- Water containment plan and counter-measures for Michels' operations.
- Invert Paving and/or Pipe grouting, Void Filling, or Pipe Repair.
- Notification of affected parties on a daily basis of the status of the project.
- All permits, fees, licenses, engineering etc., including but not limiting to, railroad permits/insurance if required, and any inspection fees associated with Michels' work. Also includes permits/permissions to discharge CIPP cure water to sanitary systems.
- Warranty inspection.
- Any point repairs/mechanical work required to install CIPP liner.
- Clearing and Grubbing.

If at any time Michels Corporation discovers any condition that existed but was not discovered due to no fault of Michels Corporation or arises that prevents Michels Corporation from the installation of CIPP by normal methods, Michels' reserves the right to modify this Proposal Letter and any terms or conditions herein. ***If our crews are delayed through no fault of their own, Michels will charge the responsible party \$1,350.00 per crew standby hour for straight time work, 1 ½ time on all overtime work and double time on all weekend work; this rate will also be applied for any extra mobilizations, indoctrinations, meetings, training, etc.***

Material acquisition lead-time is generally 4 weeks to Jobsite location. This quote is valid for 30 days and the payment terms are Cash, Net 30 days, no retainage, and supersede general or prime contract. If the Prime Contractor elects to accept Michels' proposal then both parties expressly agree that this proposal letter will be fully incorporated into the CONTRACT or SUBCONTRACT AGREEMENT. In the event of a conflict between any other provision in the Contract or Subcontract Agreement, the scope and intent of this Proposal Letter shall govern.

Michels appreciates your consideration of this quote and looks forward to working with you on this project. Please feel free to contact me at (503) 364-1199 if I may answer any questions you may have.

Sincerely,

Item No.	Item code	Item Description	Unit of Measure	Est Qty	Bid	Amount
1	070030	LEAD COMPLIANCE PLAN (SOIL)	LS	LS	\$1,250.00	\$1,250.00
1	070030	LEAD COMPLIANCE PLAN (GRINDING/COLD PLANING)	LS	LS	\$1,250.00	\$1,250.00
6	130100	JOB SITE MANAGEMENT	LS	LS	\$6,325.00	\$6,325.00
7	130200	PREPARE WATER POLLUTION CONTROL PROGRAM (PARTIAL – PLAN ONLY)	LS	LS	\$595.00	\$595.00

### TERMS AND CONDITIONS:

1. This quote and attached terms and conditions must become a binding part of any sub-contract.
2. A contract and 10 working days notice must be given prior to start of work. This quote shall remain valid for 30 days from date of actual bid opening, unless otherwise agreed upon.
3. TERMS: Due and payable within 30 days from date of installation and/or as per Business and Professional code 7108.5 and Public contract code 10262.5 (for progress payments) and/or as per Public contract Code 7107 (for retention due).
4. All change orders must be approved by agency/owner prior to work being performed by Veridico.
5. Excludes any insurance requirements in excess of Caltrans Standard Specifications.
6. Splitting offered bid item quotes **may be considered**. Please call Tim Anenson at (707) 317-0002 to discuss splitting the bid item quotes prior to the Caltrans submittal deadline.

**ASSUMPTIONS**

1. **Field monitoring may be required** for the Lead Compliance Plan line item. Field monitoring (under the supervision of a CIH) can be provided at a rate of \$2,495.00 per day including all labor, travel, per diem, equipment, materials, supplies, and lab costs.
2. Training specified in the LCP can be conducted (by a CIH) at contractor location. The training can be conducted for a lump sum of \$1,950.00.
3. Job Site Management assumes a project duration of 115 days (field work), or 23 weeks of on-site field work.

$$23 \text{ weeks} \times \$275.00/\text{week} = \$6,325.00$$

This is a weekly rate for Veridico to document required WPCP compliance by completing Caltrans forms 2030 and 2034 by a QSD/P. Veridico will work with your field staff to assess site conditions each week; no site visits are included. Pre-, during and post-rain event site inspections are not included but will be billed at the Job Site Management rate if required.

4. No other plans, reports, monitoring or permits are included.
5. The WPCP and the LCPs are **guaranteed** acceptance for the quoted bid.
6. Contractor to provide completed questionnaire (supplied by Veridico upon notice of award) prior to start of work.
7. Print-ready electronic draft and final copies of plans and/or reports will be provided so hard copies can be produced; no hard copies will be provided by Veridico.

**Veridico is a certified DBE contractor (No. 39572)** with a number of associates that have supported Caltrans projects for many years. We have the necessary certified personnel to support your efforts on this project and we look forward to providing you our highest level of project support. Please don't hesitate to contact me directly at (707) 317-0002 or at [tim.anenson@veridicogroup.com](mailto:tim.anenson@veridicogroup.com) if we can provide anything further.

My Very Best Regards,

**\*\*\* SAK CONSTRUCTION IS A UNION CONTRACTOR \*\*\***

### PROPOSAL INCLUSIONS:

- One mobilization / demobilization to the project site for the CIPP lining crew. If the Add Alternate is provided by SAK, one mobilization / demobilization to the project site for the pre-lining cleaning & CCTV inspection crew will also be provided. Any additional mobilizations will be negotiated as extra work.
- IF THE ADD ALTERNATE IS PROVIDED BY SAK: Prior to lining operations, perform cleaning of the existing mainline pipe to remove debris that can be removed with standard pipe cleaning equipment and dispose of the collected debris at a site provided by the General Contractor. Subsequent to cleaning operations and prior to CIPP lining, perform CCTV inspection of the existing mainline pipe and provide required documentation of the inspection to the General Contractor. Pre-lining cleaning & CCTV inspection of the host pipe is offered as an Add Alternate for the General Contractor, and only pipes being lined with CIPP by SAK will be cleaned and CCTV inspected. If the General Contractor elects to self-perform the pre-lining cleaning and CCTV inspection, or have it performed by others, then the Add Alternate containing the pre-lining cleaning and CCTV inspection items may be deleted in its entirety from this proposal without affecting the remaining pricing, terms, and conditions contained herein.

3. Install approximately 134 LF of cured-in-place pipe (CIPP) in the designated 24" & 30" diameter pipelines. The CIPP will utilize a polyester resin system and be installed per the requirements of the Cured-in-place Pipeliner (CIPP) specification section 15-6.11.
4. If needed, provide reinstatement of any laterals or downdrains encountered in the CIPP-lined pipes on a negotiated basis. Currently, the project documents do not show any laterals or downdrains entering the pipelines designated for CIPP installation that would require reinstatement by SAK after lining.
5. Provide required testing of samples of the installed CIPP at an independent laboratory to confirm conformance with minimum specified physical properties. Sampling methods and frequency will conform to specified parameters.
6. Perform CCTV inspection of the CIPP-lined mainline pipe immediately subsequent to CIPP lining and provide required documentation of the inspection to the General Contractor. Only mainline pipes that have been lined with CIPP by SAK will be inspected.
7. Payment of California State Sales Tax as applicable for the scope of work covered under this proposal.
8. Provide standard 1-year construction warranty on CIPP materials and workmanship.
9. Provide certificate of insurance and endorsements evidencing typical coverage and limits for General Liability (\$1 million / \$2 million), Automobile Liability (\$1 million), Workers' Compensation & Employer's Liability (\$1 million), and if required, Excess Liability (\$5 million). If insurance coverage above and beyond this is required, the General Contractor will be responsible for securing any additional insurance coverage or reimbursing SAK for the costs associated with obtaining the additional insurance.
10. When payment of prevailing wages is applicable, provide the required documentation showing workers on this project have been paid in accordance with the relevant prevailing wage determination for the appropriate laborer classification.

#### PROPOSAL EXCLUSIONS:

The following items are not included in this proposal, and when required, will be provided by the General Contractor at no cost to SAK. If SAK is required to provide any of these items, the costs will be charged to the General Contractor as extra work.

1. IF THE ADD ALTERNATE IS PROVIDED BY THE GENERAL CONTRACTOR OR OTHERS: If the Add Alternate containing the items for pre-lining cleaning & CCTV inspection of the host pipe is deleted from this proposal and SAK's scope of work, then the General Contractor shall perform the complete cleaning of the existing mainline pipe required prior to lining and dispose of the collected debris. The General Contractor shall also perform the CCTV inspection of the existing mainline pipe required subsequent to cleaning and prior to CIPP lining to confirm the adequacy of the cleaning operations and to confirm that no obstacle remains in the pipe that would impede lining. This shall also include taking measurements of the actual diameters, circumferences (for non-circular pipe), and lengths of the pipelines to be lined. The General Contractor shall provide records & documentation of the completed cleaning, CCTV inspection, and pipe measurements to SAK sufficiently in advance of the start of lining so that SAK may confirm that the pipe is ready to be lined and arrange for the necessary CIPP materials in a timely manner. The General Contractor shall also provide any required records & documentation of the completed CCTV inspection to the Owner.
2. Provide any necessary traffic, parking, &/or pedestrian control. Traffic, parking, &/or pedestrian control systems shall be coordinated to accommodate SAK's operations and placed in a timely manner such that SAK's operations are not impeded or delayed.
3. Provide legal and physical access to the pipeline, manholes, structures, inlets, outlets, catch basins and other access points sufficient to allow CIPP lining operations to be conducted, and to allow large trucks and equipment to access the inlets, outlets, catch basins, structures, and manholes directly when in streets, or as near as possible for easement locations. This shall include locating, exposing, and making accessible any manholes, structures, inlets, outlets, catch basins, or other access points associated with the lining work, including any necessary alterations to fencing, trees, and vegetation; snow &/or ice removal; excavation, clearing, or regrading of existing flowlines or channels; clearing of brush, trees, and debris outside of the pipe or obstructing the ends of the pipe; and providing any final restoration once lining operations are complete. When necessary, this shall also include providing expanded access by either staging construction of new storm drain structures or temporarily altering existing storm drain structures where the existing or new structure configuration will impede lining operations.

4. Provide any point repairs or other repairs necessary or required to repair or prepare the existing pipeline for CIPP lining. This shall include providing any grouting or cement slurry backfill of holes in the pipe or voids outside the pipe required prior to or after lining
5. Provide any final repair, testing &/or inspection of CIPP-lined pipes when additional work has been performed in or on those pipes by others subsequent to the completion of SAK's work.
6. Provide access to a high-volume water supply at the project site either from fire hydrants, or other high-volume on-demand sources, as designated by and coordinated with SAK. Access to the water source must be within 500 feet of the Installation site.
7. Provide access to appropriate dump sites at the project site for disposal of liquids and material collected from the pipelines during pipeline cleaning and lining operations and other waste materials from the project.
8. Provide access to a secure yard at or near site for staging and storage of equipment and materials, when available.
9. Provide all required notifications of agencies and other parties affected by the work. This shall include providing any necessary public relations work.
10. Obtain and pay for all special licenses, permits, variances, or other fees required to perform the work. The only exception to this is that SAK will obtain and pay for its own city &/or county business license(s), when required.
11. Subcontract bonds are not included. If subcontract bonds will be required, they can be provided for an additional fee of 1.5% of the bonded amount. Period of coverage for the bonds shall not exceed 1 year.

OTHER CONDITIONS:

1. Work covered by this proposal will be performed under a mutually agreed upon subcontract agreement which incorporates the terms and conditions contained in this proposal either by direct attachment, by insertion, or by reference. In case of conflict, the terms and conditions of this proposal shall prevail. The subcontract agreement shall not require either party to be liable to the other for consequential damages arising out of or relating to the subcontract or contract.
2. Work covered by this proposal will be performed under a mutually agreed upon project schedule. No material acquisition or mobilization will commence prior to the execution of a mutually agreed upon subcontract agreement. Once crews have been mobilized to site, work covered under this proposal must be able to proceed at an unrestricted pace without impediment or delay. If CIPP operations are delayed by the General Contractor or others, then standby costs &/or additional mobilization costs will be charged to the General Contractor accordingly.
3. This proposal is based on performing the CIPP lining work after an extended period of dry weather, so that flows in the storm drains are eliminated and a diversion or bypass is not required. If this is not the case, and work must be scheduled prior to the storm drains being in a dry condition, or if the storm drains never achieve a dry condition, then the General Contractor shall provide any necessary plugging, damming, diversion, and/or bypass pumping of existing pipeline flows, including providing any necessary dewatering of the pipelines, structures, and liner termination points once the plugs, dams, diversion, &/or bypass systems are in place and operating. Bypass or diversions systems shall be coordinated to accommodate SAK's lining operations and placed in a timely manner such that SAK's equipment and personnel are not obstructed by suction & discharge locations, and CIPP lining operations are not impeded or delayed.
4. Normal working hours for installing CIPP are 24-hours a day due to the nature of the product, which requires that once an install is started, it cannot be suspended until it is completed. To the extent that SAK will incur overtime expenses due to this schedule, those costs have been anticipated and are covered in this proposal. However, SAK will not be liable for any penalties, liquidated damages, overtime inspection costs, or other fees that may result from these required working hours.
5. Progress and final payments are due within 30 days of invoice, or when applicable regulations require, whichever is soonest. Release of any withheld retention shall be no later than 30 days from the completion and acceptance of the work covered under this proposal, excluding any subsequent work required in the warranty period, and regardless of whether the General Contractor's retention has been released by the Owner. If retention is not withheld from the General Contractor's payments, then retention shall not be withheld from SAK's payments. Overdue amounts will be subject to interest at a rate of 1.5% monthly, 18% annually.

6. This proposal covers only the scope of work specifically included above. It does not cover performing any cleaning or inspection of pipe or structures not specifically included above; warranty inspections or testing; verification of active/inactive status of laterals; alteration, repair, installation, or rehabilitation of manholes or other structures; abandonment of any pipe or structures; bypassing, plugging, damming, diversion, or dewatering of existing pipe flows or structures; pedestrian control, parking control, or traffic control; sampling or testing of the installed CIPP liner not specifically included above; sampling or testing of any substances or materials on the project not specifically included above; alteration, testing, sealing, repair, replacement, or rehabilitation of any lateral pipes or lateral connections, aside from any internal reinstatement specifically included above; grouting or repair of obstructions, voids, or defects in the host pipe prior to or after lining; mandrel testing or other similar testing of the pipe; or any work requiring excavation. This proposal also does not cover providing any field yards, meeting facilities, or office facilities for the project; phones, cameras, computer software, or computer equipment for the use of the General Contractor or Owner; photos or other documentation for record of pre- or post-construction site conditions; tree or vegetation clearing, trimming, removal, protection or restoration; snow &/or ice removal; handling, transportation, or disposal of hazardous materials; surveying or staking; engineered plans, designs, or drawings; preparation or implementation of any pollution control or environmental protection programs or plans; street sweeping; security; fire control truck and operator; fencing of any kind; erosion or sedimentation control; public relations work; project signs or advance notification signs; and any necessary archaeological, biological, or ground settlement / movement monitoring and mitigation. If any of this type of work is required to be performed by SAK, it will be considered to be extra work and charged accordingly.
7. For the purposes of this proposal, the General Contractor shall be defined to be the entity contracting with SAK to perform the work covered under this proposal.
8. This proposal is valid for 90 days from the date of submission as indicated above.

**SAK acknowledges receipt of ONE (1) addendum for this project**
