## INTRODUCTION

### THE HIGHWAY PERFORMANCE MONITORING SYSTEM (HPMS)

The Highway Performance Monitoring System (HPMS) is a federally mandated planning study designed by the Federal Highway Administration (FHWA) and implemented as a continuing information system that encompasses data collection, data analysis, and analytical modeling. Authority for the study is vested in Section 307 of Title 23, United States Code.

The Department of Transportation's, Transportation System Information Program collects the HPMS data from the cities, counties, Metropolitan Planning Organizations (MPOs) and other partners and stakeholders. The HPMS database maintains federally classified physical condition and performance characteristics on all public road mileage for rural and urban areas. The arterial and collector road systems (the prominent streets and roads) are then statistically sampled to estimate the current needs and future performance of the system. The type of information sampled includes: traffic operational, structural section, pavement condition, geometrics, environmental, future Annual Average Daily Traffic (AADT) estimate, and other technical information.

The HPMS study provides FHWA with information for:

- Biennial reports to Congress on The Status of the Nation's Highways
- Annual Highway Safety Performance reports to Congress
- Annual Highway Statistics reports
- Allocating Interstate Maintenance Program Funds
- Periodically assessing the extent and condition of highway systems
- Monitoring performance of highway systems over time
- Calculating impacts of existing FHWA programs and policies
- Forecasting impacts of future alternative programs and policies
- Providing estimates of Vehicle Miles Traveled (VMT) to the Environmental Protection Agency (EPA)

Apportionment formulas have been established under TEA-21 for the National Highway System (NHS), Interstate Maintenance (IM) and the State Transportation Program (STP). In each of these programs, funding is calculated based on lane miles and VMT (vehicle miles traveled). The STP funds are allocated for the Federal-Aid Highways, which include the arterials and major collectors; but exclude rural minor collectors, and rural and urban local. Public road mileage, lane miles and VMT reported to the FHWA are all derived from the HPMS. Further information about federal apportionment can be found at <http://www.fhwa.dot.gov//ohim/hs00/fa4a.htm>

The information in this publication should be valuable to transportation planners and administrators, legislative bodies, and others for use in transportation planning applications and transportation policy decision-making.

## Description of Data Tables

Table 1        2002 MAINTAINED MILES, LANE MILES AND ESTIMATED ANNUAL VEHICLE MILES OF TRAVEL (AVMT) BY TYPE OF JURISDICTION

This table gives an overview of the public road mileage in California and the agencies that maintain and have jurisdiction over them. This includes the sum total held by the 475 incorporated cities and the unincorporated parts of 57 counties. There are actually 58 counties in California but San Francisco, being a city and a county, is included in the cities since there is no unincorporated part of that county/city. State and federal agencies maintain most of the rest of the mileage. There is an inert amount of public road mileage maintained by private and other entities.

Table 2        2002 MAINTAINED MILES, LANE MILES AND ANNUAL VEHICLE MILES OF TRAVEL (AVMT) BY FUNCTIONAL CLASSIFICATION

A statewide summary of the miles, lane miles and VMT is given for each of the 12 roadway functional classifications defined and recognized by the Federal Highway Administration (FHWA). Predictably, the higher systems have fewer miles and lane miles, but greater AVMT than the lower systems.

Table 3        2002 HPMS MILEAGE SUMMARY BY FUNCTIONAL CLASSIFICATION IN THE URBANIZED AREAS WITH POPULATION AND NET LAND AREA

The urbanized areas are delineated by the urban boundaries set by the U.S. Census Bureau. Rural areas would contain population centers that have less than 5000 population, or areas below a certain population density. Small urban areas are population centers with more than 5000 but less than 50,000 people. Urban areas have between 50,000 and 200,000 population and Large Urban areas have over 200,000. Any urbanized or rural area may or may not contain an incorporated city and the urban boundary does not necessarily follow city corporation lines.

The population of each urbanized area is derived from the population data of each city and county as published by the State Department of Finance. The net land area excludes the large bodies of water.

Table 4      2002 HPMS ESTIMATED DAILY VEHICLE MILES OF TRAVEL  
(DVMT) BY FUNCTIONAL CLASSIFICATION IN THE URBANIZED  
AREAS

Organized similarly to table 3, this gives the DVMT.

Table 5      2002 MILEAGE OF MAINTAINED PUBLIC ROADS IN EACH  
COUNTY BY JURISDICTION

This includes all jurisdictions within each county, incorporated and unincorporated, which have reported public road mileage as of 2002. This table also appears as table J-1 in the California Statistical Abstract published by the Department of Finance.

Table 6      2002 MAINTAINED MILEAGE & DAILY VEHICLE MILES OF TRAVEL  
ESTIMATES BY JURISDICTION

Probably the most frequently used table in the Assembly, the mileage figures originate from the annual maintained mileage reports submitted by the agencies.

Table 7      2002 ROAD MILES BY FUNCTIONAL CLASSIFICATION BY  
COUNTY

These figures include all public road mileage from all jurisdictions within each county.

Table 8      MILES, LANE MILES AND DVMT BY URBANIZED AREA

Similar to tables 3 and 4, this also gives the lane miles.

Table 9      MILES, LANE MILES AND DVMT OF THE NATIONAL HIGHWAY  
SYSTEM

The National Highway System (NHS) was established by the National Highway System Designation Act of 1995. More information about the NHS can be found at: <http://www.fhwa.dot.gov/hep10/nhs/>

All Interstate routes are on the NHS. 96.2% of the mileage on the NHS is state highway with the other 3.8% being non-state highways. 4.5% of all public roads in California are on the NHS, slightly higher than the 4.0% nationwide. NHS routes have special funding availability. The respective Caltrans district, Office of Local Programs, should be consulted to ascertain which specific routes are on the NHS.

**Table 10 MILES, LANE MILES AND DVMT IN EACH OF THE NATIONAL AMBIENT AIR QUALITY STANDARDS (NAAQS) NON-ATTAINMENT AREAS**

This table deals with HPMS information for use in air quality monitoring. The NAAQS non-attainment areas are as established by the EPA. The Clean Air Act Amendments of 1990 require areas that are in serious, severe or extreme non-attainment for established ozone or carbon monoxide levels to track vehicle miles of travel.

**Table 11 MILES, LANE MILES AND DVMT BY MPO**

This is provided for the 16 Metropolitan Planning Organizations (MPOs) officially recognized in California as of 2002. Note that all but 2 of these MPOs have their boundaries exclusively along county lines.

The miles, lane miles and DVMT shown for the Tahoe Metropolitan Planning Organization (TMPO) include only the portions in California and not Nevada.

**Table 12-1 PAVEMENT CONDITION ON INTERSTATE ROUTES**

**Table 12-2 PAVEMENT CONDITION ON NON-INTERSTATE ROUTES**

Summarized here are the ranges of data for the International Roughness Index (IRI). The IRI is the cumulative vertical displacement per unit of longitudinal distance. These are given here in English units where the cumulative vertical displacement is in inches per mile of longitudinal distance. The ranges given are as established by the FHWA for each of the qualitative condition terms (Very good, good, etc.). These ranges differ for interstate routes versus non-interstate routes. An IRI greater than 220 would be considered poor condition on a non-interstate route but a pavement on an interstate would be in "poor" condition if the IRI were greater than 170.

So far, as of 2002, Caltrans has collected IRI data on 12,815 federal aid, non-interstate segments and 434 interstate segments. These are from measurements taken from 2000 to 2002.
