

SC Safety Engineer

Sarah Rusby (acting)

SC safety slogan

Safety-First-Always

Culture of Safety

- Engagement
- Recognition
- Documentation

Zero serious injury and or deaths

Safe System approach

“4 pillars of Traffic Safety”

1. Double down on What Works (proven safety countermeasures)
2. Accelerate advanced technologies
3. Implement a Safe System Approach
4. Integrate Equity

The Safe System approach aims to eliminate fatal and serious injuries for all road users through a **holistic view** of the road system.

SEVERE ALERT!

Warning: [Forecast for Areas of Heavy Rain and Gusty Winds Into Week of Aug 20 - Know before you go](#)

- Never drive through flooded areas - one foot of water can sweep a car off the road.
- Heed posted signs that are there for your safety.

[Caltrans Construction Safety Award Program \(CCSAP\)](#)

Caltrans Construction Safety Award Program (CCSAP)

Caltrans Construction Safety Award Program (CCSAP)

Caltrans and the Construction Industry are committed to improving safety for construction projects. As a result, the CCSAP was created as an annual recognition of projects that emphasize safety for both the travelling public and workers by implementing best safe practices and continually working to improve the safety of the project. The main purpose is to recognize all contract stakeholders (contractors, subcontractors, and Caltrans project staff) who exemplify best safe practices and by going above the minimum safety requirements of a contract. In addition, this is an opportunity to acknowledge projects with innovative technology, work methods, use of products and materials moving towards safety improvements within construction work zones.
