**

Regarding the above referenced project, Hughes Construction offers the following proposal for permanent sheet piling. This proposal is based only on the quantities provided by you. Our scope of work is to design sheet pile shoring to support a roadside excavation up to 200-lf x 7' high; mobilize our excavator mounted vibratory hammer and support equipment to the site (once); and furnish and install 200-lf of used PZC-18 sheet pile. Our lump sum price for this scope of work is $129,000.

Our proposal is subject to the following terms and conditions:

1) The shoring design will be by a California licensed Civil Engineer. Any changes required by others to our design and/or construction methods may result in added costs.
2) The shoring design will be cantilevered sheet piling, which will deflect. If required in order to minimize ground movement, additional bracing can be designed and installed as an extra.
3) The shoring is intended to provide temporary structural support as required to provide worker and public safety during the planned excavation and construction work. The shoring will minimize (but not necessarily eliminate) ground movement. Any and all costs resulting from such movement are to be borne by others.
4) The shoring will minimize (but not necessarily eliminate) groundwater from entering the sides of the excavation. Any an all required dewatering is to be provided by others.
5) Our work access is to be provided by others, as we require for mobilization and installation of the sheet piling. Access is a firm, level road 12-feet wide minimum, adjacent to the piles, adequate for our track and rubber tire equipment, without overhead restrictions. Protection of adjacent facilities is to be by others, as required.
6) Our equipment may cause damage to existing asphalt roads during mobilization and pile driving. We will make efforts to minimize such damage; however, we cannot be responsible for damage to existing roadways.
7) Any survey/layout work, including all required horizontal and vertical locations of the top of the sheet piles before and after installation (as required) is to be provided by others. As-builts drawings are not included.
8) Vibratory pile driving using our own methods must be allowed.

9) Noise and/or vibration restrictions have not been considered in this proposal. Our work will create intermittent loud noise and vibrations.
10) All utilities in the vicinity of the work are to be located by others. Hughes Construction will not be responsible for damaging any utility not known to exist at the time of our work. Asphalt removal and pre-trenching (pot-holing) is to be performed by others.
11) Our workers will be provided with standard PPE (gloves, hard hats, safety vests and boots). Any other costs associated with working in or around hazardous conditions are to be paid for by others.
12) We have based our proposal on continuous production. Downtime or delays beyond our control will be billed as Extra Work using Caltrans standard rates & procedures.
13) Any required traffic control (or other public protection) is to be provided by others.
14) Hand railing, ladders and landings are to be provided by others, as required.
15) Hughes Construction must be satisfied with work access and schedule prior to mob.
16) We have assumed that permission to perform the work as described above will be obtained by others. We are not aware of any environmental conditions or permit restrictions applying to this work. We have not included any costs for permits except for our own trucking.
17) Hughes Construction must be paid within 30 days of our invoice.

Attention: **Dan Palmer**
Regarding: **Caltrans Project 04-2A6204, Hwy 12 near Rio Vista**
Subject: **Provide and Install Sheet Pile Shoring Proposal**

Regarding the above referenced project, B&B Hughes Construction offers the following proposal for the installation of permanent sheet piling. This proposal is based only on the quantities provided by you. Our scope of work is to provide and install sheet pile shoring. We will mobilize our TM-22 ABI and support equipment to the site (once), furnish, and install 108 pair of new 25' long PZC-26 sheet pile. Our lump sum price for this scope of work is **$453,930**.

Our proposal is subject to the following terms and conditions:

1) Our work access is to be provided by others, as we require for mobilization and installation of the sheet piling. Access is a firm, level road 20-feet wide minimum, within 7' of the piles, adequate for our track and rubber tire equipment, without overhead restrictions. Protection of adjacent facilities is to be by others, as required.
2) Our equipment may cause damage to existing asphalt roads during mobilization and pile driving. We will make efforts to minimize such damage; however, we cannot be responsible for damage to existing roadways.
3) Any survey/layout work, including all required horizontal and vertical locations of the top of the sheet piles before and after installation (as required) is to be provided by others. As-builts drawings are not included.
4) Vibratory and/or diesel impact pile driving using our own methods must be allowed.
5) Noise and/or vibration restrictions have not been considered in this proposal. Our work will create intermittent loud noise and vibrations.
6) All utilities in the vicinity of the work are to be located by others. B&B Hughes Construction will not be responsible for damaging any utility not known to exist at the time of our work. Asphalt removal and pre-trenching (pot-holing) is to be performed by others.
7) Our workers will be provided with standard PPE (gloves, hard hats, safety vests and boots). Any other costs associated with working in or around hazardous conditions are to be paid for by others.
8) We have based our proposal on continuous production. Downtime or delays beyond our control will be billed as Extra Work using Caltrans standard rates & procedures.

9) Any required traffic control (or other public protection) is to be provided by others.
10) Hand railing, ladders and landings are to be provided by others, as required.
11) Hughes Construction must be satisfied with work access and schedule prior to mob.
12) We have assumed that permission to perform the work as described above will be obtained by others. We are not aware of any environmental conditions or permit restrictions applying to this work. We have not included any costs for permits except for our own trucking.
13) Hughes Construction must be paid within 30 days of our invoice.
14) Our prices include our standard insurance coverage.
15) We have not included any bond. Any and all bonds are to be by others if required.
16) Hughes Construction's Terms and Conditions must be incorporated into any subcontract or work order generated from this proposal.
17) This proposal is good for 30 days. Please provide as much notice as possible to schedule us for this work.
