Dear Mr. Baltrons,

Re: *Inclinometer & Piezometer Destructions*
Moraga Ave Slope Repair Project, Hwy 13 Site, Oakland, CA

Further to our telephone conversation of today, this letter provides you with our prices for providing instrument destruction services near Oakland, CA.

SCOPE OF WORK

The current scope of site investigation works is to consist of the following:

-Destroy seven (7) 2.75" Inclinometers from 48 to 58' in depth, estimated 370' total.

-Destroy one (1) 2.75" Inclinometer to 50' in depth (SB-12)

-Destroy five (5) 2" Sch. 40 PVC Piezometers from 50 to 60' in depth, estimated 260' total.

In consultation with Alameda County the seven inclinometers from 48 to 58' in depth can be pressure grouted with neat cement grout after which the upper 5' of the casing will be removed. Because SB-12 was not documented during its destruction casing must be removed (by drill out) to 50' in depth after which boring will be tremie grouted with neat cement grout. Because the five standpipe piezometers where installed in a 3" OD boring piezometers must be destroyed by drill out. We assume work can be performed during normal working hours between 7:00 AM to 5:00 PM, all instrument locations are accessible to truck mount drill equipment, others are responsible for traffic control and encroachment permits. Drill spoils will be contained in 55 gallon drums and drums will staged off site each night. Others are to provide staging area for

equipment and drums storage pending analysis for disposal. All drill out borings will be larger than 3" in OD. Surfaces will be patched with alike material. Work of this task order will be performed by members in good standing with Operating Engineers, Local 3. This estimate includes prices for Alameda County well destruction permits, inspection fees, prevailing wages and certified payroll.
