This proposal is subject to all Terms and Conditions below.

TERMS AND CONDITIONS OF CONTRACT:

In this agreement Sublet means LMS Transport (LMS) & LMN Incorporated (LMN). Owner means owner and/or any general contractor (customer) and/or agent or owner. This is a proposal per owner's request, not a complete property evaluation.

1. Standard Exclusions: Engineering, Soils Test, Permits, Compaction Test and/or Inspection Fees unless noted.

2. Prices are firm for thirty (30) days from the date of the proposal unless otherwise stated.

3. Owner agrees to indemnify Sublet from any claim or suit for bodily injury or property damage arising from the design construction or installation of speed bumps or wheel stops.

4. Any changes required by owner shall be authorized in writing and paid by owner at Sublet prevailing rates unless quoted and agreed upon in writing.

5. Owner agrees to furnish to jobsite necessary and adequate water supply at owner's expense.

6. Sublet assumes no liability for damage to underground pipes, septic tanks, cesspools or other underground structures; and any extra expense caused by the Sublet by the existence or location thereof shall be charged to buyer.

7. Owner agrees to pay attorney's and court costs in event suit is instituted to collect amounts due Sublet.

8. If work is performed according to owner's specifications of labor and materials, Sublet does not assume responsibility for the defects.

9. If work is to be performed by Sublet to provide labor and material in a workmanlike manner to accomplish the owner's purposes, Sublet agrees to repair or replace any defects of which owner gives notice to Sublet within 5 days after completion of work.

10. Delays or damage caused by building trades other than Sublet not employed by Sublet, shall be owner's responsibility.

11. Sublet shall be responsible for clean-up and removal of Sublet work and materials only.

12. If asphalt compaction tests are required by customer or agency, these must be performed while asphalt is being laid. Tests performed at a later date are not an acceptable method, and we assume no responsibility for those results.

13. Sublet is not responsible for proper drainage.

14. Grades are to be furnished plus and minus one tenth (.10) of a foot with dirt to balance.

15. Jobsite must be accessible to heavy equipment.

16. Workers compensation will be covered by the Owner for the Sublet employees for this project only.

17. Owner agrees to pay sublet, in full, based on the net terms under Inclusions on page 1. If an invoice is not paid within the term, a 3% fee will be assessed to the total, compound monthly. After 30 days, a 5% fee

will be assessed to the total, compounded monthly. Signing this contract is the Owners recognition and approval to pay all invoices, in full, within the term.

18. LMS & LMN or Sublet has not notified any underground alert service. All work performed by Sublet for Owner is done with the express understanding that Owner has compiled with and accepts all responsibilities and liabilities in and for the requirements of the regional notification center law pursuant to Article 2 (commencing with Section 4216) of Chapter 3.1 of Division 5 of Title 1 of the Government code.

19. ADDITIONAL SHIFTS TO BE CHARGED AT OUR STANDARD RATES ON PAGE 2. The number of shift approved for this quote will be identified under "Inclusions".

6-foot tall tumbleweeds in Bakersfield are fire danger threat

Owner of lot where weeds come from lives in LA

Last Updated: 109 days ago

BAKERSFIELD, Calif. - A Kern County neighborhood, near Weedpatch and Highway 58, has been invaded by tumbleweeds.

The people who live there said they are trapped and its a huge fire danger.

Teri Torres and her neighbors are upset about the tumbleweeds that are burying their homes and yards.

Torres is worried about being able to evacuate her special needs son in an emergency.

"We can't get out of our property. I can't even get into my driveway or in from my front door over there because of all the tumbleweeds," said Torres.

The tumbleweeds are taller than 6-foot, meaning if they were to catch fire the people who live in the houses would have six-foot flames at their front door.

Residents said they have tried to get the county to do something about the problem and last August the problem was cleaned up.

"Here we are literally eight months later and this is what we are dealing with," said Torres.

VIEW RESIDENTS' PICTURES OF TUMBLEWEEDS HERE: http://turnto23.com/documents/10920/0/Tumbleweeds+are+fire+danger/d6ef175c-f03f-47de-b3f1-9120b8891928

They said this time they have had trouble getting any help from county officials so 23ABC made some calls.

Code enforcement said it's something people who live in an agricultural area have to learn to deal with. County Supervisor Leticia Perez's office and Kern County Fire said they would look into the problem.

"All the people that live here, they are always blocked in," said Frank Thomas. "They can't get out and there are kids that can't come outside because of these tumbleweeds."

Residents said the tumbleweeds are coming from the lot across the street. They said the owner of that lot lives in

Los Angeles.

"I want the owner to come and clean all this so this doesn't happen again," said Thomas.

Bakersfield gustnado? Weather Service now calling it a tornado

By THE BAKERSFIELD CALIFORNIAN

It wasn't a massive tornado like in the movie "Twister," but a weak tornado visited the southwest part of Bakersfield Monday evening.

At about 7:10 p.m., a small tornado was caught on video by a local resident. The National Weather Service in Hanford confirmed Tuesday afternoon that the video in fact showed a tornado near the intersection of Old River Road and Stockdale Highway and the Kern River.

"It only lasted a few minutes but it was in fact a real tornado but it wasn't the classic you might see in the Midwest," said James Brotherton, a meteorologist at the NWS in Hanford.

KERO 23 morning weather forecaster Elaina Rusk, during an appearance Tuesday morning on "First Look with Scott Cox," called the phenomenon caught on video a gustnado.

On its website the National Service describes that as "a term for a short-lived, ground-based, shallow, vortex that develops on a gust front associated with either thunderstorms or showers."

Miles Muzio a meteorologist at KBAK Channel 29, also called it a gustnado initially, but after more research he agrees with the NWS.

"It was a big discussion and a lot of people were weighing in as to what to call it but in the end it was a weak tornado," Muzio said.

Brotherton described the difference between the two.

"A gustnado happens completely opposite of thunderstorms and this particular tornado actually occurred in the updraft of the thunderstorm or back part of the storm, hence classifying it as a tornado," Brotherton said.

Wind picks up speed -- and plenty of dust

By THE BAKERSFIELD CALIFORNIAN

Take one very dry winter. Add more than a week of unseasonably hot temperatures. Mix in unusual winds shooting over the passes from the south...

And you get choking dust, power outages, and an official health warning marring what otherwise might have been a nice Sunday afternoon.

The San Joaquin Valley Air Pollution Control District issued a "health cautionary statement" Sunday for valley portions of Kern County as well as Tulare, Fresno, Kings and Merced counties.

Effective through Sunday evening, the air district warned that the gusty winds may pick up unhealthy quantities of dust -- particulate matter 10 microns or smaller that can cause serious health problems.

According to the district, inhaling PM10 can aggravate lung disease, trigger asthma attacks and bronchitis, and increase one's risk of respiratory infections.

Of course, valley fever is also an airborne illness, well-known to locals, caused by breathing in fungal spores found in some desert soils, including areas around Bakersfield.

Older adults and children should avoid prolonged exposure to the dust, the district advised.

Residents in east Bakersfield, east of Alra Vista Drive, reported a power outage, beginning at about 2 p.m. It was still out nearly three hours later, but it was unclear how many customers were affected.

Jeff Barlow, a meteorologist at the National Weather Service station in Hanford, said the maximum wind gust clocked in at 41 mph Sunday.

Normally, the wind in Bakersfield comes from the northwest, but a storm forming in the Pacific Ocean caused the wind to shift dramatically, and start streaming over the Grapevine and other passes from the south. And when wind blows through the passes, it compresses the air, causing it to pick up speed.

"It's kind of like pressing your thumb over a garden hose," Barlow said.

Dry conditions, with lots of farm fields being fallow or in transition, means the wind easily picked up dust.

But there may be some relief in sight.

There's a chance of showers or thunderstorms late Sunday night and early Monday, Barlow added.

"It's possible it'll bring a little moisture in."
