Information

Ref: UPDATE ON IMPLEMENTATION OF RECOVERY ACT OF 2009

SUMMARY:

The Department of Transportation is implementing the American Recovery and Reinvestment Act of 2009 (Recovery Act) and has committed to report to the Commission the status of implementation. This includes reporting on the amount of Recovery Act funds obligated for state and local projects to date. Attached is the obligation status for regional agency and state projects as of May 28, 2009. The Department will present the most current data at the Commission meeting.

BACKGROUND:

The American Recovery and Reinvestment Act of 2009 (ARRA) is a job and economic stimulus bill intended to help states and the nation restart their economies and stimulate employment during the worst economic downturn in over 70 years. In drafting this bill, President Obama and Congress recognized that investment in transportation infrastructure is one of the best ways to create and sustain jobs, stimulate economic development, and leave a legacy to support the financial well-being of the generations to come. The intent and language of the bill responds to the urgency of our national situation by tasking state departments of transportation and other transportation stakeholders to quickly move forward with mobility projects that bring real value to the local, state, and national economy.

Nationally, the bill provides more than \$48 billion for transportation infrastructure. The Recovery Act apportions in formula programs approximately \$2.57 billion for highways, local streets and roads in California. These funds are segregated by federal and state law to provide approximately \$1.6 billion to the regions (including \$48 million for TE) and \$964 million to the state (including \$29 million for TE). California will also be apportioned in formula grants approximately \$1.068 billion for urban, non-urban and fixed guideway transit projects. The Recovery Act also provides \$8 billion nationally for Capital Assistance for High Speed Rail Corridors for which California has been well positioned to receive. In addition, California airports have directly received \$73.1 million to date in aviation grants and Amtrak has dedicated \$51.8 million to system upgrades in California. Lastly, the Recovery Act provides \$1.5 billion available nationally for competitive grants for highway projects; public transportation projects; rail transportation projects; and port infrastructure investments; of which California could receive a maximum of \$300 million.
