ABSL Construction will cold plane as close as possible to existing manholes, water valves, and other obstructions in cutting plane. Handwork and placing temporary asphalt tapers around these objects or at pavement edge for safety requirements are excluded.

Contractor to post streets with "No Parking" signs prior to subcontractor's phase of work, provide water or water meter and provide traffic control during cold planing operation. All areas to be ground shall be clearly marked by the general or the job inspector.

A minimum of two weeks notice is requested prior to move in.

Anything not specifically included in this price should be considered excluded.

ABSL Construction does not accept backcharges due to machine breakdown during operation above the machine's daily rental fee.

Back charges will only be based on the time the machine is broken and will reflect the cost of the equipment for that time. All others costs due to the equipment breakdown will not be charged to ABSL Construction.

All teeth over one complete set will be charge to the contractor.

ABSL does not accept force account rates or retention.

This quotation will be part of our contract or purchase order agreement and is valid till a new change of the rates.

**GRINDING JOB AGREEMENT**

The prices set forth above are based on the following assumptions and are subject to change under conditions set forth below.

- 1) A minimum daily rate is any part of an 8 hour day and overtime will be charged for work done other than a regular weekday shift.
- 2) Modification to the work may require a change in the quote.
- 3) Unless otherwise indicated the unit prices are based on ABSL performing all the work included on the proposal. If ABSL does not receive a contract for all the work, the unit prices are subject to adjustment.
- 4) The unit prices are based on the estimated quantities in the bid proposal. If the quantity of the item changes by 25% or more the unit price is subject to equitable adjustment.
- 5) All teeth over one complete set will be charge to the contractor.
- 6) Prices are good for 30 days from the date of this proposal, after that date the prices are subject to adjustment.
- 7) In the event there is an increase in the cost of fuel of more than \$0.50 per gallon during the performance of this contract, ABSL will be entitled to a \$75.00 per day fuel surcharge. The base cost of fuel shall be established on the bid date of the contract by reference to the Weekly Retail On-Highway Diesel Prices for California, as published by the U.S. Department of Energy on its web site at [www.tonto.eia.doe.gov/oog/info/wohdp/diesel.asp](http://www.tonto.eia.doe.gov/oog/info/wohdp/diesel.asp).
- 8) If ABSL cannot proceed with its work as scheduled due to others, standby time will be charged at the following rate: \$425.00 per hour.
- 9) Downtime for equipment becoming stuck in wet or muddy sub-grade conditions will be charged at a stand-by time rate until removed. Additional equipment required for removal will be charged at a time and materials basis.
- 10) This proposal to be attached and made part of any and all resulting contracts.
- 11) The above price does not include permits, fees, bonding, state or local taxes.
- 12) This is a proposal only for the purpose of establishing a price for work as outlined. In the event ABSL is the low bidder a formal contract or PO suitable to both parties shall be prepared and fully executed.
- 13) Repairs of damage to ABSL equipment due to unmarked or buried obstructions; i.e. valve boxes, manholes covers, concrete, steel fence posts, steel pipe or excessive depth asphalt will be billed at time and material for repairs.
- 14) Backcharges to ABSL must be communicated by contractor in a written notice within 72 hours from the time of occurrence for backcharges.
- 15) Unless otherwise agreed to in writing prior to start of work, payment is due and payable within 30 days of billing, and no retention to be withheld on payments.
- 16) All utilities within mill grade are to be located and marked by customer. It is the sole responsibility of the lessee or renter (customer) to follow the requirements of the regional notification center law pursuant to Article 2 (Commencing with Section 4216) of Chapter 3.1 of Division 5 of Title 1 of the California Government Code. Customer assumes sole responsibility for, and all subsequent liabilities coincident with following the requirements of the regional notification center law. Furthermore, customer agrees to be responsible for all damage to both utilities themselves and to our company's equipment by reason of ABSL equipment encountering unmarked utilities.
- 17) Items not specifically included are considered to be excluded. If you have any questions please call.

Thank You,

*Todd Wheeler*

Bid Date: 3/17/2015

To: Bidding Contractor

Project: US 395 Doyte

Contract No: 02-4G1404

The following is our bid on the above referenced project:

Item No.	Item Description	Quantity	Units	Unit Price	Extension
15	Centerline Rumble Strip (HMA, Ground-in Indentations)	560	Sta.	\$7.60	\$4,256.00
16	Shoulder Rumble Strip (HMA, Ground-in Indentations)	1,120	Sta.	\$7.60	\$8,512.00
Misc	Mobilization	1	LS	\$1,000.00	\$1,000.00
					<b>\$12,768.00</b>

#### Scope of Work

- Items 15 and 16 includes milling of rumble strips.
  - Approximately (5) days to complete.
  - Excludes any vacuum and/or clean up of milled debris.
  - Contractor to provide layout of start/stop locations and continuous guideline.
  - Contractor to provide cleaning of area prior to milling.
  - Excludes fog seal, etc.
  - Minimum 4-foot shoulder required.
  - Due to typically being one of the last operations, DCC not liable for LD's or other costs associated.
  - Delays due to improper layout or other issues not DCC related will be charged at \$300 per hour.
  - Overlays ending near rumble strip locations will create inconsistent rumble strips. DCC not liable for this condition.
  - Some superelevations on roadway or radius will cause rumble machine drum to slide off-line. DCC not liable for any maintenance or remediation required to repair pavement including re-striping and traffic control.
- Item Misc. includes (1) mobilization to/from jobsite.
  - Item to be paid in full on our first pay estimate.
  - Extra move-ins @ \$200 per move-in

#### General Stipulations

- Contractor to provide a secured storage yard for our vehicles and materials within (5) miles of project.
- Contractor to provide all traffic control, flagging, etc. (may entail T.C. in both directions simultaneously)
- Contractor to provide written schedule (1) month in advance of our scheduled work. Any changes within this (1) month schedule may result in the inability for DCC to commit to the revised schedule. DCC not liable for this possible re-commitment.
- Contractor to provide sandbagging of all inlets, drains, gutters, etc. and all SWPPP constraints.

**Quotation**

Project: CA DOT, Project No. 02-4G1404, Rt. 395, Lassen County  
 Quantity: Item 028644 – 1,120 stations (approx. 112,000 cuts) of asphalt Shoulder Rumble Strips  
 Item 028643 – 560 stations (approx. 56,000 cuts) of asphalt Centerline Rumble Strips

**Construction Time: 11 hours****Mobilization: \$8,990.00****Unit Price: \$7.00 per station x 1,120 stations = \$7,840.00****Unit Price: \$7.00 per station x 560 stations = \$3,920.00****Total: \$20,750.00 (approx.)**

**Note: This quotation is based on daylight work hours, unless otherwise stated. Please contact SPT if you would like a quotation for night shift work hours.**

The above unit prices **include:**

- 1) The labor and equipment necessary to mill-in approximately 1,120 stations of asphalt shoulder + 560 stations of asphalt centerline rumble strips on the CA DOT project; SPT's rumble strips are the standard 7-inch x 16-inch rectangular cuts.

The above unit prices **exclude:**

- 1) Traffic control, flaggers, impact attenuators, arrowboards or any other maintenance and protection of traffic items other than revolving beacons on SPT trucks. The travel lane adjacent to the shoulder must be closed to install the shoulder rumble strips;
- 2) The clean-up of the debris from the shoulder/road surface.
- 3) The milling of rumble strips in areas not accessible to our equipment or areas SPT deems unsuitable for cutting rumble strips;
- 4) Layout. The contractor must provide a continuous pavement marking stripe on the edge of the shoulder and on the centerline that is visible to our operator. The layout and alignment of the cuts will mirror this stripe. Start and stop points must also be clearly marked by the General Contractor.
- 5) Union concessions on behalf of SPT's non-union employees.

Service charge of 1 1/2% per month (minimum charge .50), which is an annual rate of 18%, added to past due balance, plus reasonable collection and/or attorneys fees if required.

[www.rumblestrips.com](http://www.rumblestrips.com)

- 6) Payment & Performance Bonds. SPT's bond cost is 1.55 percent with a \$100.00 minimum.
- 7) Mobilization. A mobilization charge of \$8,990.00 lump sum will be charged in addition to the unit prices as shown above. A single mobilization is based on uninterrupted construction from the time of arrival.
- 8) Fog Seal. Some states require that the contractor spray the rumble strip with a protective oil sealant. This quotation does not include fog seal materials nor the labor and equipment for the application thereof.
- 9) TERO taxes, fees, licenses or hiring, if required.

Pricing excludes general contractor association dues, gross receipt taxes, or additional charges passed on by the general contractor.

**Please note:** This quotation is for both the asphalt shoulder rumble strip item and the asphalt centerline rumble strip item on this project. The pricing for the asphalt centerline rumble strip item is not valid unless SPT is also awarded the asphalt shoulder rumble strip item as well. Both items are to be completed under the same single mobilization.

#### **Schedule of Operations:**

This quotation is based on a single mobilization and a construction schedule that will allow SPT to mill in rumble strips for a minimum of 8 hours per shift after traffic control setup. SPT estimates that it will take us 11 hours to install 1,120 stations + 560 stations of rumble strips on this project. Please note that SPT is capable of milling up to 25 miles of rumble strips during each shift and expects the general contractor to provide sufficient lane closures and brooming to meet this daily production.

If SPT cannot construct this project as quoted (i.e. within the number of mobilizations included, and/or according to the work hours and construction shifts described above) please notify us so we may re-quote this project.

Thank you for the opportunity to quote on this project. We look forward to the opportunity of working with your company. If you have any questions regarding this quotation or SPT, please contact me at 717-697-1450.

Sincerely,  
SURFACE PREPARATION TECHNOLOGIES

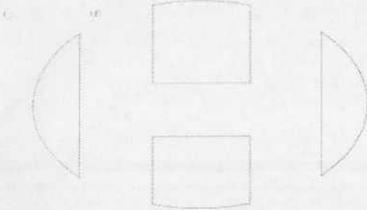

John Holbert

Please note: SPT will honor this quotation for 30 days after the bid date.

**\*By submitting a subcontract to SPT for work on this project, the Contractor agrees to the terms of this quotation and thereby incorporates them into and as part of said subcontract, unless a corporate officer of SPT approves changes to this quotation in writing on SPT's letterhead. The terms and conditions of this quotation will supersede any conflicting terms of said subcontract.**

Service charge of 1 1/2% per month (minimum charge .50), which is an annual rate of 18%, added to past due balance, plus reasonable collection and/or attorneys fees if required.

HMA

Trinity Engineering Laboratories is pleased to present our proposal and cost estimate for the Quality Control services on this very important project. Our detailed scope of work and cost estimate outlined below is for Hot Mix Asphalt Quality Control and Data Core.

#### Hot Mix Asphalt Quality Control

Trinity Engineering Laboratories experience and understanding of the Caltrans Section 39 Hot Mix Asphalt and this project specifications will be a tremendous asset to your project team. We have developed our cost per shift to be all inclusive, encompassing everything required by the project specifications. Key points of these specifications include:

\* The project is constructed under the Standard process which does not requires the testing of the HMA for moisture sensitivity per CTM 371/Hamburg every 10000 tons.

Trinity Engineering Laboratories management staff has over 25 years combined experience with Caltrans QC/QA programs. A key member of our management staff was one of the steering committee members for the development of the Caltrans QC/QA / Superpave specification and is involved with the refinement of the specifications. Our accumulated experience, combined with our commitment to value added engineering, makes us the premier provider of quality control services on Caltrans projects. The size of our firm and the resources we have available will allow us to staff your project with experience and qualified personnel, all of whom have worked over 100 QC/QA projects in the last few years.

\*Job Mix Formula & Verification testing are assumed to be done by supplier

\*A field inspector and field technician will be utilized to obtain the required samples and test compaction in the field per special provisions.

\*If a plant laboratory is required, power will be provided by the production facility

\*Data Cores will be obtained at the shift rate for 8-hour shifts

\*Core Holes will be patched by contractor

\* Density coring will be perform the following shift at the daily rate, if needed the same  
For your convenience, we have provided two estimate options for the field quality control services; Option 1) excludes Plant QC services when provided by the HMA supplier, but still includes; Density and theoretical maximum densities performed on the HMA mix samples and Option 2) includes plant QC, QC testing required for the plant.  
Option 3) includes field crews and no plant technician and no required cost..

We wish your company success and look forward to talking to you soon. If you have any questions regarding our submittal, feel free to contact us at (559) 260-6841 or (559) 392-8776. Our project leader email is markhorn@sbcglobal.net or web site:

Scope of Work for Hot Mix Asphalt Quality Control Using the Quality Control/ Quality Assurance Process	
<p><b>Assumptions: Trinity Engineering Laboratories is pleased to have the opportunity to propose to your company our unsurpassed Hot Mix Asphalt Quality Control Testing and Inspection services. Our cost estimate is based on the total tonnage of Hot Mix Asphalt and the estimated daily tonnage broken down separately for week day/night shifts and Saturday day/nights shifts. Our services are directly related to the production schedule of the contractor and the project total tonnage. Our total estimate may increase or decrease based on production rates and/or project tonnage. Services are provided as per shift estimates and are inclusive of all field inspection, field testing, laboratory testing and typical engineering support needed for this project.</b></p>	
<p><b>Trinity Eng. does not guarantee the performance of the contractor by performing these services. Trinity Eng. performance of these services shall not relieve the contractor of his obligation to perform work in conformity with the drawing and specifications.</b></p>	
Assumptions	
<p>We propose to utilize a laydown inspector and field technician to perform the field inspection, pull the required samples in the field, monitoring and obtaining cores required for density determination.</p>	
<p>We assume the material supplier will provide the mix design, JMF verification, plant inspection, sieve analysis, Sand Equivalent and oil contents during production (option1)</p>	
<p>Trinity Engineering will perform the Production Start up Evaluation, theoretical maximum densities, Tensile Strength Ratios and Air Voids. Trinity Engineering will also obtained and prepare the Density Cores.</p>	
<p>Trinity Engineering Laboratories will provide Straight Edge testing services according to the Special Provision. Hard and electronic copies will be provide to your company. Data/Density Coring operation will be done after the production as per the special provision. The contractor is responsible for traffic control. If operations are outside of the normal production for either Data/Density coring or straight edge testing, the hourly rates change to a two man crew at \$250.00 per hour. Data Coring price is based on the assumption of moving traffic control. If traffic control impedes the coring operation, then additional cost could occur.</p>	
<p>0-4 hours billed at 4 hours                  4-6 hours billed at 6 hours                  6-8 hours billed at 8 hours                  *Shift rate divided by 8 hours is the hourly rate</p>	
<p>Our cost are based strictly on the construction schedule assumptions presented herein. Any additional testing requested, changes in the construction schedule or change to the presented assumptions will affect our costs, which will require that the above estimated costs be revised accordingly. Overtime costs for Saturday and Sunday shifts will be multied by 1.35 and 1.6, respectively. If lime treatment occurs on a non scheduled paving day, the required quality control testing for lime treated aggregates willed be billed at \$ 1100.00 per shift. If paving exceed 8 hours per shift, each additional(option 1) will be billed at \$225 up to 10 hrs. thereafter \$ 275.00. If paving exceeds 8 hours per shift, each additional (Option2) hour will be billed at \$350.00 up to 10hours and \$ 450 thereafter.</p>

Here's our proposal to provide a baseline schedule and update per the specifications:

Develop a baseline schedule	\$ 835
<u>1 monthly update @ \$150 each</u>	<u>150</u>
Total	\$ 985

Clarifications:

1. Hat Creek provides:
  - a. Original estimate for reference, if needed.
  - b. The Schedule of Values, if needed.
2. Hat Creek's PM/Superintendent provides detailed construction methodology.
3. All work product is provided electronically.
4. No retention to be withheld from payments.
5. Deduct \$150 if monthly update not needed.

Good luck with the bid,
