

INTERSTATE 5 REHABILITATION PROJECT

(San Joaquin County)

The Interstate 5 Rehabilitation Project is located in the city of Stockton, from Dr. Martin Luther King Jr. Boulevard/Charter Way to Country Club Lane. Caltrans will reconstruct the existing eight lanes with continuously reinforced concrete pavement (long life pavement); widen the inside shoulders from 5 feet to 10 feet; rebuild the outside shoulders and auxiliary lanes; and replace existing guard rail with a concrete median barrier.

Construction is anticipated to be completed by late 2016. The \$54 million project is funded through the 2010 SHOPP.
