

## LOCATE PM POINT

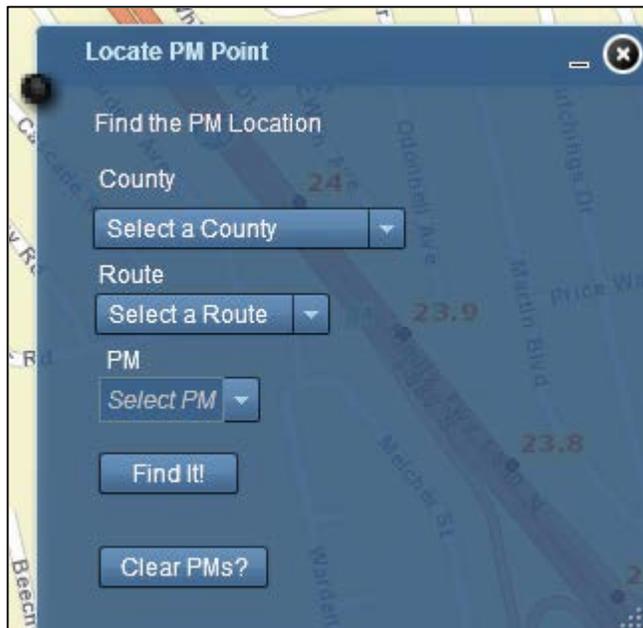

The purpose of the tutorial is to showcase the functionality of the Locate PM Point tool. The Locate PM Point Tool lets you search for a PM point on the map.

1. To locate the **Locate PM Point** tool, go to **PM Tools** icon and select **Locate PM Point**.

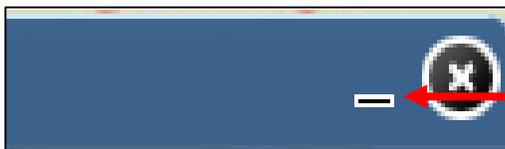

Go to **PM Tools** icon and select the **Locate PM Point** tool.

2. A Locate PM Point pop-up window will appear, asking to enter the criteria to locate the PM point.

Select the criteria in the Locate PM Point tool window.

3. To minimize the window, click on the minimize button.

Click on the minimize button to minimize the Locate PM Point tool.

4. Once minimized, Locate PM Point turns into an icon. To reopen the Locate PM Point tool, click on the Locate PM Point icon.

Click on the Locate PM Point icon to reopen window.

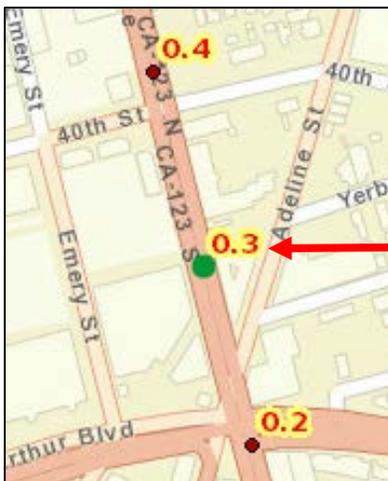

5. To use the Locate PM Point tool, select and enter the criteria, and click the **Find It!** button.

Select and enter the criteria in the Locate PM Point window.

Click on **Find It!** Button to execute.

6. The selected point will appear in green on the map.
