

# State Route 91 | Roadway Rehabilitation Project

CALIFORNIA DEPARTMENT OF TRANSPORTATION

## 55 HOUR CLOSURE – SR-91 AT KRAEMER BLVD / GLASSELL OFFRAMP

### Project Update

The Department of Transportation (Caltrans) continues to move forward on the \$15.3 million Capital Prevention Maintenance Strategy Project along a 10 mile stretch of the SR-91 from Carmentia Avenue, Los Angeles County to Lakeview Avenue, Anaheim. Construction crews are rehabilitating the roadway by removing and replacing all existing broken concrete slabs, pavement and asphalt concrete on all general purpose and Highway Occupancy Vehicle lanes (HOV), revising HOV lane striping to continuous access, constructing ramp termini, and upgrading maintenance of all bridge structures within the project area.

The Rehabilitation Project has 320 working days with an estimated completion of October 2013. The contractor is All American Asphalt.

### Planned Closure

The 55 hour, full weekend closure is scheduled from Friday, January 18 at 10:00 p.m. to Monday, January 21, 2013 at 5:00 a.m.

*Due to unforeseen operational factors or inclement weather, these dates and times may change.*

Every effort will be made to minimize the impacts of construction to motorists, residents and businesses. Changeable message and detour signs will be posted prior to the closure.

### Detour Route

Eastbound State Route 91 motorists will exit Tustin Ave., make a left turn at La Palma and then proceed to Kraemer Blvd.

### Project Benefits

Once the Eastbound SR-91 off-ramp at Kraemer Blvd/Glassell Street has been reconstructed, motorists will experience a smoother ride.

California law requires vehicles to safely reduce speed, move over, and merge into unoccupied lanes when emergency vehicles, construction vehicles, or tow trucks are displaying flashing warning lights.

Caltrans reminds motorists to use extra caution and reduce speeds when driving through construction zones.
