Agency	Bid No.	Project Title	Location
CalTrans District 12	12-0L7204	Construct 4-Foot Right Shoulder, Pave Turnouts, Replace/Add Mbgr	Orange County near San Juan Capistrano from 0.3 Mile East of Antonio Pkwy/La Pata Avenue to 0.2 Mile West of Conrock Plant Entrance and Casper Wilderness Park

Scope:

This bid is for the following tasks and/or services as identified in the solicitation:

Item No.	Item Code	Description

RE: ***For Your Review Caltrans District 12 -- Contract No. 12-0L7204 -- for construction on Route 74 in Orange County***

COMMENTS: You are listed as a plan holder for the above-referenced Caltrans contract. The bid specs identify a contractor-supplied biologist (item number 23 on the bid list [lump sum]). ECORP Consulting, Inc. is a fully qualified and well-respected Caltrans services provider serving multiple districts throughout California. Please find a brief statement of qualifications attached.

The quote below is for biological services. Some notes for this job:
We think it is likely that you will not need more than one biological monitor per day. We have also provided a half-day (up to five hours) rate so that if there is an equipment failure or work is stopped early for weather or any other reason, you will not be charged for the full day rate. Based on a review of the Special Provisions, ECORP anticipates that a biological monitor will be required on site for up to 251 working days (Table 1, Breakdown of Costs). We have also provided costs for preconstruction biological surveys, preparing and presenting a Biological Resources Information Program (BRIP), writing a final monitoring report for the project, and restoration surveying, monitoring and reporting. These tasks are outlined in the Special Provisions 14-6.02, 14-6.05, 14-6.06, and 14-6.11.

Task 1: Biological Resources Information Program (BRIP)
ECORP will develop and deliver a BRIP (training). The program will include a description of regulated species that may be affected by construction; requirements for the protection of regulated species; definitions and consequences of unauthorized "take"; what to do when you see a regulated species or a species that looks like a regulated species; permit requirements for touching or moving a regulated species; definition and identification of an ESA and/or SPA; and description, habitats, and ecology of regulated species. ECORP will prepare and provide handouts for all attendees of the training and will post the training handout on all construction field offices and information boards. Signatures of all attendees of the training will be collected and submitted to the Engineer within two (2) days following the training. ECORP will provide hard-hat stickers to each recipient of the training, which will identify which personnel have been trained to biological monitor on site. Client will provide copies of all applicable environmental permits (e.g., Biological Opinion, Streambed Alteration Agreement.) and mitigation measures. It is assumed that one initial training will occur prior to the start of work that will be timed with the preconstruction survey task. Any additional trainings will be

conducted as part of the biological monitoring task by the biological monitor while conducting normal monitoring duties.

Task 2: Preconstruction Survey and Report

ECORP will provide qualified biologists to conduct a preconstruction survey within 14 days of the start of the project. ECORP will electronically submit a Preconstruction Survey Letter Report summarizing the methods and results of the surveys to the Client for review and submittal to Caltrans no more than seven (7) days prior to the start of construction activities.

Task 3: Biological Monitoring and Reporting

ECORP will provide qualified biological monitors during construction/project implementation for the above-referenced project that meet the Caltrans PLAC requirements and the requirements of the regulatory agencies. The biological monitor will document compliance with applicable permits and maintenance of buffer/protection areas and monitor the protection of sensitive species and their habitats. Client and their subcontractors will be responsible for the safety or other required trainings of the biological monitor provided.

Monitoring is required during the installation and removal of fencing and when crews are removing any vegetation or are working within or adjacent to ESAs or SPAs. The biological monitor will look for sensitive biological resources 50 feet out from the road shoulder. This reconnaissance will extend from the start-point to the anticipated end-point of daily activity. The monitor will then survey around the anticipated staging area where work equipment will be stored for the evening. For the purposes of the estimate we assumed a total of 251 days would be required to support this work, subject to change based on the Client's schedule. ECORP will develop a daily monitoring reporting form that includes line items for incident reporting. The completed forms will be compiled and submitted to the client electronically on a weekly basis.

Should an incident occur, an incident report will be prepared and submitted to the client electronically within 24 hours for transmittal to Caltrans and the appropriate agency(s). The incident report will include a description of the take incident, species name and number taken, details of required notifications with contact information, corrective actions proposed or taken, and disposition of taken species.

Within 12 hours of the start of ground-disturbing activities, ECORP will provide the Client with an initial monitoring report for review and submittal to Caltrans. Weekly monitoring reports weekly will be prepared and submitted to the Client in a timely manner. Task 3 will be carried out on a daily rate basis:

*Task 3 Cost (FULL DAY) ..... $ 1,350.00/day**

*inclusive of travel and Other Direct costs. Assumes a maximum of 10 hours of onsite monitoring per day. Additional time will result in overtime charges in accordance with State and Federal laws. Hours in excess of 10 per day will be charged at $145/hr. Costs are per monitor provided.

If monitor is required for fewer than five hours in a given day, the client will be charged the "Half Day" rate of $800.00.

*Task 3 Cost (HALF DAY) ..... $ 750.00/half day***

**inclusive of travel and Other Direct costs. Assumes a maximum of 5 hours of onsite monitoring per day. Costs are per monitor provided.

Task 4: Final Monitoring Report

ECORP will submit a Final Monitoring Report to the Client within 20 days of the completion of the project. Included in this report will be construction beginning and end dates; identification of project impacts on any special-status species; species protection measures with protection measure implementation details; incidental take details including species name, number taken, people contacted, contact information, and disposition of taken species; an assessment of the effectiveness of the species protection measures to mitigate project impacts; recommendations to approve efficiency of protection measures to mitigate impacts to regulated species; copies of weekly monitoring reports; a summary of incidents that occurred during the project; copies of the handout used during the BRIP; and copies of sign in sheets collected during the trainings. ECORP will electronically submit a Final Monitoring Report to the Client for review and submittal to Caltrans.

Task 5: Restoration Survey, Monitoring, and Reporting

ECORP will provide a qualified biological monitor to monitor the installed vegetation, write reports for initial planting, prepare quarterly reports (4), as well as one annual report. ECORP will electronically submit the reports summarizing the methods and results of the monitoring and surveys to the Client for review and submittal to Caltrans.

Table 1 Breakdown of Costs

Task	Cost
Task 1: Biological Resources Information Program (BRIP)	$1,250
Task 2: Preconstruction Survey and Report	$3,620
Task 3: Biological Monitoring and Reporting (Full Rate for 251 days)*	$338,850
Task 4: Final Monitoring Report	$1,000
Task 5: Restoration Survey, Monitoring, and Reporting	$13,620
TOTAL ESTIMATE	**$358,340**

ADDITIONAL ASSUMPTIONS:

- Client will provide ECORP with electronic copies of all the environmental permits for the project; and
- ECORP will submit the qualifications of the contractor-supplied biologist electronically to Client for distribution to Caltrans and the regulatory agencies.

I have attached a flyer which provides an overview of all of our services for your review. Thank you for the opportunity, we wish you well. If you have any questions, please call me at (714) 648-0630 or e-mail dcarr@ecorpconsulting.com.
