CERTIFICATE EXPIRATION DATE: 12-31-2015

The Supplier Clearinghouse for the Utility Supplier Diversity Program of the California Public Utilities Commission hereby certifies that it has audited and verified the eligibility of:

***KRC Safety Co., Inc.  
of Visalia, California as a MBE***

pursuant to Commission General Order 156, and the terms and conditions stipulated in the Verification Application Package. This Certificate shall be valid only with the Clearinghouse seal affixed hereto.

Eligibility must be maintained at all times, and renewed within 30 days of any changes in ownership or control. Failure to comply may result in a denial of eligibility. The Clearinghouse may reconsider certification if it is determined that such status was obtained by false, misleading or incorrect information. Decertification may occur if any verification criterion under which eligibility was awarded later becomes invalid due to Commission ruling. The Clearinghouse may request additional information or conduct on-site visits during the term of verification to verify eligibility.

This certification is valid only for the period that the above named firm remains eligible as determined by the Clearinghouse. Utility companies may direct inquiries concerning this Certificate to the Clearinghouse at 800-359-7998 in Los Angeles.

MCK Services Inc.  
Attention: John Moffat

Subject: Estimate Proposal for  
Hot Mix Asphalt Quality Control Inspection and Testing  
Caltrans Contract: 04-3U4304  
Route 680, Alameda County, CA

John,

We have prepared a cost estimate for performing Quality Control Testing (Standard Process) of the Hot Mix Asphalt (HMA-A) for the subject project in accordance with the special provisions dated March 18, 2013.

The estimated costs presented on the following page are based on:

- Regular, 8 hour weekday shifts of HMA-A (2,110 Tons)
- Production Start-up Evaluation
- QC plan
- Data Cores

Our costs are based on the following:

- We propose to utilize a field technician to pull the required samples in the field, monitor in place density and obtain the required cores for density determination.
- We assume the material supplier will provide the following: Job Mix Formula, Job Mix Formula Verification, plant inspection, sieve analysis, sand equivalents and oil contents during production.
- We propose that RMA Group will perform the Production Start-up Evaluation, theoretical maximum densities, tensile strength ratios and Hveem stabilities at our Rancho Cordova facility.
- We assume traffic control will be provided for the data coring.

The following is the summary of our estimated costs, which were calculated using the scope of work and construction duration assumptions presented herein:

**FIXED COSTS:**

	Qty.	Unit	Unit Cost	Total
Production Start-up Evaluation	1	Each	\$1,000.00	\$1,000.00
Quality Control Plan	1	Each	\$800.00	\$800.00
Prepaving Meeting	1	Each	\$500.00	\$500.00
Data Cores	1	Each	\$5,000.00	\$5,000.00
<b>Subtotal Fixed Costs</b>				<b>\$7,300.00</b>

**PRODUCTION COSTS: 8HR PLACEMENT**

	Qty.	Unit	Unit Cost	Total
1 QC Field Technician (Weekday)	4	Shifts	\$1,437.00	\$ 5,748.00
<b>Subtotal Production Costs</b>				<b>\$ 5,748.00</b>

**ADDITIONAL ESTIMATED COSTS:**

	Qty.	Unit	Unit Cost	Total
Hveem Stability Tests (2 Per 5 Days/1 Per 4000 Tons)	3	Tests	\$225.00	\$ 675.00
Theoretical Maximum Density Tests	3	Tests	\$195.00	\$ 585.00
<b>Subtotal Estimated Costs</b>				<b>\$ 1,260.00</b>

**Total Estimated Costs \$ 14,308.00**

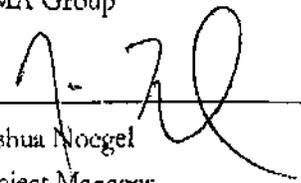

Our costs are based strictly on the construction schedule assumptions presented herein. Any additional testing requested or change in the construction schedule will affect our costs, which will require that the above estimate be revised accordingly. Any changes to the presented assumptions will require that the estimated per shift costs be revised and adjusted as necessary.

RMA Group does not guarantee the performance of the contractor(s) by performing these services. RMA Group's performance of these services shall not relieve the contractor(s) of his obligation to perform the work in conformity with the drawings and specifications and in a workmanlike manner; shall not make RMA Group an insurer of the contractor's performance; and shall not impose on RMA Group any obligation to see that the work is performed in a safe manner.

Dense/ Open Graded Asphalt Concrete (Type A and O )

Trinity Engineering Laboratories is pleased to present our proposal and cost estimate for the Quality Control services on this very important project. Our detailed scope of work and cost estimate outlined below is for Hot Mix Asphalt Quality Control and Data Core.

#### Hot Mix Asphalt Quality Control

Trinity Engineering Laboratories experience and understanding of the Caltrans Section 39 Hot Mix Asphalt and this project specifications will be a tremendous asset to your project team. We have developed our cost per shift to be all inclusive, encompassing everything required by the project specifications. Key points of these specifications include:

\* The project is constructed under the Standard process which does not require the testing of the HMA for moisture sensitivity per CTM 371 every 5000 tons.

Trinity Engineering Laboratories management staff has over 20 years combined experience with Caltrans QC/QA programs. A key member of our management staff was one of the steering committee members for the development of the Caltrans QC/QA specification and is involved with the refinement of the specifications. Our accumulated experience, combined with our commitment to value added engineering, makes us the premier provider of quality control services on Caltrans projects. The size of our firm and the resources we have available will allow us to staff your project with experience and qualified personnel, all of whom have worked over 75 QC/QA projects in the last few years.

We are proposing to service this project utilizing our Caltrans and AASTHO certified laboratories. These locations will provide critical quality control data in a proactive, timeliness and efficient manner. All of the reports are electronically transmitted to your project team and the AC Pay programs are managed by our QC Management team. Our detailed scope of work and cost proposal can be viewed in Table 1.

For your convenience, we have provided two estimate options for the field quality control services; Option 1) excludes Plant QC services when provided by the HMA supplier, but still includes; Hveem stabilities and theoretical maximum densities performed on the HMA mix samples and Option 2) includes plant QC, QC testing required for the plant. Data Cores and Profilograph testing is also proposed as a per shift cost.

We wish your company success and look forward to talking to you soon. If you have any questions regarding our submittal, feel free to contact us at (559) 260-6841 or (559) 392-8776. Our project leader email is markhorn@sbcglobal.net or web site: [www.trinityengineeringlaboratories.com](http://www.trinityengineeringlaboratories.com)

**Scope of Work for Hot Mix Asphalt Quality Control Using the Quality Control/ Quality Assurance Process**

**Assumptions:** Trinity Engineering Laboratories is pleased to have the opportunity to propose to your company our unsurpassed Hot Mix Asphalt Quality Control Testing and Inspection services. Our cost estimate is based on the total tonnage of Hot Mix Asphalt and the estimated daily tonnage broken down separately for week day/night shifts and Saturday day/nights shifts. Our services are directly related to the production schedule of the contractor and the project total tonnage. Our total estimate may increase or decrease based on production rates and/or project tonnage. Services are provided as per shift estimates and are inclusive of all field inspection, field testing, laboratory testing and typical engineering support needed for this project. Trinity Engineering Laboratories is non-union.

**Assumptions**

**We propose to utilize a laydown inspector and field technician to perform the field inspection, pull the required samples in the field, monitoring and obtaining cores required for density determination.**

**We assume the material supplier will provide the mix design, JMF verification, plant inspection, sieve analysis, Sand Equivalent and oil contents during production (option1)**

**Trinity Engineering will perform the Production Start up Evaluation, theoretical maximum densities, Tensile Strength Ratios and Hveem stabilities. Trinity Engineering will also obtain and prepare the Density Cores.**

**Trinity Engineering Laboratories will provide profilograph/Straight Edge testing services according to the Special Provision. Hard and electronic copies will be provide to your company. Data/Density Coring operation will be done after the production as per the special provision. The contractor is responsible for traffic control and asphalt patching from core holes. If operations are outside of the normal production for either Data/Density coring or profilograph testing, the hourly rates change to a two man crew at \$210.00 per hour. Data Coring price is based on the assumption of moving traffic control. If traffic control impedes the coring operation, then additional cost could occur.**

**The following is a summary of our estimated services, based on the scope of work and construction assumptions presented herein:**

<b>Fixed Costs:</b>				
	<b>Qty.</b>	<b>Unit</b>	<b>Unit Cost</b>	<b>Total</b>
A. QC/QA manual	1	Each	\$500	\$500
B. Mix Verification (split from Caltrans) (if needed)	1	Each	\$0	\$0
C. Start up Evaluation	1	Each	\$600	\$600
D. Tensile Strength Ratio (TSR); One on the first day of production and one test every 10000 tons during production. (Type A and G only) if <15% rap, if needed	1	Each	\$1,350	\$1,350
E. Mix Design( including aggregate quality testing ) if needed	1	Each	\$5,000	\$5,000
F. Data Cores ( one data core every half mile) traffic control provided by Contractor	1	LS	\$6,500	\$6,500
G. Hamburg Test (every 10,000 tons )if use more than 15% Rap, if needed	1	Each	\$1,950	\$1,950
H. Project meeting (Caltrans/County)	1	Each	\$350	\$350
<b>Subtotal Fixed Costs \$</b>				<b>\$11,250</b>

If plant technicians are needed, please call.

\* If additional technician is needed, rates are \$ 88.00 per hour (if Caltrans requires or contractor requests)  
Assumption all paving will be done on 1st shift.

Laboratory and technicians are fully certified in all required tests.

Trinity Engineering Laboratories is a Certified Small Business. Supplier Number:1269800  
if project continues after June 30, 2013,2014 and 2015, an increase of 6% per year is added due to pre-vailing requirements.  
Additional insurance requirements will be at cost of the requirement.  
The production cost includes one inspector/ tester.

The daily shift rates includes all of the test required for the options choices.

This section includes all costs associated with HMA production Quality Control requirements as indicated in the Caltrans Specification Section 39-4 dated June 5, 2009 and the Caltrans Quality Assurance Manual. All special provision criteria specific to this project is also included. The information below is per shift costs and based on the indicated numbers of the weekday shifts of HMA placement at an anticipated daily production of approximately 100-4500 tons per shift, the night shift rates are listed below. The per shift cost is based on a 8-hour production shift. If production exceeds 8-hours, overtime will be billed at 1.5 x the shift rate from 8-12 hours and 2.0 x the shift rate for double time thereafter. Second shift rate is 14.5% x the approximate shift rate.

Production Costs:		Qty:	Unit	Unit Cost	Total
Weekday Production Shift (Type A, B, O or G) Option 1)	In addition to the section above description includes; Maximum theoretical densities, stabilometer, air voids and density determination	1	Shift	\$1,278	\$1,278
Night Production Shift (Type A, B, O or G) (option 1)	In addition to the section above description includes; Maximum theoretical densities, stabilometer, air voids and density determination	1	Shift	\$1,463	\$1,463
Weekday Production Shift (Type A, B, O or G) (option 2)	In addition to the section above description includes; all plant testing and inspection required as per the special provisions.	1	Shift	\$2,003	\$2,003

**Subtotal Estimated Costs:**

Profilograph (high Speed) and Data Core Costs:		Qty.	Unit	Unit Cost	Total
Weekday Production Shift (pre profile)	Profilograph (Straight Edge/ marking out Testing Lump Sum per 8-Hour shift. (if needed) AC or CIPR Only	1	Shift	\$1,800	\$1,800
Weekday night/Saturday Production Shift	Profilograph (Testing Lump Sum per 8-Hour Saturday/ night shift. (if needed)	1	Shift	\$1,832	\$1,832
Data Core (does not include traffic control or patching of core holes)	as per special specifications	1	Lump Sum	\$6,500	\$6,500

\* Data Core Lump Sum price is for the total of all coring for the Data Core unit bid.

### Proposal to Provide Scheduling Services

Project: **Cold Plane Existing Asphalt Concrete Pavement And Place Hma-o**

Owner: Caltrans

We would like to take the opportunity to provide this Proposal for Professional Scheduling Services for the above-mentioned project. As much as possible, we have based our estimated scope of services on our review of the project plans and specifications made available, as well as previous experience with similar projects. **Bear3 Consultants LLC is a Certified Small Business.**

**Project Scope, As We Understand It:**

Includes but not limited to - In Contra Costa County In Walnut Creek And Pleasant Hill From Rudgear Road Undercrossing To 0.2 Mile South Of Monument Boulevard Undercrossing

Project Duration: 100 Working Days  
 Specification Sections: 013200 Typical

**Proposed Scheduling Services Options:**

Option 1	<b>Provide Professional Scheduling Services - Labor Only</b> <i>Creation of the Preliminary and Baseline Schedule using Client &amp; Subcontractor participation in proposed Planning Meetings via web-conferencing, and Maintenance of the Schedule and Reports for the duration of the project. Excludes Travel, Production, Shipping, and Direct Costs:</i>	<b>\$10,239</b>
Option 2	<b>Provide Professional Scheduling Services - Full Service</b> <i>Creation of the Preliminary and Baseline Schedule using Client &amp; Subcontractor participation in proposed Planning Meetings, Maintenance of the Schedule and Reports - 1 Site Visit per month for the duration of the Project. - Includes all Travel, Production, Shipping, and Direct Costs:</i>	<b>\$29,233</b>
Option 3	<b>Provide Professional Scheduling Services - Baseline Schedule Only</b> <i>Creation of the Preliminary and/or Baseline Schedule, using Client &amp; Subcontractor participation in proposed Planning Meetings, Basic Maintenance Training for Key Personnel remotely, and Turn Over of Schedule for Maintenance by the Client: - Includes all Travel, Production, Shipping, and Direct Costs</i>	<b>\$10,184</b>

This Proposal assumes that we are building a new schedule only. Additional costs may incur if we are asked to repair, change, and/or take over an existing or partially completed schedule. Bear3 Consultants LLC does not accept responsibility for a project being behind schedule. The Client is responsible for all costs associated with any required schedule resubmittals, except to the extent that such resubmittal is due to error on the part of Bear3 Consultants, LLC. Schedule Analysis and Training Services are also available.

Please feel free to call if you should have any questions, need additional information, or need a revised proposal to meet specific needs. I can be reached at (661) 721-7567 or cell phone (661) 229-3218.

Respectfully submitted:
