February 26, 2007

Dear Commissioners:

Enclosed are two documents that revise the staff's Corridor Mobility Improvement Account (CMIA) project information per your direction at the California Transportation Commission (CTC) hearing on February 20. The first document is a spreadsheet that shows contract award date, funding, and scoring information. The second spreadsheet provides benefit-cost ratio and travel time savings data, as well as indicating which projects are congestion relief and which are connectivity. Both spreadsheets group projects by whether they are in the north or in the south. The projects are also arrayed by CMIA geographic region.

In this latest iteration for your consideration, staff recommends fully programming the \$4.5 billion available to the CMIA. In making this recommendation, staff is recommending a reserve of \$90 million, or two percent, for bond administration costs, at the urging of Caltrans and the Department of Finance. Staff is also recommending that the Commission retain \$150 million as a reserve for traffic management system projects, also at the urging of Caltrans. Staff has applied the north-south split to these reserves.

Over the last week staff has undertaken a review of project nominations as you directed. We have reconsidered projects based on consultations with many regional agencies and Caltrans, written information from project nominators, and Governor Schwarzenegger's letter to the Commission of February 20. Staff has updated its scoring to reflect new information provided. Staff has worked with regional agencies and Caltrans to ensure full project funding. In many instances, staff is recommending full funding of the CMIA amount requested. In those instances where the full CMIA funding request is not recommended, Caltrans and regional agencies have assured staff that state or regional resources will cover the balance.

Staff recommends funding for 21 projects in the south and 29 projects in the north. All 50 projects are fully funded. You asked staff to identify projects that might be eligible for funding from the Trade Corridor Improvement Fund (TCIF). While the details of the TCIF program are unknown at this time, it would appear that the Brawley bypass project would be a candidate for this program. Some HOV projects on major interstate trade corridors—such as 5, 10, 580, and 80—might also be candidates, primarily for the mobility benefit that might accrue to having added capacity that would help both automobiles and trucks. However, staff would caution the

Commissioners
February 26, 2007
Page 2

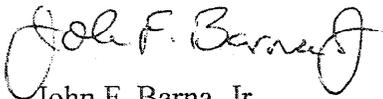

Commission that the Legislature is only now considering several proposals that would provide the Commission further direction on the TCIF. This same caution applies to looking to State-Local Partnership program dollars.

The State Highway Operation and Protection Program (SHOPP) is another funding source for several CMIA projects, most notably safety projects such as Doyle Drive in San Francisco, the 10/605 interchange in the San Gabriel Valley, and SR-138 in the Antelope Valley.

Lastly, you asked staff to work with legislative staff to determine whether final adoption of the CMIA program could be deferred to the April CTC meeting. Staff has concluded that sufficient information exists now for you to program the entire \$4.5 billion available. Staff would recommend, however, that project nominators provide project delivery contracts, with updated cost and schedule information, at the April meeting.

In conclusion, CTC staff again thanks the transportation stakeholder community and Caltrans for all their efforts over the last week and during the entire CMIA nomination and selection process.

Sincerely,

John F. Barna, Jr.
Executive Director

**California Transportation Commission
Adoption of the Program of Projects for the
Corridor Mobility Improvement Account (CMIA)
Resolution G-07-___, February 28, 2007**

- 1.1 WHEREAS the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006 was approved by voters as Proposition 1B on November 7, 2006, and
- 1.2 WHEREAS the Bond Act includes a program of funding from \$4.5 billion to be deposited in the Corridor Mobility Improvement Account (CMIA), and
- 1.3 WHEREAS the funds in the CMIA are to be available to the California Transportation Commission, upon appropriation in the annual Budget Act by the Legislature, for allocation for performance improvements on the state highway system or major access routes to the state highway system, and
- 1.4 WHEREAS the Bond Act mandated that the Commission adopt guidelines for the CMIA program by December 1, 2006, and the Commission adopted the guidelines on November 8, 2006, and
- 1.5 WHEREAS the Bond Act mandated that the Department of Transportation and the regional agencies responsible for developing a regional transportation improvement program (RTIP) prepare and submit project nominations for funding from the CMIA and that those nominations be accompanied by documentation regarding the quantitative and qualitative measures validating each project's consistency with the program's policy objectives, and
- 1.6 WHEREAS the Commission received 149 project nominations for over \$11.3 billion in project costs by the deadline of January 16, 2007, and
- 1.7 WHEREAS the Bond Act mandated that the Commission adopt its initial program for CMIA funding no later than March 1, 2007, and
- 1.8 WHEREAS the Commission held a public hearing on February 20, 2006, to hear the Commission staff's initial program recommendations and to receive public comment, and
- 1.9 WHEREAS the Commission directed staff on February 20, 2006, to review the nominations further and to develop a recommendation that would program the full program at one time rather than to adopt an initial program with an update in 2008, and
- 1.10 WHEREAS the staff distributed its updated recommendation on February 26, 2006, by posting on the Commission's website and otherwise, and
- 1.11 WHEREAS the Commission has received further comment and testimony at and preceding its special meeting of February 28, 2007,
- 1.12 WHEREAS the Bond Act requires that the Commission make certain findings in adopting its CMIA program, and
- 2.1 NOW THEREFORE BE IT RESOLVED THAT the Commission hereby adopts the program of projects for CMIA funding as presented by Commission staff *[with the following changes, corrections, and conditions]*
[insert any changes here]
and
- 2.2 BE IT FURTHER RESOLVED THAT the Commission's approval of project funding is only for the cost of construction (including construction support), and that the Commission finds that preconstruction costs can and should be made available from the state transportation improvement program (STIP) and other sources as further specified in the staff recommendations, and
- 2.3 BE IT FURTHER RESOLVED THAT the Commission finds that the inclusion of each of the projects in the program is based on a demonstration that the project meets all of the following criteria:

- (a) Is a high-priority project in the corridor as demonstrated by its nomination by the Department and the regional agency or, where needed to fully fund the project, the identification and commitment of supplemental funding to the project from other state, local, or federal funds;
- (b) Can commence construction or implementation no later than December 31, 2012;
- (c) Improves mobility in a high-congestion corridor by improving travel times or reducing delay, improves the connectivity of the state highway system between rural, suburban, and urban areas, or improves the operation or safety of a highway segment;
- (d) Improves access to jobs, housing, markets, and commerce;

and

- 2.4 BE IT FURTHER RESOLVED THAT the Commission finds that the adopted program is (a) geographically balanced, consistent with the 40% north/60% south split of Streets and Highways Code Section 188, (b) provides mobility improvements in highly traveled or highly congested corridors in all regions of California, and (c) targets bond proceeds in a manner that provides the increment of funding necessary to provide the mobility benefit in the earliest possible timeframe, and
- 2.5 BE IT FURTHER RESOLVED THAT the Commission intends to work with Caltrans to identify additional sources of funding for CMIA nominated projects, such as the State Highway Operation and Protection Program (SHOPP) for Doyle Drive in San Francisco, the Route 10/605 interchange in the San Gabriel Valley, safety elements on Route 138 in the Antelope Valley, and Route 805 auxiliary lanes in San Diego; and that the Commission intends to work with Caltrans and stakeholders on identifying, where appropriate, Trade Corridor Improvement Fund (TCIF) resources to augment projects in the I-10, I-5, I-80, and I-580 corridors, and
- 2.6 BE IT FURTHER RESOLVED THAT the Commission finds that enhanced project delivery and accountability measures are vital to the success of the CMIA program, and
- 2.7 BE IT FURTHER RESOLVED THAT the Commission intends to create a project delivery council consisting of CTC staff, Caltrans, and regional transportation agency representatives; this council would be an advisory body to the Commission and would review projects on a quarterly basis to monitor progress against milestones and would review project cost estimates as part of the Commission's requirement to report program costs biannually; and
- 2.8 BE IT FURTHER RESOLVED THAT the Commission will announce the makeup of the council by the Commission's April 2007 meeting; and
- 2.9 BE IT FURTHER RESOLVED THAT the Commission requires nominating agencies, no later than the Commission's April 2007 meeting, to provide final cost and schedule estimates to be signed by the Caltrans director, regional agency executive directors, and the CTC director; and
- 2.10 BE IT FURTHER RESOLVED THAT these cost and schedule estimates will establish the baseline for project monitoring by CTC staff and the project delivery council; and
- 2.11 BE IT FURTHER RESOLVED THAT the Commission finds that any increases in cost estimates from CMIA program adoption to finalized cost estimates are the responsibility of the nominating agencies, including Caltrans, and
- 2.12 BE IT FURTHER RESOLVED THAT the Commission intends for the project delivery council to have purview to advise the Commission on corrective strategies and actions that implementing agencies can take on projects that have missed milestones or increased in cost; and
- 2.13 BE IT FURTHER RESOLVED THAT the Commission intends to create a watch list for projects that are unable to maintain delivery and cost commitments; and
- 2.14 BE IT FURTHER RESOLVED THAT the Commission finds that it has the discretion to determine whether a project on the watch list would remain in the CMIA program.
