Re: 08-0P8204 Rebuttal to Western Structures Bid Protest #2

Dear Mr. McMillan,

We would like to respond to Western Structures rebuttal regarding the use of Mallard and their false accusations regarding our closures.

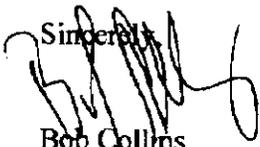

As mentioned previously Jabre will be setting up both complete closures and shoulder closures when needed for the various work being performed.

Western Structures has injected that the use of flagging is for the sole purpose of Reverse Control Flagging which is totally false. The work for the job only involves work on the ramps or offsite and the ramps are either onramps or off-ramps and the traffic only goes one way. No Reverse Control Flagging needed or allowed.

The job entails extensive Clearing and Grubbing, and the use of concrete trucks for the invert paving, in which we will need to get the trucks in and out of the area to be cleared or poured, also as previously stated. This work can be handled with shoulder closures but the trucks will need to be directed for safety when they can exit and enter the jobsite. This is a common practice in the construction industry.

It is for these reasons that Jabre Contracting, who is listed as the low bidder on this project be awarded the job and that protest arguments of Western Structures be dismissed.

Sincerely,

Bob Collins

President

Jabre Contracting Inc.
