Task Details and Exceptions

Note: Due to the uncertain nature of actual construction scheduling, weather conditions, and other associated project tasks, we have made certain assumptions in the preparation of this Cost Proposal, which includes the following:

- Task 1. Three (3) copies of the printed report and an electronic copy will be submitted to the contractor in accordance with the project specifications. Report will comply with Caltrans 2010 Specifications. All materials used for this item will be billed at cost. This item covers all necessary work to submit a SWPPP for initial acceptance by Caltrans. Any additional amendments or changes to the report thereafter will be billed on a time and materials, at the hourly rate of \$125.00.
- Task 2. Weekly site inspections will include field inspection of all project areas, all report preparation, and electronic delivery of PDF version of reports. An ADH staff QSD will be named as the Water Pollution Control Manager (WPCM) for the project in accordance with the project specifications. Contractor field staff may assist in water quality operations overseen by the WPCM, but ADH staff must visit the site a minimum of once every two weeks. Any additional site work necessary outside of the scope of field inspections will be billed on a time and materials, at the hourly rate of \$125.00.
- Task 3. A Rain Event Action Plan (REAP) will be prepared for the project in accordance with requirements within the Caltrans 2010 Specifications.
- Task 4. Stormwater inspections will occur as necessary in accordance with the Caltrans 2010 Specifications. A stormwater report also takes the place of a weekly inspection for the week performed.
- Item 5. Stormwater sampling and analysis for turbidity and pH will be performed in the field with calibrated meters in compliance with applicable permits and specifications. Sampling will be performed during a task 3 stormwater inspection. Item includes all documents and reporting.
- Item 6. Stormwater annual report will be submitted annually by the date required in the project special provisions.

Note: All items not specifically included in this quote are considered excluded.

By signing below, Contractor agrees that ADH Environmental will perform the scope of work for the project described herein. Prior to beginning work, Contractor and ADH Environmental must complete a subcontractor agreement with all applicable details related to the scope of work.

Task Details and Exceptions

Note: Due to the uncertain nature of actual construction scheduling, weather conditions, and other associated project tasks, we have made certain assumptions in the preparation of this Cost Proposal, which includes the following:

- Task 1. Three (3) copies of the printed report and an electronic copy will be submitted to the contractor in accordance with the project specifications. Report will comply with Caltrans 2010 Specifications. All materials used for this item will be billed at cost. This item covers all necessary work to submit a SWPPP for initial acceptance by Caltrans. Any additional amendments or changes to the report thereafter will be billed on a time and materials, at the hourly rate of \$125.00.
- Task 2. Weekly site inspections will include field inspection of all project areas, all report preparation, and electronic delivery of PDF version of reports. An ADH staff QSD will be named as the Water Pollution Control Manager (WPCM) for the project in accordance with the project specifications. Contractor field staff may assist in water quality operations overseen by the WPCM, but ADH staff must visit the site a minimum of once every two weeks. Any additional site work necessary outside of the scope of field inspections will be billed on a time and materials, at the hourly rate of \$125.00.
- Task 3. A Rain Event Action Plan (REAP) will be prepared for the project in accordance with requirements within the Caltrans 2010 Specifications.
- Task 4. Stormwater inspections will occur as necessary in accordance with the Caltrans 2010 Specifications. A stormwater report also takes the place of a weekly inspection for the week performed.
- Item 5. Stormwater sampling and analysis for turbidity and pH will be performed in the field with calibrated meters in compliance with applicable permits and specifications. Sampling will be performed during a task 3 stormwater inspection. Item includes all documents and reporting.
- Item 6. Stormwater annual report will be submitted annually by the date required in the project special provisions.
- Note: All items not specifically included in this quote are considered excluded.

By signing below, Contractor agrees that ADH Environmental will perform the scope of work for the project described herein. Prior to beginning work, Contractor and ADH Environmental must complete a subcontractor agreement with all applicable details related to the scope of work.
