ATTENTION! There are a number of items in this appendix that need to be updated—especially in the areas of funding/programming, risks, and FHWA coordination. Until this appendix is updated, please see Appendix K for the discussion of topics in the Microsoft Office Word template associated with this appendix and discuss any issues with the Headquarters SHOPP program manager or advisor.

APPENDIX I – Preparation Guidelines for Permit Engineering Evaluation Report

ARTICLE 1 – Overview

The Encroachment Permit Application Review Form

Refer to Chapter 9, Article 8, for the Encroachment Permit process. The Encroachment Permit Application Review form is used by the district permits unit for transmitting encroachment permit proposals that cost up to $1,000,000 within state right of way to other Caltrans units for review. The reviewing units must fully detail their comments about the proposal and their number of review hours. The responsible unit as determined by the District Permits Engineer is designated on this form. The responsible unit must determine whether a Permit Engineering Evaluation Report (PEER) is required for encroachment permit projects, and if so, attach it or indicate the estimated completion date. If the unit determines that there will be no adverse impact on highway operations, maintenance, and tort liability, it will indicate so in the appropriate box shown on the Encroachment Permit Application Review form with the signature by at least a senior level person. The unit will then do its usual permit review, fill out the rest of the form, and return it to the District Permit Engineer. If there will be impacts, a PEER is required and the unit will be responsible for the preparation and review and securing the approval of the PEER. If the project does not meet the eligibility requirements for processing via a Combined PSR/PR (see Chapter 9, Article 9), it is not be eligible for processing as a PEER.

The PEER process is intended to streamline the processing of projects-funded-by-others by reducing the steps in the project development process. This is not intended to relieve the project sponsor from meeting all other Department policies, standards and practices. Caltrans may increase the level of documentation and processing for those projects that are deemed complex.

The Permit Engineering Evaluation Report

A Project Report (PR) or a PEER is required for every action that has a permanent traffic impact and for work that affects the operating capability of a state highway facility. These reports, and their preparation, are the responsibility of either Project Development or Traffic Operations. However, the District Permit Unit must verify that responsible and reviewing units have considered the need for the appropriate report and have correctly completed the Encroachment Permit Application Review form.
**Projects-funded-by-others if Cost is Over $1,000,000**

The District Permit Engineer determines the magnitude of the work. An encroachment or public transit project that costs more than $1,000,000 and is located within state right of way is considered a project-funded-by-others and will require PEER if it costs less than $3 million, a Combined PSR/PR if it qualifies, or a PSR and a PR if it does not. The Combined PSR/PR process is described in Chapter 9, Article 9, and in Appendix A.

**Projects Not Requiring a PEER**

Projects not requiring a PEER usually are for commercial filming, miscellaneous activities, special events, surveys, and utilities.

**Purpose of a PEER**

A PEER is prepared to document the engineering analysis of proposed work. The analysis includes review of the proposed improvements to determine drainage, maintenance, operation, and environmental impact on the state highway system. Proposed improvements must conform to Caltrans’ current design standards and practices or be justified by an approved design exception. Additional information may be requested from the applicant if it is needed to perform the reviews. A permit may be denied based upon conclusions of the reviews.

**Report Format**

The PEER should be prepared and submitted using the form shown in the following pages (form number TR-0112). The following article provides guidelines for specific items on the form.

**ARTICLE 2 – Guidelines for Completing the PEER Form**

**Hours for Preparing**

For Permit Projects: Give the total hours used in investigating and preparing the PEER by all parties. PEER preparation is considered part of the permit review process. The time needed to evaluate and finalize the PEER will depend on the scope and complexity of the work. When it can be done within the review deadline, the PEER should be attached to the review form and returned to the Permit Engineer. When more time is needed, the review form should be returned immediately to the Permit Engineer, notifying of the estimated date of PEER completion and whether nor not additional information is needed.

For projects-funded-by-others: These projects require a workplan for the Independent Quality Assurance efforts. Project sponsors are required to prepare the PEER and the hours required to prepare the PEER are not required.
Appendix I – Preparation Guidelines for Permit Engineering Evaluation Report
Article 2 – Guidelines for Completing the PEER Form

Guidelines written by Caltrans DLP; Form Administered by Caltrans Division of Traffic Operations

Permit Number

Permit number assigned to permit application by District Permit Office (if appropriate)

Date

Date of completion of the PEER

District / County / Route/ Post Mile [Dist-Co-Rte-PM]

The Post Mile should be given to the nearest 0.1 mile; if the project is 0.2 mile or more in length, give both the beginning and ending Post Mile.

EA Used

The Expenditure Authorization (EA) used to charge costs for the permit review process as spelled out in Chapter 2 of the Encroachment Permits Manual or the project EA for projects-funded-by-others.

Applicant

Name of individual, agency or organization submitting permit proposal.

1. Describe Proposal, What It Serves, Approximate Cost

Provide a brief narrative containing statements that are concise but include the information needed to describe the proposed work.

2. Describe Existing Highway - Brief Analysis of Impact on Highway Operation and Maintenance

Evaluate the impacts of the proposal upon the State highway.

3. Analysis of Proposal for Geometric and Functional Adequacy

Summarize the findings of the determination of the geometric and functional adequacy of the proposal. All statements should be concise and contain the information needed to justify (or reject) the proposed work.

3a. Non-Standard Design Features

Check “Yes” or “No” indicating whether nonstandard design features are involved and if they are, provide the rationale for approval of an exception. If yes, give name of approval authority and date of approval. If FHWA approval of the Fact Sheet is needed, obtain this on a separate sheet and attach it.
4. **Revision in Access Control or Transfer of R/W to Permittee Involved**

   Check Yes or No.

4a. **If Yes, Date of District Director Approval**

   If the proposal involves a reduction in access control or the transfer of Caltrans right of way to the permittee, a request must first be made to the District Director (DD) for authorization to decertify and dispose of the property rights involved. See Chapter 26 “Disposal of Rights of Way” for processing instructions. Indicate the date the DD approved the revision.

4b. **If Interstate, Date of FHWA Approval**

   If FHWA concurrence is needed for a change in access on the Interstate system, give the date of approval.

5. **Signalization Involved**

   Check YES or NO. If the answer is “yes”, answer the next four questions by checking YES, NO or NOT APPLICABLE.

   If the answer to any of the four questions is “no”, provide an explanation and any comments on an attached sheet.

**Proposal Recommended**

Check either “Yes, as submitted”, “Yes, with conditions described above”, or “No, as described above”. List conditions in Item 3. Indicate reasons for “No, as described above” in Item 3.

**Prepared by Title**

- Name of individual who prepared this report and who should be contacted regarding the proposal.

- Title of individual preparing the PEER.

- For projects-funded-by-others enter the name and title of the individual responsible for reviewing the PEER.

**Registered Engineer Stamp**

The PEER must be prepared by a California registered civil engineer. The stamp or seal and signature and date must be placed on the report, in the space provided for the engineer in responsible charge of the evaluation.

Article 2 – Guidelines for Completing the PEER Form

Guidelines written by Caltrans DLP; Form Administered by Caltrans Division of Traffic Operations

Unit

The unit source code of the registered engineer in responsible charge of the evaluation of the proposal.

Approved by Title Date Approved

• Signature of the District Director or the Deputy District Director to whom approval authority has been delegated.

• Title of individual approving the PEER.

• Date approved.
