1 \$500,000 Del Norte 01-DN-101 21.8	Near Crescent City at 0.9 mile south of Hamilton Road. Heavy rain in late November 2012 caused a landslide at this location that covered and closed the northbound lane of traffic. 2 \$500,000 Del Norte 01-DN-197 R2.1	Near Crescent City, at 2.1 miles north of Route 199. Heavy rain in late November 2012 caused a sinkhole to appear at this location. A damaged culvert underneath the highway caused water to undermine the roadway fill from the exterior of the culvert. Because of heavy flow, fish passage issues, and permitting agency requirements such as creek diversion, replacement of the culvert is not possible at this time and interim repairs are necessary until a permanent restoration project can be delivered. This project is to fill the voids outside the culvert with concrete, replace fill on exterior of the culvert, provide traffic control, and repair the roadway. Initial G-11 Allocation 01/14/13: \$500,000 (Additional \$10,000 was allocated for right of way purposes).	01-1097 SHOPP/12-13 0113000059 4 0C8004 Emergency	2011-12 302-0042 SHA 20.20.201.130	\$500,000

This project is to remove and dispose of slide material from the inlet and outlet of the plugged culvert, Install I-Beams at culvert inlet to prevent further plugging, repair roadway surface, reconstruct damaged metal beam guardrail and slopes, place erosion control measures, and conduct traffic control as necessary. 4 \$400,000 Humboldt 01-Hum-96 7.9	Near Hoopa, north of Sugar Bowl Ranch Road. On November 23, 2012, a landslide occurred at this location closing both lanes of traffic. The initial allocation was to remove and dispose of slide debris, remove unstable rocks and stabilize the slope, repair the roadway surface, place erosion control measures, and provide traffic control as necessary. Continued wet weather however caused an increase in the size of the slide area. This supplemental is necessary due to the increase in the scope of damage and the need to add a rock fall barrier at the toe of the slope to safely open the highway to two-way traffic. Initial G-11 Allocation 11/28/12: \$500,000 Supplemental G-11 Allocation 12/20/12: \$400,000 Revised Allocation: \$900,000 (Additional \$10,000 was allocated for right of way purposes).	01-2370 SHOPP/12-13 0113000051 4 0C7704 Emergency	2011-12 302-0042 SHA 20.20.201.130	\$400,000

The initial allocation was to replace the damaged culvert, reconstruct the roadway and roadway surface, place rock slope protection and erosion control, and provide traffic control as necessary. The supplemental allocation is necessary due to weather delays preventing contract work in the creek while the costs of traffic control were being incurred. Initial allocation was to remove debris, rocks, and burnt trees on the steep slope above the highway that have the potential of clogging drainage culverts. Heavy rain in late November and December 2012 caused two creeks to overtop the roadway and an overflowing channel threatened the structural stability of a roadway bridge. This supplemental allocation is to remove debris and creek excessive bedload to ensure flow capacity is adequate for future storms. Heavy rain in late November 2012 caused a roadway embankment failure at this location and resulted in the closure of the northbound lane. The initial allocation was to repair a damaged drainage pipe, fill a void under the roadway with 100 cubic yards of imported material, reconstruct the roadway and guardrail, and provide full time traffic control during construction. The supplemental funds are necessary due to unanticipated difficulties during construction. Large boulders were encountered causing the need to revise the shoring plan, additional grouting was needed to fill remaining voids, change in the lining of the existing culvert was necessary due to the culvert condition and misalignment, and delays due to inclement weather during construction.
