Bonding FAQ

01-21-16P03:02 RCVD

Kiewit policy requires bonding for all permanent material suppliers and subcontractors.

The following agencies can help you with bonding. This list does not constitute an endorsement of any of these companies. This list is provided as a service to you, the subcontractor and permanent material supplier.

Why should a contractor register?

In response to State Senate Bill 854, the Contractors must register and meet requirements using the new online application before bidding on public works contracts in California. The application also provides agencies that administer public works programs with a searchable database of qualified contractors.

Requirements:

Contractors' requirements include that they maintain workers' compensation coverage for all employees and only hire subcontractors who are registered public works contractors. They must also hold a Contractors State License Board license, if required for their trade.

In addition, contractors must not be debarred from working on public works by the state or federal government and have no delinquent wage or penalty assessments due to any enforcement agency or employee.
