System Integrity

The SMC 4000 Mast-Mini is capable of operating independently of sunlight for 21 days using the 2 batteries in the battery bank. The solar array is sized to provide one day's power requirement in just 2.5 hours of good sunlight. This combination of extended day's use from the battery bank and quick recharge capability from the solar array result in a viable solar-assist system that will provide years of service with minimal maintenance.

Sign Flexibility

The SMC 4000 Mast-Mini is designed for use in areas where space is limited, and provides variable character fonts with both 12" and 18" character heights.

Standard NTCIP-Compliant Controller

A user-friendly, NTCIP-compliant, dedicated computer designed by Precision Solar Controls reduces the number of keys required to program the SMC 4000 Mast-Mini.

Full Matrix Display

The SMC 4000 Mast-Mini provides 250 text, 60 graphic and 20 arrow board display messages, preprogrammed and stored in the controller. Additionally, 100 user-created messages can be programmed and stored.

Industrial-Grade Structural Steel Trailer

The SMC 4000 Mast-Mini uses a durable trailer system designed to provide years of dependable service. The trailer's high-quality, powder-coat paint, 2"x3" 11-gauge steel frame, and a 2,000-pound axle enhance the overall durability of the unit.

Modular Electronic Components

The entire system was developed with the operator/end user in mind. Electronic components are easily replaced, reducing downtime and maintenance costs. This modularity also improves system diagnostics.
