Twining will provide profilograph testing services utilizing the SSI-COX California profilograph system. The profilograph is equipped with Windows data collection and analysis software featuring bi-directional data collection. Twining will provide a real time display of current and past segment profile indices, as well as must grind bumps or dips. In addition, we will provide printed strip charts for each section profile. The profilograph is equipped with adjustable filtering parameters in either English or metric units to accommodate the project specifications. Twining will use a California Profilograph in accordance with California Test 526. We will perform profiling along each wheel path of the newly constructed asphalt pavement to provide you with the actual pavement roughness index (PRI). Must grind bumps or dips will also be identified for potential grinding performed by others. After each phase is profiled, we will provide you with the strip chart print outs and a digital copy of the results.

Project Total QC Estimate (Field Testing Only, Plant Testing Provided By The Supplier):	\$ 23,629.00
--	---------------------

Limitations:

In accordance with the Caltrans Quality Control Quality Assurance Manual Caltrans District 6 has been requiring the contractor to provide an additional on-site inspector during production rates of 1500 tons or greater. The lump sum per shift rate of the additional inspector for 8 hour shift is \$1200.00. Caltrans District 6 has not been consistent with this requirement. This Lump sum rate is not included in the project total QC estimate.

Our services will be provided on a time-and-expense basis in accordance with the hourly rates quoted for pre-production testing, mix designs, and pavement curing. Our services will be charged Lump Sum per shift during production for each shift of asphalt concrete placement. If production exceeds the estimated 8 hour paving shift, an additional charge will be applied at the overtime factors identified below.

Twining, Inc. is signatory to the Operating Engineers Local 12. Overtime, if incurred, will be billed at 1.35X the standard rate for time in excess of 8 hours during one day and for Saturday work. Work in excess of 12 hours and that which is performed on Sundays and holidays will be billed a 1.8X the standard rate. The rates will remain in effect throughout the duration of this project with the exception of the union inspector rate, which will increase August 2013 by \$2.35 and each August thereafter. Based upon the construction schedule you have provided, we have attempted to be realistic in our estimates. Please note that we provide our services in conjunction with the construction schedule. Any change in the number of days or hours per day will impact our budget. We will attempt to coordinate our services with your project manager to efficiently service the project.

QUALITY CONTROL INSPECTION & TESTING

Our costs are based strictly on the construction schedule assumptions presented herein. Any additional testing requested, changes in the construction schedule, or changes to the presented assumptions will affect our costs, which will require that the above estimated costs be revised accordingly. If lime treatment occurs on a non scheduled paving day, the required quality control testing for lime treated aggregate will be billed at \$1,250 per shift. Overtime costs for Saturday and Sunday shifts will be multiplied by 1.4 and 1.7, respectively. If paving exceeds 8 hours per shift, each additional (Package 1) hour will be billed at \$250 up to 10 hours and \$300 thereafter. If paving exceeds 8 hours per shift, each additional (Package 2) hour will be billed at \$380 up to 10 hours and \$500 thereafter. If a field laboratory facility is required, the mobilization charge will be \$3,500 and monthly rental will be \$750.
