Quotation

Project: CA DOT, Project No. 11-2M6504, Rt. 86, Imperial County
Quantity: Item 394053 - 4,520 stations (approx. 452,000 cuts) of asphalt Shoulder Rumble Strips

*Construction Time: approx. 6 - 7 work shifts

Mobilization: \$11,890.00

Unit Price: \$10.50 per station x 4,520 stations = \$47,460.00

Total: \$59,350.00 (approx.)

Note: This quotation is based on daylight work hours, unless otherwise stated. Please contact SPT if you would like a quotation for night shift work hours.

*SPT has based the construction time on the understanding that there may be traffic control restrictions.

The above unit price includes:

- 1) The labor and equipment necessary to mill-in approximately 4,520 stations (approx. 452,000 cuts) of asphalt shoulder rumble strips on the CA DOT project; SPT's rumble strip mills are capable of cutting various continuous, skip and gap patterns on roadway centerline and shoulders to satisfy all known DOT specifications. Cut width can be varied from a minimum of 4" to a maximum of 16" and is easily interchangeable.

The above unit price excludes:

- 1) Traffic control, flaggers, impact attenuators, arrowboards or any other maintenance and protection of traffic items other than revolving beacons on SPT trucks. The travel lane adjacent to the shoulder must be closed to install the shoulder rumble strips;
- 2) The clean-up of the debris from the shoulder surface.
- 3) The milling of rumble strips in areas not accessible to our equipment or areas SPT deems unsuitable for cutting rumble strips;
- 4) Layout. The contractor must provide a continuous pavement marking stripe on the edge of the shoulder that is visible to our operator. The layout and alignment of the cuts will mirror this stripe. Start and stop points must also be clearly marked by the General Contractor.
- 5) Union concessions on behalf of SPT's non-union employees.
- 6) Payment & Performance Bonds. SPT's bond cost is 1.5 percent with a \$100.00 minimum.
- 7) Mobilization. A mobilization charge of \$11,890.00 lump sum will be charged in addition to the unit price as shown above. A single mobilization is based on uninterrupted construction from the time of arrival.
- 8) Fog Seal. Some states require that the contractor spray the rumble strip with a protective oil sealant. This quotation does not include fog seal materials nor the labor and equipment for the application thereof.

Service charge of 1 1/2% per month (minimum charge \$50) which is an annual rate of 18%, added to past due balance, plus reasonable collection and/or attorneys fees if required.

www.rumblestrips.com

Equal Opportunity Employer

9) TERO taxes, fees, licenses or hiring, if required.

Pricing excludes general contractor association dues, gross receipt taxes, or additional charges passed on by the general contractor.

Schedule of Operations:

This quotation is based on a single mobilization and a construction schedule that will allow SPT to mill in rumble strips for a minimum of 8 hours per shift after traffic control setup. SPT estimates that it will take us 6 - 7 consecutive work shifts to install 4,520 stations of rumble strips on this project. Please note that SPT is capable of milling up to 25 miles of rumble strips during each shift and expects the general contractor to provide sufficient lane closures and brooming to meet this daily production.

If SPT cannot construct this project as quoted (i.e. within the number of mobilizations included, and/or according to the work hours and construction shifts described above) please notify us so we may re-quote this project.

Contract Terms:

SPT provides one hour daily for project coordination and traffic control set up by the General Contractor and other project sub-contractors. Delays or wait time beyond the initial hour due to improper layout, incomplete work areas or other delays not caused by, or related to SPT, will be charged at \$500.00 per hour.

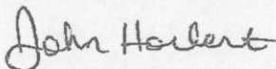

SPT bids work based on the published completion date in the project advertisement. The above pricing is valid through the original completion date of the project as posted in the project advertisement or contract documents. Any extensions or significant accelerations to the advertised completion date must be approved by SPT to assure equipment and crew availability.

Due to the fact that rumble strips are installed at or near the end of most projects, SPT will not be liable for liquidated damages or other costs unless adequate notice (minimum 20 days) and construction time are provided.

Thank you for the opportunity to quote on this project. We look forward to the opportunity of working with your company. If you have any questions regarding this quotation or SPT, please contact me at 717-697-1450.

Sincerely,

SURFACE PREPARATION TECHNOLOGIES

John Holbert

Please note: SPT will honor this quotation for 30 days after the bid date.

***By submitting a subcontract to SPT for work on this project, the Contractor agrees to the terms of this quotation and thereby incorporates them into and as part of said subcontract, unless a corporate officer of SPT approves changes to this quotation in writing on SPT's letterhead. The terms and conditions of this quotation will supersede any conflicting terms of said subcontract.**

Service charge of 1 1/2% per month (minimum charge .50), which is an annual rate of 18%, added to past due balance, plus reasonable collection and/or attorneys fees if required.
