

## StreetViewPopup

The purpose of this tutorial is to show the functionality of the **StreetViewPopup** tool. The *StreetViewPopup* tool is used to show 4 different views of the map, alone or all together.

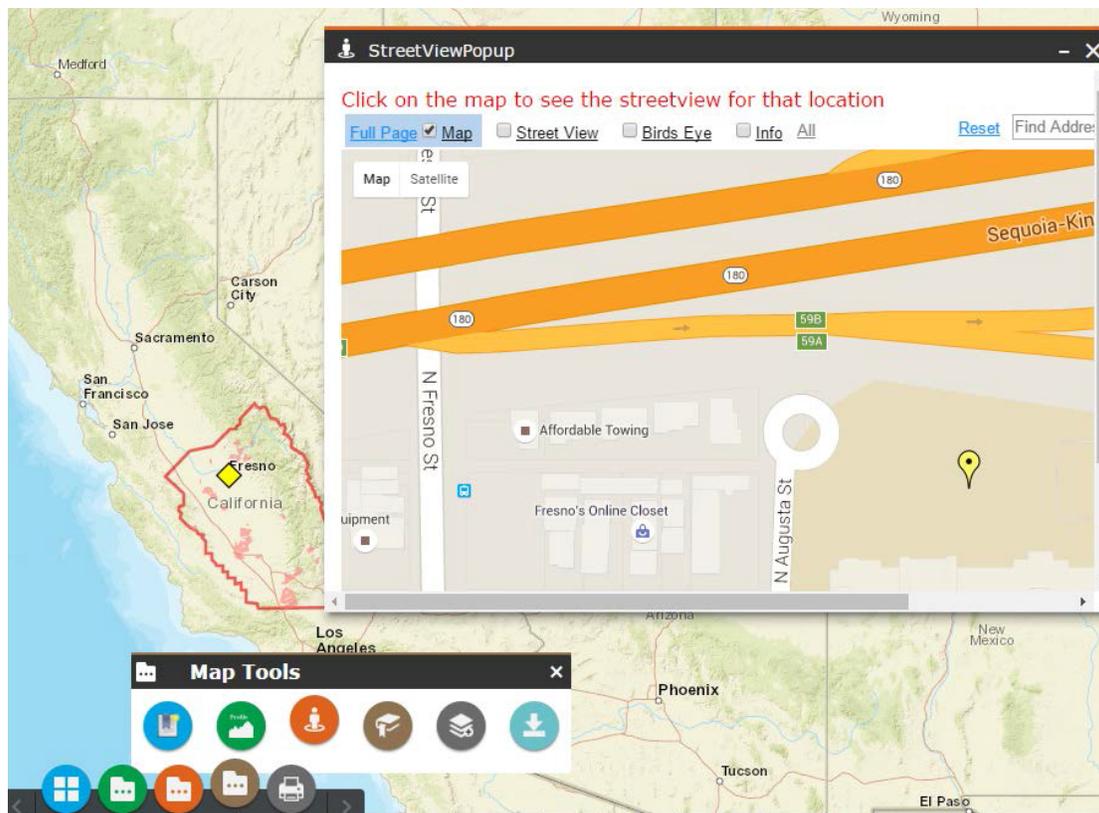

1. Locate the round brown Map Tool icons at the bottom center of the screen and click on it.
2. Locate the StreetViewPopup icon. It is the round orange icon, then click on it.

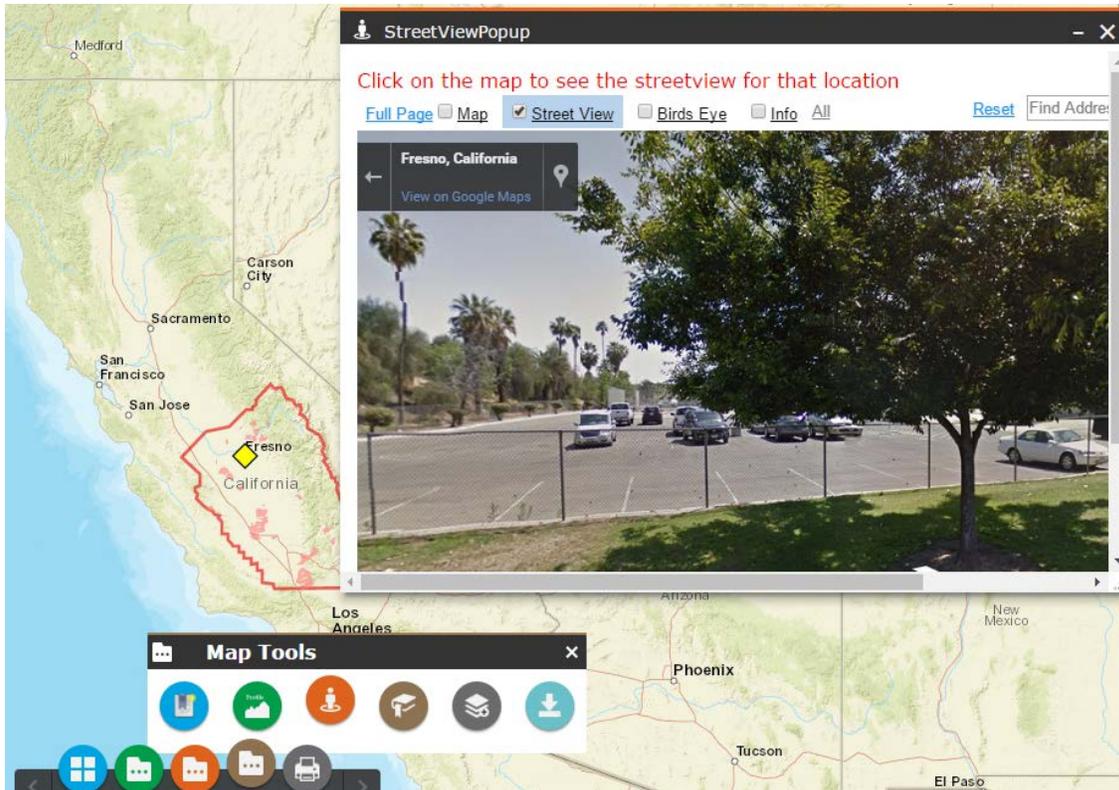

3. Once you have clicked on the StreetViewPopup icon, a popup window opens asking you to select an area on the map. After you select an area to view the popup window changes and offers you 4 different view types.

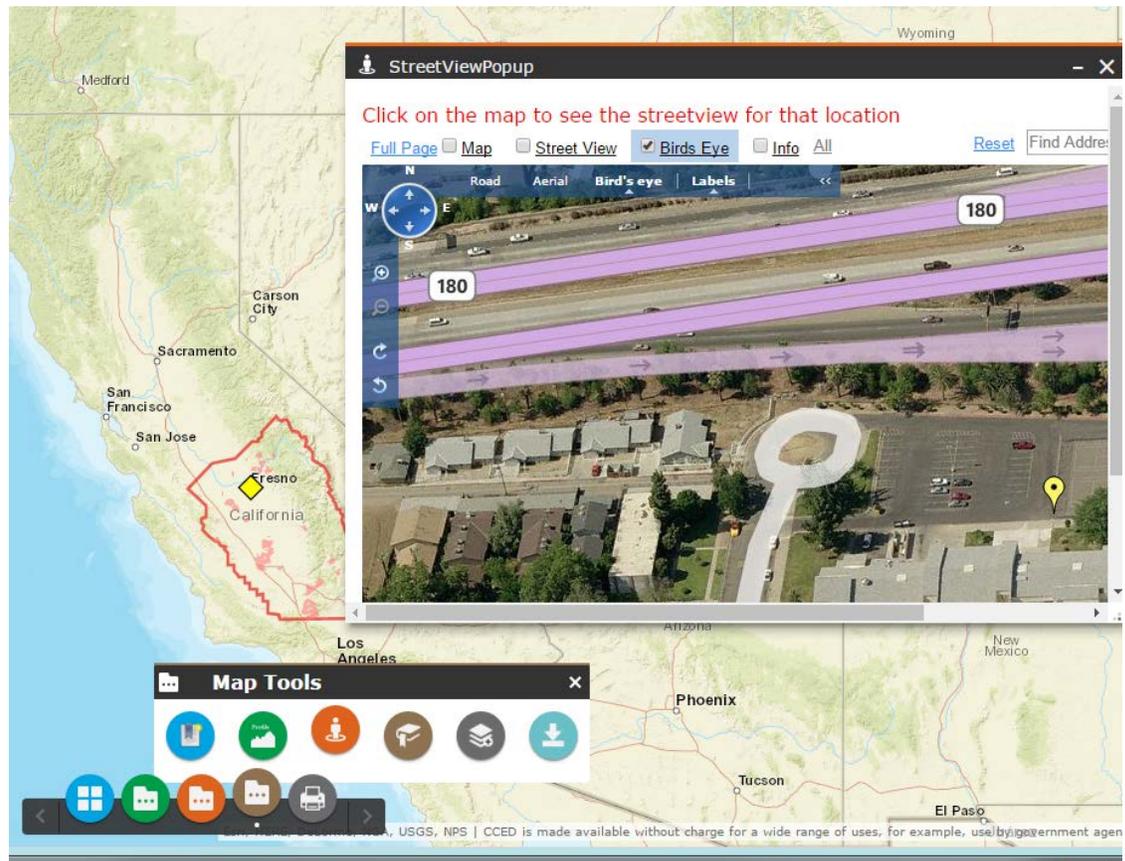

#### 4. The Map View

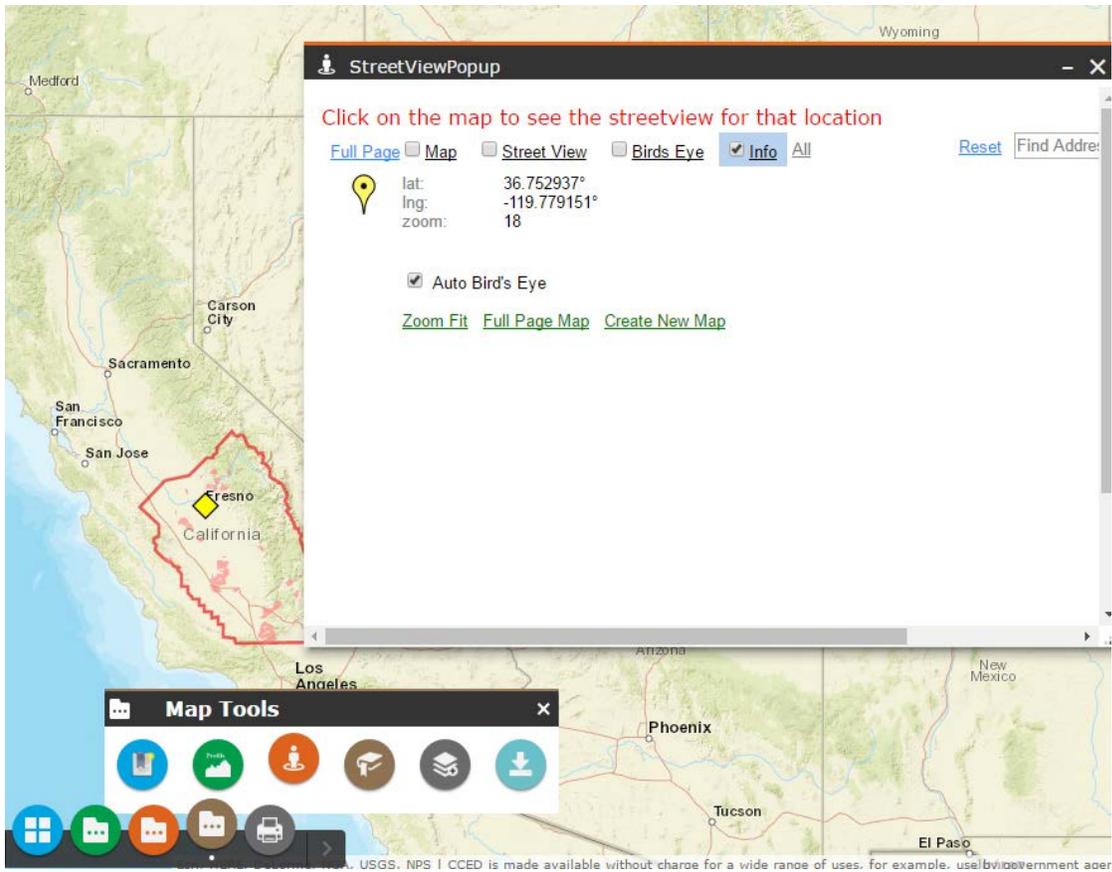

## 5. The Street View

## 6. The Birds eye view

## 7. Info View

8. Image below shows all 4 boxes selected.
