Dense / Gap Graded Asphalt Concrete (Type A and G)

Trinity Engineering Laboratories is pleased to present our proposal and cost estimate for the Quality Control services on this very important project. Our detailed scope of work and cost estimate outlined below is for Hot Mix Asphalt Quality Control and Data Core.

#### Hot Mix Asphalt Quality Control

Trinity Engineering Laboratories experience and understanding of the Caltrans Section 39 Hot Mix Asphalt and this project specifications will be a tremendous asset to your project team. We have developed our cost per shift to be all inclusive, encompassing everything required by the project specifications. Key points of these specifications include:

\* The project is constructed under the Standard process which does not requires the testing of the HMA for moisture sensitivity per CTM 371 every 5000 tons.

Trinity Engineering Laboratories management staff has over 20 years combined experience with Caltrans QC/QA programs. A key member of our management staff was one of the steering committee members for the development of the Caltrans QC/QA specification and is involved with the refinement of the specifications. Our accumulated experience, combined with our commitment to value added engineering, makes us the premier provider of quality control services on Caltrans projects. The size of our firm and the resources we have available will allow us to staff your project with experience and qualified personnel, all of whom have worked over 75 QC/QA projects in the last few years.

We are proposing to service this project utilizing our Caltrans and AASTHO certified laboratories. These locations will provide critical quality control data in a proactive, timeliness and efficient manner. All of the reports are electronically transmitted to your project team and the AC Pay programs are managed by our QC Management team. Our detailed scope of work and cost proposal can be viewed in Table 1.

For your convenience, we have provided two estimate options for the field quality control services; Option 1) excludes Plant QC services when provided by the HMA supplier, but still includes; Hveem stabilities and theoretical maximum densities performed on the HMA mix samples and Option 2) includes plant QC, QC testing required for the plant. Data Cores and Profilograph testing is also proposed as a per shift cost.

We wish your company success and look forward to talking to you soon. If you have any questions regarding our submittal, feel free to contact us at (559) 260-6841 or (559) 392-8776. Our project leader email is markhorn@sbcglobal.net or web site: [www.trinityengineeringlaboratories.com](http://www.trinityengineeringlaboratories.com)

Trinity Engineering Laboratories, Inc.  
Clovis, Ca 93619

**Scope of Work for Hot Mix Asphalt Quality Control Using the Quality Control/ Quality Assurance Process**

**Assumptions:** Trinity Engineering Laboratories is pleased to have the opportunity to propose to your company our unsurpassed Hot Mix Asphalt Quality Control Testing and Inspection services. Our cost estimate is based on the total tonnage of Hot Mix Asphalt and the estimated daily tonnage broken down separately for week day/night shifts and Saturday day/nights shifts. Our services are directly related to the production schedule of the contractor and the project total tonnage. Our total estimate may increase or decrease based on production rates and/or project tonnage. Services are provided as per shift estimates and are inclusive of all field inspection, field testing, laboratory testing and typical engineering support needed for this project. Trinity Engineering Laboratories is non-union.

**Assumptions**

**We propose to utilize a laydown inspector and field technician to perform the field inspection, pull the required samples in the field, monitoring and obtaining cores required for density determination.**

**We assume the material supplier will provide the mix design, JMF verification, plant inspection, sieve analysis, Sand Equivalent and oil contents during production (option1)**

**Trinity Engineering will perform the Production Start up Evaluation, theoretical maximum densities, Tensile Strength Ratios and Hveem stabilities. Trinity Engineering will also obtained and prepare the Density Cores.**

**Trinity Engineering Laboratories will provide profilograph/Straight Edge testing services according to the Special Provision. Hard and electronic copies will be provide to your company. Data/Density Coring operation will be done after the production as per the special provision. The contractor is responsible for traffic control and asphalt patching from core holes. If operations are outside of the normal production for either Data/Density coring or profilograph testing, the hourly rates change to a two man crew at \$210.00 per hour. Data Coring price is based on the assumption of moving traffic control. If traffic control impedes the coring operation, then additional cost could occur.**

**The following is a summary of our estimated services, based on the scope of work and construction assumptions presented herein;**

Fixed Costs:	Qty.	Unit	Unit Cost	Total
A. QC/QA manual	1	Each	\$500	\$500
B. Mix Verification (split from Caltrans) (if needed)	1	Each	\$650	\$650
C. Start up Evaluation	1	Each	\$650	\$650
D. Tensile Strength Ratio (TSR); One on the first day of production and one test every 5000 tons during production. (Type A and G only)	0	Each	\$550	\$0
E. Mix Design( including aggregate quality testing ) if needed less than 15% rap)	1	Each	\$3,600	\$3,600
F. Data Cores ( one data core every half mile) traffic control provided by Contractor	1	LS	\$3,200	\$3,200
G. Mobe/Demobe (include in daily rate)	1	Each	\$0	\$0
H. Project meeting (Caltrans/County)	1	Each	\$350	\$350
<b>Subtotal Fixed Costs \$</b>				<b>\$5,350</b>

If plant technicians are needed, please call.

\* If additional technician is needed, rates are \$ 88.00 per hour (if Caltrans requires or contractor requests)

Assumption all paving will be done on 1st shift.

Laboratory and technicians are fully certified in all required tests.

Data Core and Density waste is contractor responsibility

Trinity Engineering Laboratories is a Certified Small Business. Supplier Number:1269800

If project continues after June 30, 2013,2014 and 2015, an increase of 6% per year is added due to pre-vailing requirements.

Additional insurance requirements will be at cost of the requirement.

The production cost includes one inspector/ tester.

The daily shift rates includes all of the test required for the options choices.
