 Services offered: Moxie 1800 - Moxie 1800 admixture is an inorganic,
 chemically reactive, complex catalyzed silicate that initially forms an
 integral colloidal gel membrane prior to initial set. The colloidal gels
 eliminate the formation of capillary pathways for bleed water, restrict
 the rapid evaporation of surface water, prevent shrinkage cracking and
 slab curl as well as behaves like an integral curing compound. In
 addition, the gels create a corrosion inhibiting barrier around
 reinforcing steel while serving as a thermal barrier in the concrete
 during the curing process

9. Include additional data to support a demonstration of good faith efforts.

Myers has created a DBE LinkedIn group that DBE's, Contractors and other agencies are now using to promote opportunities. You may verify this information at the following link, <https://www.linkedin.com/grp/home?gid=8133837&sort=RECENT> . We attend several DBE outreach meetings put on by Caltrans and other agencies during the year and we have a section of our website dedicated to DBE/SBE/DVBE firms, <http://www.myers-sons.com/pages/dbesbedvbe-outreach>.
