Ref: Technical Adjustment to the 2010 State Transportation Improvement Program (STIP)

ISSUE

With the adoption of the 2010 STIP, the Commission authorized staff, in consultation with Caltrans and regional agencies, to make technical changes in cost, schedules, and descriptions for projects in the 2010 STIP in order to reflect the most current information or to clarify the Commission's programming commitments, with report of any substantive changes back to the Commission for approval at the June 30 – July 1, 2010 meeting.

RECOMMENDATION

Staff recommends that the Commission adopt the programming and other technical changes and corrections to the 2010 STIP using the attached resolution, noting any specific changes, corrections, or exceptions to the adopted 2010 STIP.

BACKGROUND

Attachment A lists recommended additional programming and other technical adjustments.

Major changes are related to the addition of the BART Oakland airport connector in Alameda County (PPNO 2103) in both the regional and interregional programs. The other adjustments include corrections of errors; minor cost changes, including shifting of funding between components; and scheduling changes that can be accomplished within fund estimate constraints.

If necessary, an updated list of recommended technical adjustments will be provided prior to the Commission meeting.
