

# Transportation Management Systems (TMS)

## California Cross Agency Asset Management Forum (CAAMF)

September 18, 2023

CALTRANS | DIVISION OF TRAFFIC OPERATIONS

# September CAAMF Agenda

- Welcome – CAAMF Organizing Committee
- Recording the session
- CAAMF Topic Suggestions for voting at next meeting
- Presentation – Caltrans Assets Management
  - Karan Dhungana
  - Stan Slavin
- Audience Question and Answer Session
  - Jas Bhullar – Caltrans Maintenance
  - Grant Zammit – Federal Highway Administration
  - Dean Campbell – Caltrans ITS
  - Michael Robinson – Caltrans Electrical Engineering

# Agenda

- **Assets Classes and Types**
- **TMS Operation and Maintenance**
  - Lifecycle
  - Cost
  - Performance metrics
- **Data**
  - Validation and Visualization
- **Guidelines**
- **Innovative Ideas**

# Assets

Classes and Types Breakdown

# Asset: Classes

Caltrans assets are divided into four primary and eight supplementary classes

Reason for four primary assets classes:

1. They represent significant portion of California's annual transportation investments
2. Also, in part because of federal legislation which prioritizes safety, pavements, bridges, and those assets related to system performance.

# Asset: Primary Classes

- Pavements

- Bridges and Tunnels

- Drainage

- Transportation Management System (TMS)

# Asset: Supplementary Classes

---

- Weigh-In Motion Scales
- Drainage Pump Plants
- Safety Roadside Rest Areas
- Complete Streets
- Transportation Related Facilities
- Office Buildings
- Highway Lighting
- Overhead Sign Structures

# Asset: TMS

- There are over 20,000 TMS units on the SHS
- These are categorized into nine core TMS types
  1. Traffic signals
  2. Freeway ramp meters
  3. Changeable message signs
  4. Extinguishable message signs
  5. Closed circuit televisions
  6. Traffic monitoring detection stations
  7. Traffic census stations
  8. Roadway weather information systems
  9. Highway advisory radios

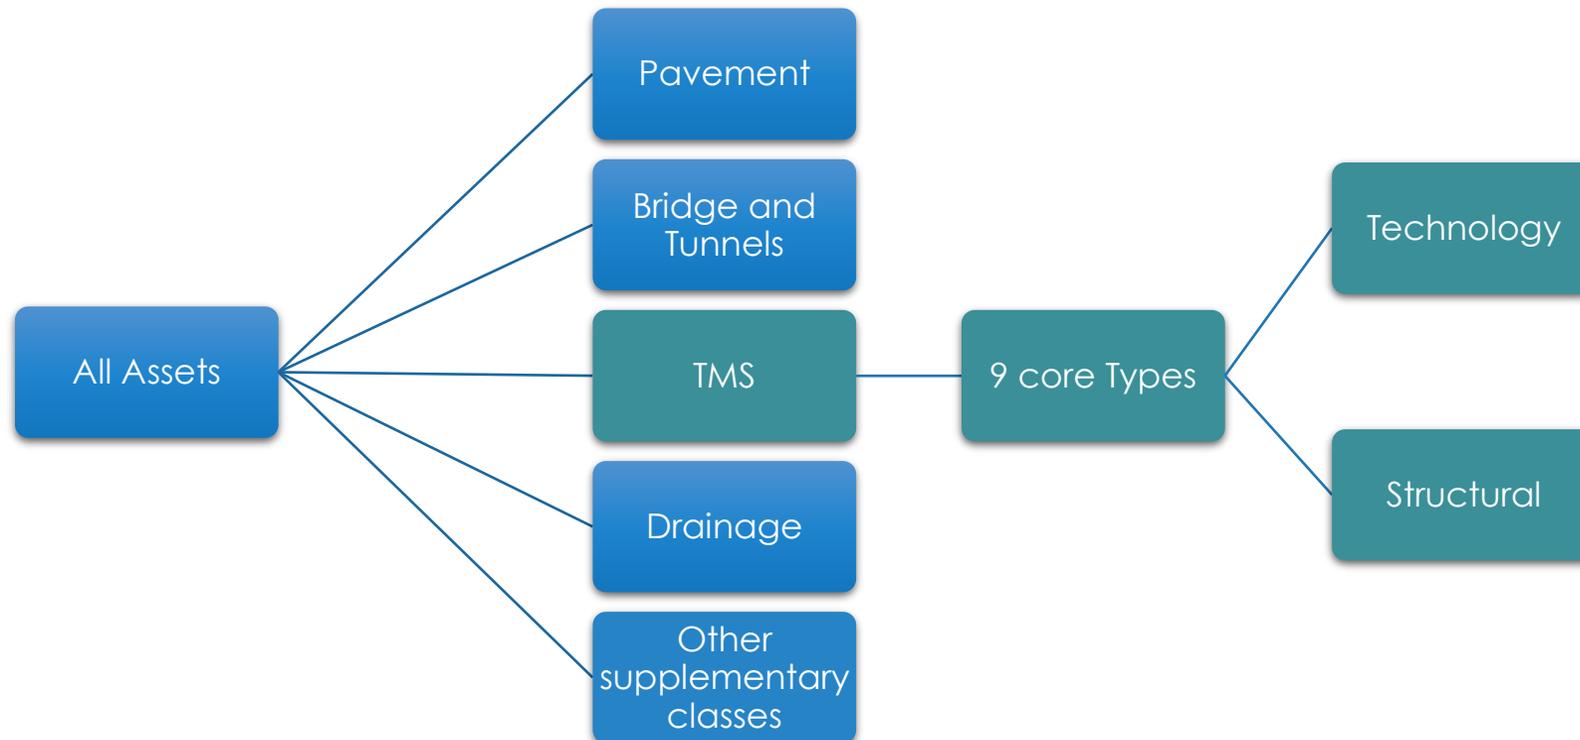

# Assets: TMS elements in the field

# Asset: TMS Components

- TMS assets are further separated into Technology and Structural components.
- This is due to their difference in cost and lifespan

## Break down So far:

## **TMS: Operation and Maintenance**

Life Cycle, Cost, and  
performance metric

# TMS: Life Cycle

Core Types	Life cycle (in Years)	
	Technology	Structural
Traffic Signals	25	50
Freeway ramp meters	25	50
Changeable message signs	20	50
Extinguishable message signs	20	50
Closed circuit televisions	10	50
Traffic monitoring detection stations	20	50
Traffic census stations	20	50
Roadway weather information systems	10	50
Highway advisory radios	15	50

# TMS: Unit Cost

Core Types	Unit Cost	
	Technology	Structure
Traffic Signals	\$148,996	\$367,966
Freeway ramp meters	\$73,560	\$234,823
Changeable message signs	\$161,454	\$416,901
Extinguishable message signs	\$64,864	\$52,542
Closed circuit televisions	\$57,300	\$57,825
Traffic monitoring detection stations	\$61,730	\$90,921
Traffic census stations	\$62,250	\$90,921
Roadway weather information systems	\$102,427	\$66,624
Highway advisory radios	\$97,451	\$92,364

# TMS: Investment Strategies

Our investment strategy:

- Fix-it-first approach
- Prioritize improvements over expansion

Table 4-1. SHOPP and Maintenance Investment Strategies

Investment Strategies	
Strategy	Description
Fix-It-First	<ul style="list-style-type: none"> <li>• Prioritize maintenance, rehabilitation, and safety improvements over capacity expansion.</li> <li>• Focus on the right treatment at the right time to preserve or improve condition at optimum time and cost.</li> </ul>
Leverage Investments	<ul style="list-style-type: none"> <li>• Support the full range of Caltrans strategic goals.</li> <li>• Make progress towards multiple goal areas with each SHOPP investment.</li> <li>• Employ innovative and emerging technologies to realize efficiencies in design, construction, and maintenance activities.</li> </ul>
Focus on Selected Asset Classes	<ul style="list-style-type: none"> <li>• Focus on the most important assets on the SHS, as measured by vehicle-miles traveled and by asset value.</li> <li>• Pavement, bridge, drainage, and TMS assets represent a significant portion of SHS maintenance and rehabilitation investments.</li> </ul>
Address Environmental Stewardship Priorities	<ul style="list-style-type: none"> <li>• Reduce environmental impacts through sustainable treatment strategies.</li> <li>• Reduce impacts to air and water quality through best management practices.</li> </ul>
Integrate All Transportation Modes for All Users	<ul style="list-style-type: none"> <li>• Design accessible transportation infrastructure to support all modes for all users and address ADA requirements.</li> <li>• Ensure investments make progress towards broad transportation goals.</li> <li>• Include enhancements to pedestrian, bicycle, and transit infrastructure in multi-objective projects to leverage more efficiency.</li> </ul>

# TMS: Performance Metrics

TMS Life Cycle Health	TMS Up-Time Health
<ul style="list-style-type: none"> <li>Assets being within expected life cycle</li> <li>Current target of 90 percent of assets are within expected life cycle</li> <li>Focus of Division of Traffic Operations</li> </ul>	<ul style="list-style-type: none"> <li>Assets being functionally available</li> <li>Current target of 90 percent of assets are functionally available</li> <li>Focus of Division of Maintenance</li> </ul>

Table 5-44. Transportation Management Systems Performance Metrics

Performance Metrics	
Condition	Criteria
Good	Within expected life cycle and consistent functional availability
Fair	N/A
Poor	Beyond expected life cycle or is not meeting functional availability because of chronic down time

**Chronic down time:**

TMS units that are repeatedly failing and no longer can be fixed through maintenance resources to be flagged for permanent repair/replacement.

# TMS Life Cycle Health

Program assets into following programs to replace asset and reset life cycle

- SHOPP
- Minor A, B
- Director's Orders
- HM4-TMS
- Rescope to accelerate the projects (PCR process)

# TMS: Up-Time Health

## Proactive measures

- Preventive Maintenance (PM) checks
  - Performed by Field Maintenance Crews
  - To Maintain the up-time health of the system
  - To achieve maximum service life of the TMS units
  - Entire TMS inventory requires over 80,000 PM checks and repairs annually
- Operational reviews
  - Performed by Traffic Operations Field Crew
  - To verify proper operation of the systems
- Recertification process
  - Review asset by the end of life cycle for field condition and functionality
  - Extend life cycle by no more than 10 years
  - Performed by Traffic Operations

# TMS: Up-Time Health

## Reactive measures

- Repairs
  - Performed by Field Maintenance Crews
- Service Contracts (TOSNET)
  - To enhance Field Maintenance Electrical Crews response for the repairs
  - As needed, after exercising their first right of refusal
- Flag as chronic
  - Assets that have reoccurring or beyond repair issue
  - Mark asset condition as Poor
  - Affect life cycle health
  - On the list for it to be programmed

# TMS: Challenges

## Limited funding

- Prioritize assets to collect data for safety analysis
- Prioritize assets for repair
- Prioritize assets for operational needs

## Fast evolving technology

- Decide to adopt or wait

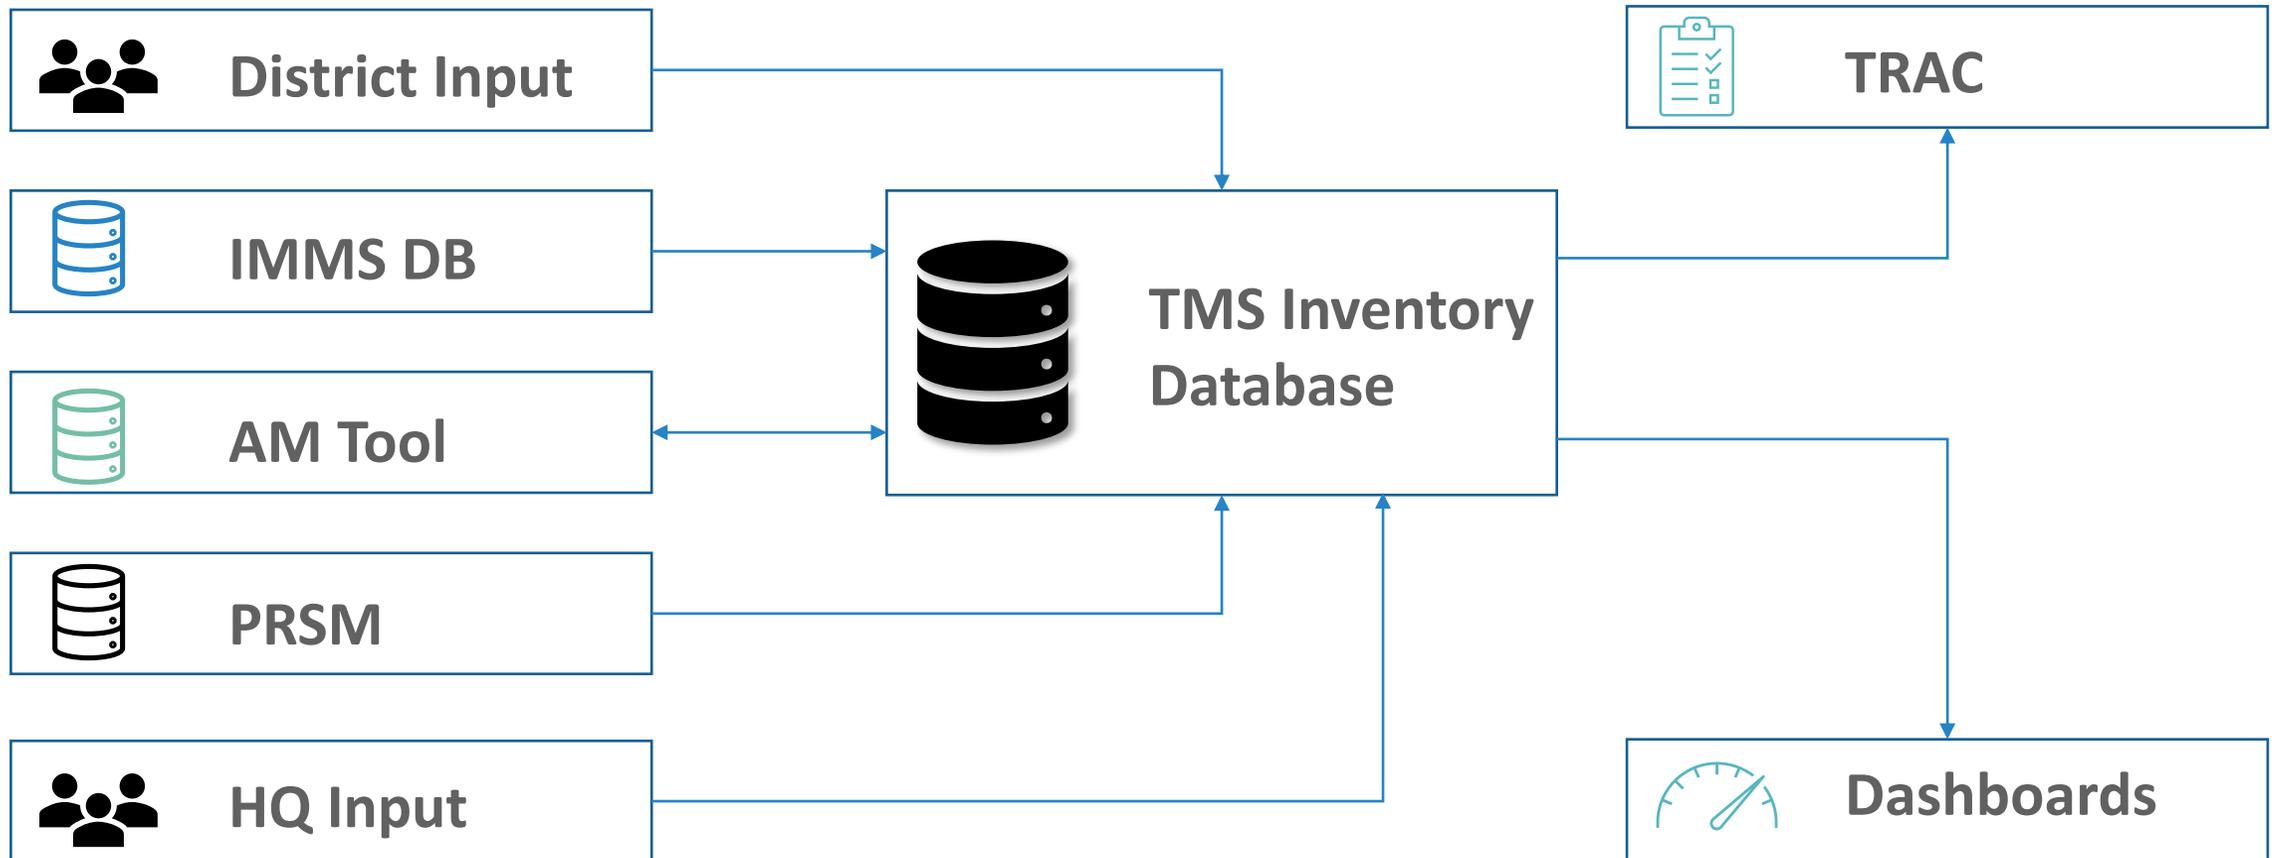

## **TMS: Data**

Validation and Visualization

# Data: Databases

- **TMS inventory database**
  - Maintain asset data for operations need, including life cycle tracking
- **Integrated Maintenance Management System (IMMS)**
  - Maintain asset data for maintenance needs
- **TRAC**
  - Issue tracking software
  - Used to track functionally unavailable assets and its repair
  - Used to flag assets as 'Chronic' when not repairable
- **Asset Management Tool**
  - Project asset information

# Data: Flow Diagram

# Data: Quality

Maintaining quality of these data is important:

- Accountability towards public
- SB1 commitments
- TMS Oversight
  - CTC
  - Auditor
  - Asset Management Team
- Funding constrains

# Data: Validation

## TMS Inventory Database

- Ensure valid manual data entry
- Cross check with other databases
- Quarterly certification of inventory data by districts

## Validation checks

- Developing validation checks
- Checks data in record across fields for validity

## Dashboards and data visualization

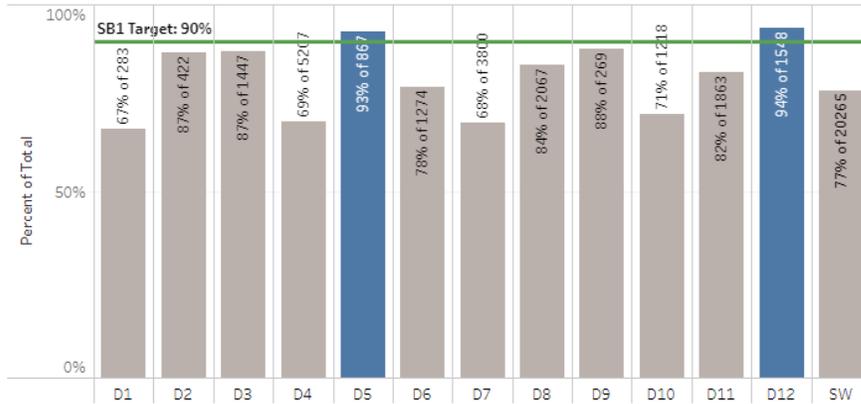

- Helps identify record or assets with issue

# TMS Dashboard

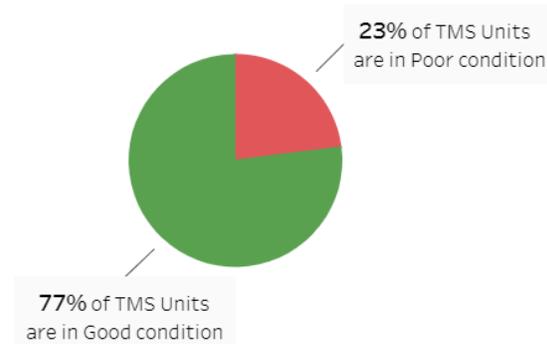

Intro TMS Lifecycle Status | TMS Current Lifecycle Status | TMS Projected Lifecycle Status | Intro types4&5 | Types4&5 | Version

## Current Conditions - 2023

Current Percentage of All TMS Units in Good Condition by District

Statewide Percentages of TMS Conditions

[Return to Navigation Menu](#)

Date: 5/25/2023

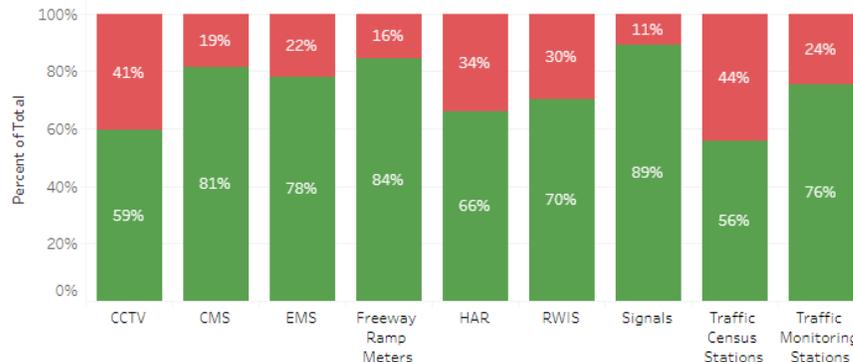

District: (All)

Overall Health:  
■ >= 90% in Good condition  
■ < 90% in Good condition

Current TMS Condition:  
■ Poor  
■ Good

Filter Tips:  
 Use the above drop-down District filter or the bar chart in the top-left quadrant to select a district. Click on the bar to select a specific district, click again to select ALL.

Current Percentage of TMS Condition Status by TMS Type District(s): All

TMS Condition Status District(s): All

TMS Unit Type	Good	Poor	Total Inventory	Percent Good
CCTV	1,969	1,345	3,314	59%
CMS	956	221	1,177	81%
EMS	455	129	584	78%
Freeway Ramp Meters	2,564	473	3,037	84%
HAR	119	61	180	66%
RWIS	130	55	185	70%
Signals	5,337	660	5,997	89%
Traffic Census Stations	859	681	1,540	56%
Traffic Monitoring Stations	3,213	1,038	4,251	76%
<b>Grand Total</b>	<b>15,602</b>	<b>4,663</b>	<b>20,265</b>	<b>77%</b>

### Lifecycle Status

- Click on the pie chart to filter and unfilter.
- Default chart displays Statewide Lifecycle Status.

### Caltrans District Total TMS Unit Type

#### TMS Unit Type

- CCTV
- Traffic Census Stations
- Signals
- RWIS
- HAR
- EMS
- CMS
- Traffic Monitoring Stations
- Freeway Ramp Meters

- Use the scroll bar at the top of the chart to zoom in on a District.
- Hover over bar to display Type's count by District.
- To filter TMS Unit Type click on the legend's symbol.

District-TMS Unit Type | Statewide-TMS Unit Type | Future Expired TMS

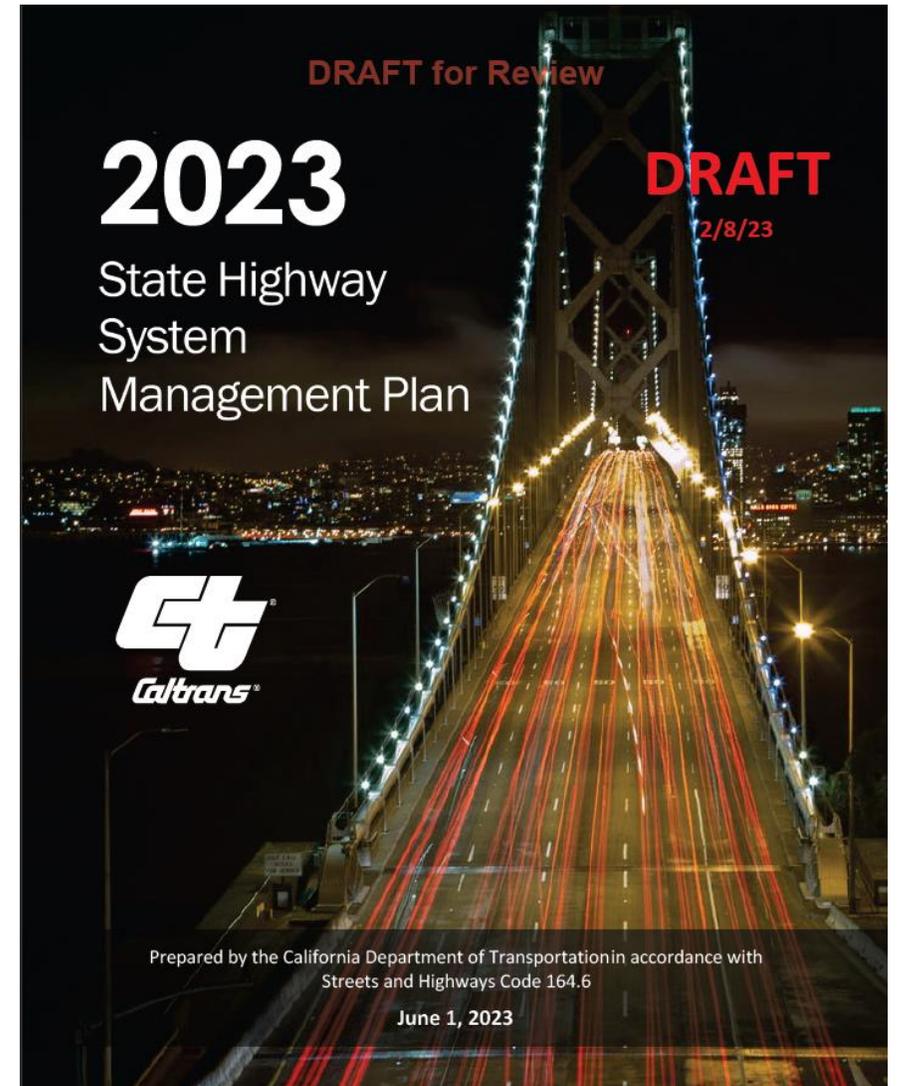

# Data: Challenges

- Ensuring databases are in sync
- Minimizing duplicate data stored across databases
- Updating systems to match evolving needs

## TMS: Guidelines

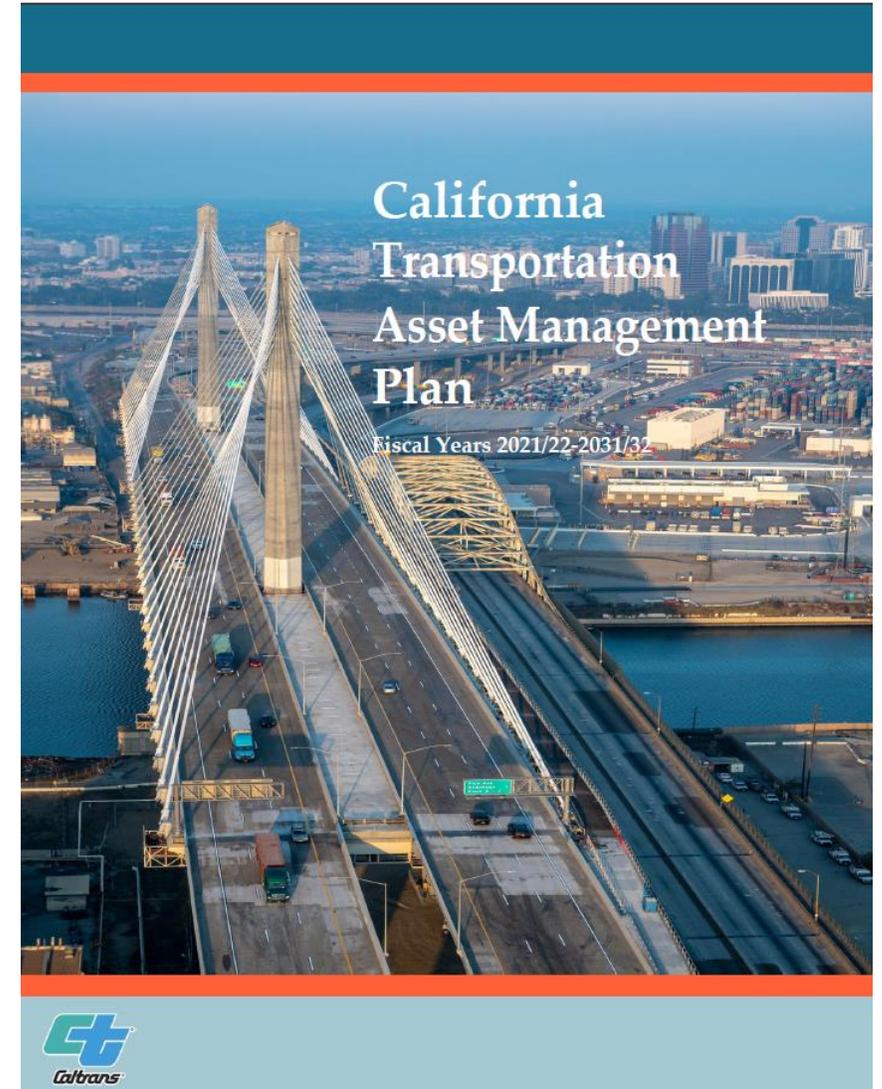

# Guidelines: State Highway System Management Plan

- SHSMP presents performance driven and integrated management plan for California's SHS
- SHS needs, investments and resulting performance projections for the 10-year period
- SHSMP aligns with
  - Caltrans Strategic Plan and
  - Climate Action Plan for Transportation Infrastructure (CAPTI)

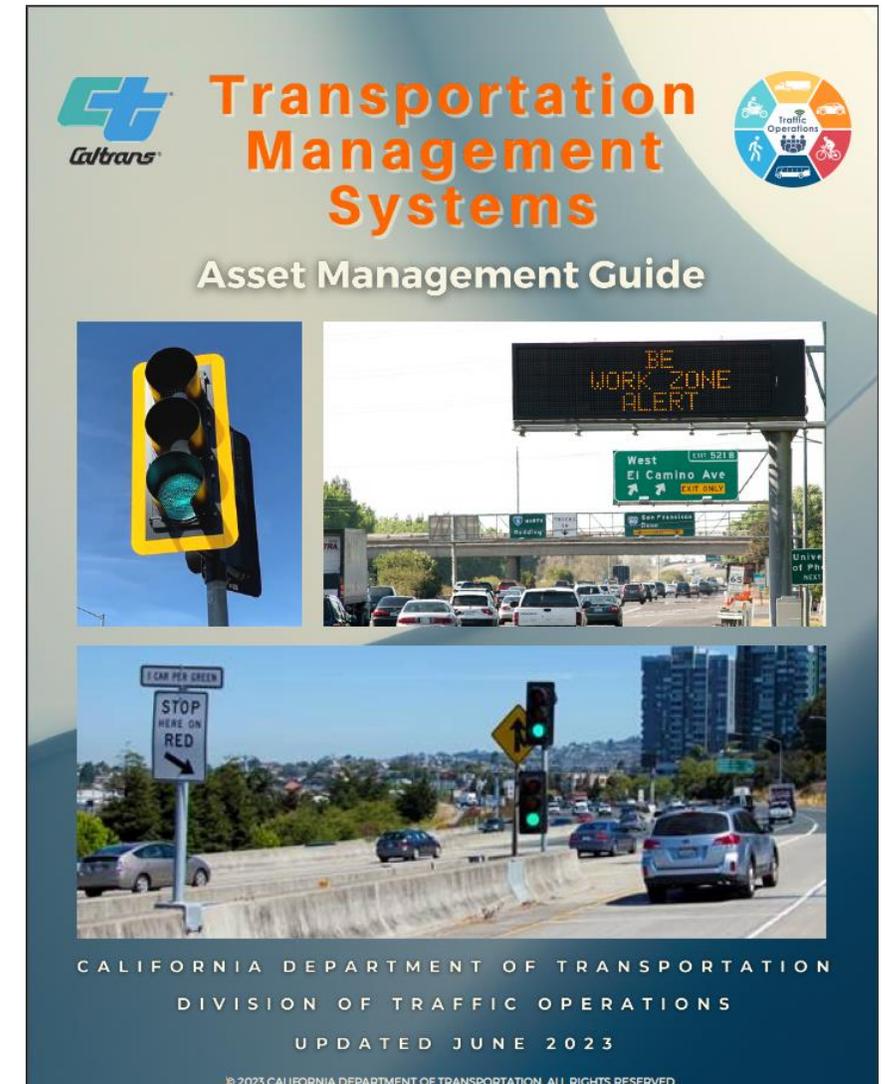

# Guidelines: Transportation Asset Management Plan

- Presents a coordinated plan by Caltrans and its partner agencies
- Presents plan to maintain California's highway infrastructure assets today and into the future.

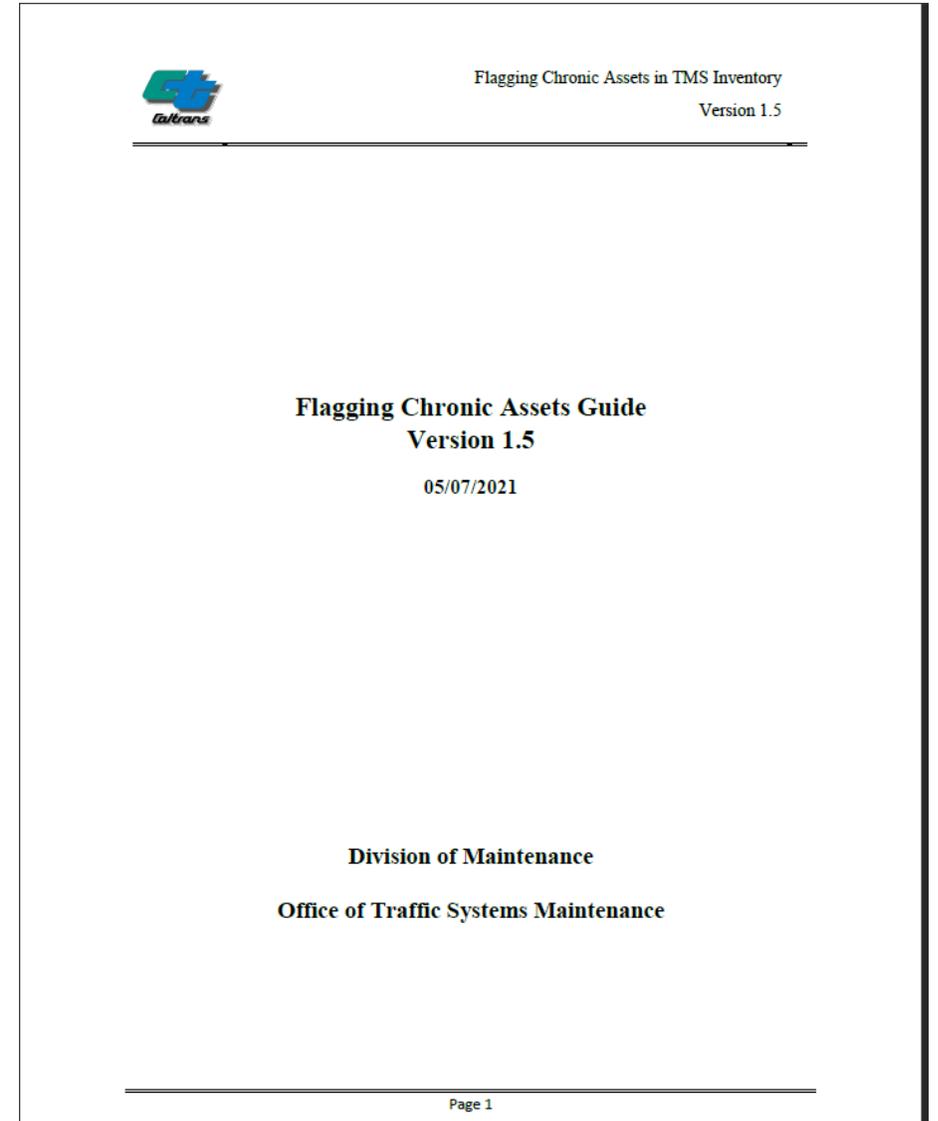

# Guidelines: TMS Asset Management Guide

- Provides guidance to meet targets set forth by Senate Bill 1 (SB1), and as included in TAMP and SHSMP
- Provides consistent process to keep TMS inventory data updated
- Division of Traffic Operation's internal document
- Supplements SHOPP Guideline, TAMP, and SHSMP

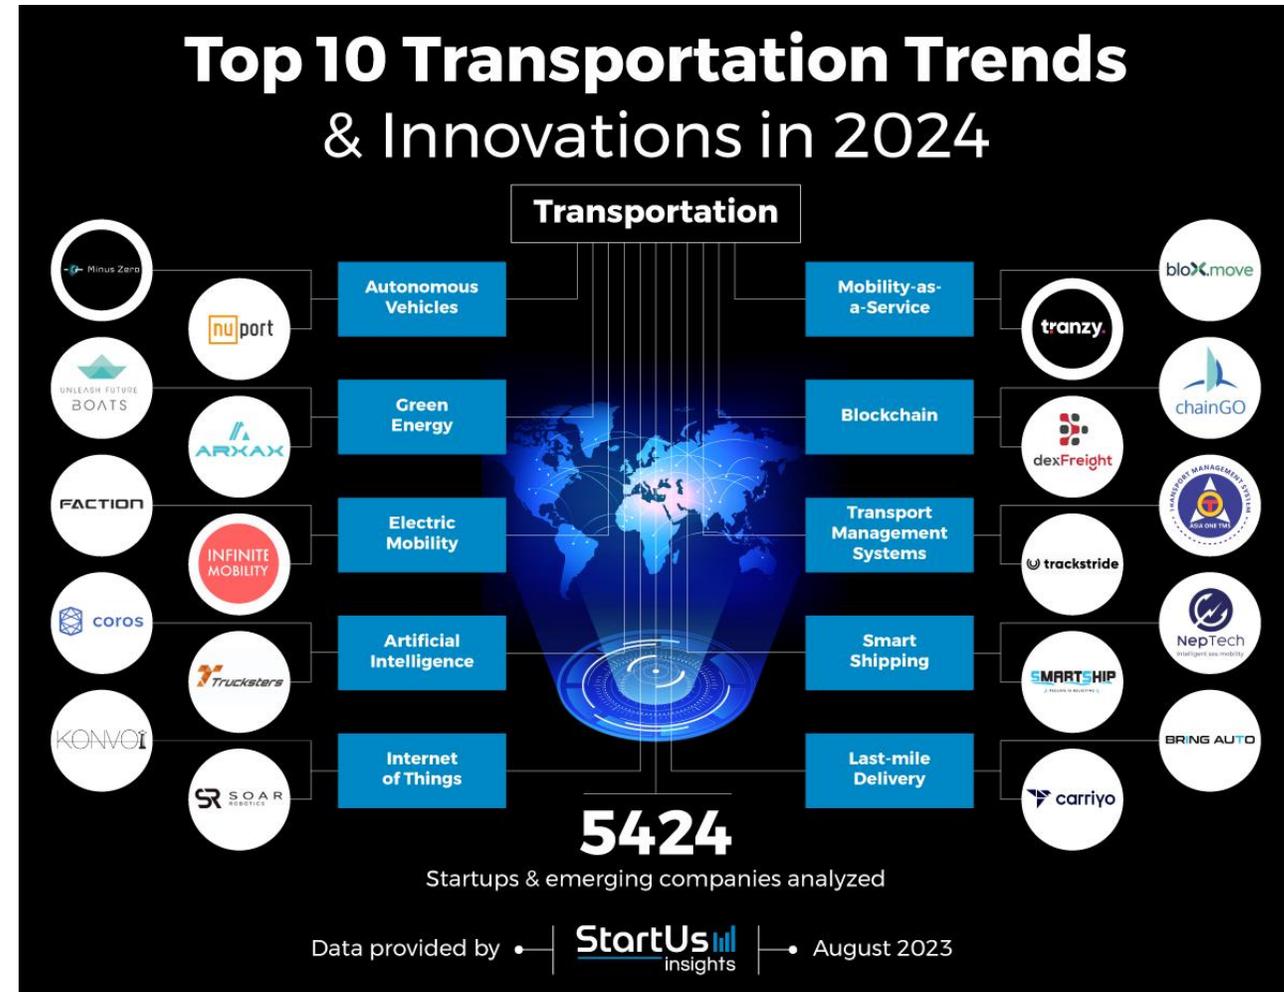

# Guidelines: Chronic Guide

- Provides streamline process for flagging assets as chronic
- Division of Maintenance's internal document

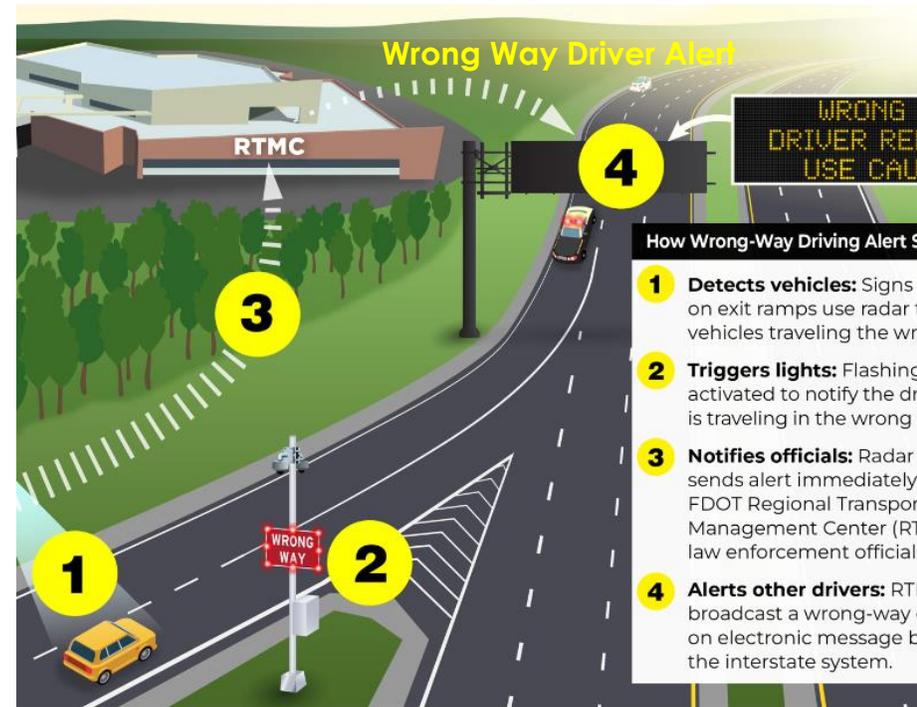

# TMS: Innovative Ideas

Future technologies

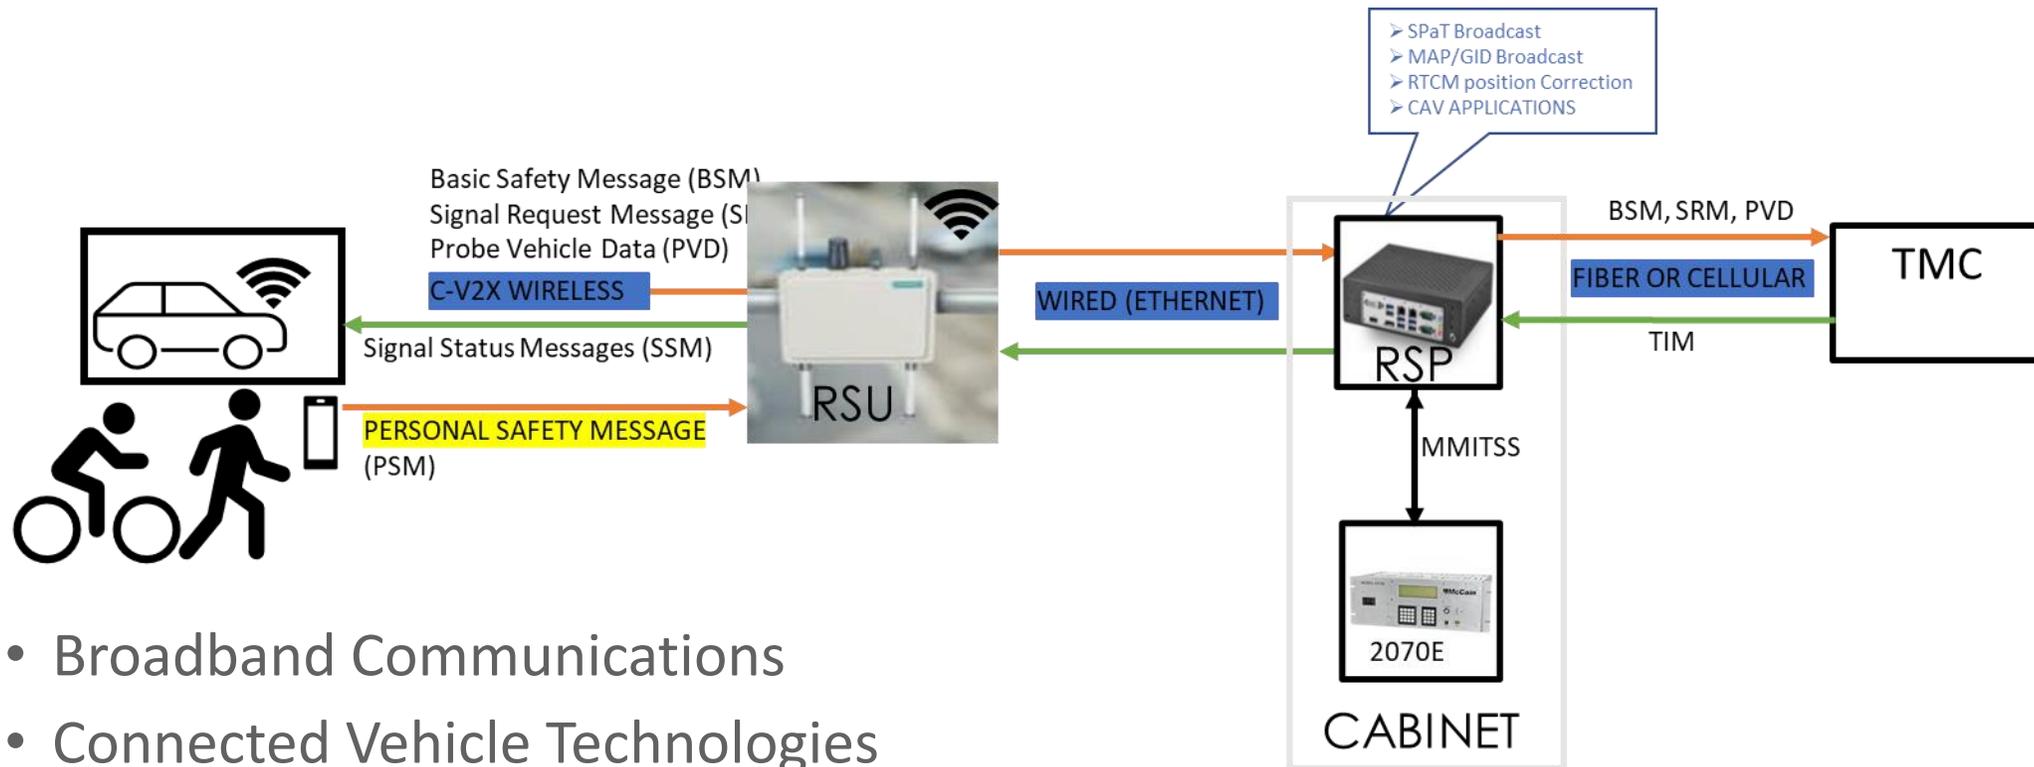

# Connected Vehicles

TMS: Innovative Ideas, Future Technologies

# Digital Infrastructure

TMS: Innovative Ideas, Future Technologies

- Broadband Communications
- Connected Vehicle Technologies
- Artificial Intelligence, Machine Learning
- Cloud computing, Data Management
- Cybersecurity

# ITS Improvements

*TMS: Innovative Ideas, Future Technologies*

## OFF PAVEMENT DETECTION TECHNOLOGY

- Improved construction safety
- Improved maintenance access
- Improved lane configuration (auto)
- Reduce footprint w/ consolidation

## High Resolution Color DMS/CMS

- Improved visibility
- Unlimited graphic display functionality
- Long life
- Maintenance friendly

# Questions?

# Thank you
