EA __________

DESIGN SECTION __________

1. Correct bridge number shown.
2. Correct intersection stationing.
3. Correct bearings shown.
4. Correct stationing of pertinent BC's, EC's, angle points, etc.
5. B.B. and E.B. lines scale in proper position.
6. Wingwalls and retaining walls scale properly.
7. Roadway widths correspond.
8. Correct type of railing shown (by observation).
9. Curve date corresponds.
10. Stage construction compatible.
11. Existing bridge removal (especially in stages) compatible.
12. Median curbs (raised curbs or otherwise).
13. Bridge approach guard railing, type 8.
14. Protective railings on retaining walls.
15. Area drainage compatible.
16. Profile data corresponds.
17. Contours correspond to elevations called for on bridge plans.
18. Contours allow for bench, when called for.
19. Contours scale for same slope shown on plans.
20. Retaining walls and contour positions correspond (especially district retaining walls).

Refer to Memo to Designers 2.25.
