Cross Agency Asset Management Forum

Transportation Asset Management Dashboard Showcase
Monday, July 17, 2023
1:00 to 2:30 p.m.

This session will showcase asset management related dashboards from around California and the United States. Agencies listed below will take us on a tour of their public-facing dashboards and a view into data visualization capabilities followed by a question and answer session.

The objective of this session is to provide dashboard design tips and best practices, an overview of platforms used, and the data visualization's intended target audience. If you are considering revamping a current dashboard or utilizing dashboards on your public-facing webpages this session will be a great opportunity to gain dashboard knowledge and information. Please join us!
