- 1 = Preparation of the SWPPP document is intended to meet Caltrans requirements. Formal SWPPP amendments will be completed as a separate task on a time and materials basis, if required. A detailed project construction schedule will be provided for use in BMP scheduling. Design plans (electronic), project description, and other pertinent information will be provided by Client. SWPPP monitoring and reporting by Rincon will occur for the anticipated 240 working days (estimated 48 weeks). The project work week will be Monday through Friday, minus Federal holidays. If weekends are required, the additional work can be completed on a time and materials basis. Client will be responsible for SWPPP implementation. This scope of work and cost estimate assumes Rincon's QSD will act as the project Water Pollution Control Manager throughout the duration of the project and includes time for QSD management and oversight. If the scope of work is modified, the cost estimate would need to be revised to account for the QSD management and oversight of the project. If additional oversight of the project is required, the additional work can be completed on a time and materials basis.
- 2 = Assumes 240 working days (48 weeks) construction schedule
- 3 = Assumes no raptors will be found and no nest monitoring will be required.
- 4 = Required during initial ground disturbance, placement and removal of falsework footings, dewatering activities, demolition, and any activities that have the potential to impact the river channel
- 5 = This rate is to develop the program only. Rincon biologists will conduct trainings when on site for weekly inspections. If additional trainings are required, they will be completed as a separate task on a time and materials basis.

Excluding fees for Initial Construction Monitoring, the total for Bid Item 22 is \$33,594. The Initial Construction Monitoring is required during initial ground disturbance, placement and removal of falsework footings, dewatering activities, demolition, and any activities that have the potential to impact the river channel. We have identified a day rate of \$995 for these activities. We recommend you create an estimate for Initial Construction Monitoring based on your proposed schedule for the activities mentioned above, multiplied by our day rate. This will allow you to estimate a total for Bid Item 22. Our intent with this method is to give you the greatest flexibility and avoid overestimating the number of days you would require biological monitoring.

We look forward to working with you on this exciting project. If you have any questions regarding our submittal, please feel free to contact us.

Sincerely,
RINCON CONSULTANTS, INC.
