Attention: Jody Tian

Dear Ms. Falsetti:

Please accept for your review and approval Amendment #3 to the 2009/12 Metropolitan Transportation Improvement Program (MTIP), as amended by the SACOG Board of Directors on December 18.

#### **Air Quality Conformity**

The Board also approved the accompanying Conformity Determination on the MTIP. It relies on a previous regional emissions analysis and is awaiting approval by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). It can be found in Attachment B.

#### **Financial Constraint**

The Board also determined that Amendment #3 to the MTIP does not impact financial constraint. The Financial Summary is included in Attachment A, Section 4.

#### **Amendment #1 to the MTP2035**

The SACOG Board of Directors also approved Amendment #1 to the MTP2035 to maintain consistency between the two documents.

#### **Public Participation**

SACOG amended the MTIP and MTP in accordance with its Public Participation Plan. The Public Involvement Process and Public Comments are recorded in Attachment A, Section 6. SACOG held two public hearings—the first at the SACOG Transportation Committee meeting on December 4 and the second at the Board Meeting December 18. SACOG did not receive comments from the general public, although it did receive requests from project sponsors for technical edits. SACOG staff responded and made the technical edits as requested. The Board approved the edits as part of the MTIP and MTP amendments. Furthermore, the SACOG Board resolved to authorize SACOG staff to “work with Caltrans, FHWA, FTA, and EPA to make whatever technical changes or corrections are needed to the content, format, and organization of the document to obtain approval.”

**Comments on Amendment #3 to the 2009/12 MTIP &  
Amendment #1 to the MTP2035**

SACOG has not yet received comments from the general public. Instead, SACOG received comments and technical corrections to transportation projects from lead agencies. These technical corrections do not impact the financial constraint or the air quality conformity determination. The proposed technical corrections are listed in Attachment C.

**Comment:** From Brent Meyer, City of Woodland, on 12/3/08

Our comment is that the I-5/CR 102 (SACOG ID # YOL17300) should have been included in the formal amendment. We previously requested that the project be moved to the 2009 FFY. Our understanding was that [SACOG] rejected the request so that we could split off a portion of the project for landscaping. Our plan is that we will deal with splitting the landscaping project out later but this project needs to be added to the formal amendment now.

Thanks,

Brent Meyer, PE, SE, TE  
Senior Civil Engineer, Transportation  
City of Woodland

**Response:**

SACOG staff has since added the project change, which carries over funds from FFY 2008 to FFY 2009 on YOL17300.

**Conformity Determination for SACOG's Amendment #3 to  
the 2009/12 Metropolitan Transportation Improvement Program  
and Amendment #1 to the Metropolitan Transportation Plan 2035**

---

Amendment #3 to the 2009/12 MTIP and Amendment #1 to the MTP2035 rely on a previous regional emission analysis for its approval by Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). The following documentation has been prepared in accordance with FHWA's checklist for reliance on a previous regional emission analysis, dated January 31, 2006.

The applicable pollutants for the 2009/12 MTIP and the MTP2035 include ROG and NO<sub>x</sub> for the Sacramento Ozone Nonattainment Area, Carbon Monoxide (CO) for the CO Maintenance Area, and Particulate Matter (PM-10) for the PM-10 Moderate Nonattainment Area (§ 93.102).

The SACOG Board of Directors is scheduled to adopt Amendment #3 to the 2009/12 MTIP and Amendment #1 to the MTP2035 at its December 18, 2008 meeting (copy of resolution attached). The date of the previous conformity finding being relied upon was approved by the SACOG Board of Directors at its March 20, 2008 meeting (§ 93.104 (b, c)).

The 2009/12 MTIP and MTP2035 are fiscally constrained consistent with 40 CFR 450 (§ 93.108).

The conformity determination that Amendment #3 to the 2009/12 MTIP and Amendment #1 to the MTP2035 rely upon was prepared in accordance with the conformity requirements as published in Title 40 Code of Federal Regulations, Part 93 (§ 93.109).

The conformity tests for the Sacramento region vary by pollutant. The emissions budget test for ROG and NO<sub>x</sub> must be equal to or less than the budgets established in the Sacramento Regional Nonattainment Area 8-Hour Ozone Rate-Of-Progress State Implementation Plan (ROP/SIP) for the Sacramento ozone nonattainment area. The test for Carbon Monoxide (CO) must show that CO emissions are less than the CO maintenance budgets established in the 2004 Revision to the California State Implementation Plan for Carbon Monoxide, dated January 30, 2006. The conformity test for Particulate Matter (PM-10) is a Build vs. No-build test for PM-10 emissions. Under this test, PM-10 emissions must be less in the "Action" scenario than the "Baseline" scenario in order to pass the PM-10 conformity test. Table 2 (attached) shows the ROG, NO<sub>x</sub> and CO emissions budgets tests and Tables 3 and 4 show the PM-10 emission budget tests that were used to conform the March 20, 2008 conformity submittal that this MTIP relies upon (§ 93.109 (c-k)).

The emission estimates developed for this conformity determination were based on the latest population and employment projections for the Sacramento and Yuba/Sutter areas that were adopted by the SACOG Board of Directors on September 20, 2007 (§ 93.110).

One of the critical inputs into determining emissions associated with Amendment #3 to the 2009/12 MTIP and Amendment #1 to the MTP2035, which this conformity determination relies upon, is the selection of which emissions factors to use. For purposes of this conformity determination, EMFAC 2002 was used, as provided to SACOG by the California Air Resources Board (CARB). A list of the assumptions used in developing this conformity determination can be found in Table 4. On February 1, 2007, the Federal Highway Administration (FHWA) sent a letter to all of the

Metropolitan Planning Organizations in California and Caltrans Districts indicating that, after August 1, 2007, they would not be able to start any new transportation conformity determinations that require a new regional emissions analysis, unless the analysis incorporates more recent vehicle data consistent with the latest planning assumptions requirements in the conformity rule (40 CFR 93.110). The letter indicated that updated vehicle data was available in EMFAC2007, which was released to the public in November 2006. The letter indicated that FHWA, the Federal Transit Administration (FTA), and EPA were providing agencies with a 6-month transition period, beginning on February 1, 2007 before the new vehicle fleet data was required in conformity determinations. Consistent with the Transportation Conformity requirements found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A, new vehicle registration data must be used when it is available at the start of new conformity analyses. Since newer vehicle data was available but was not included in the older version of EMFAC, EMFAC2002 has not been used in any new regional emissions analyses that were started since August 1, 2007 (Federal Register, January 18, 2008, Volume 73, #13, pp.3464-3467). The vehicle registration data used in this conformity determination is from EMFAC 2002. The initial modeling performed for the previous regional emissions analysis performed for the MTP for 2035 conformity determination that this conformity determination relies upon began on June 4, 2007 (§ 93.111).

Public review of this document is part of the conformity consultation process as required under section 93.105 (a) (2), 93.105 (c) (1), and 93.105 (e) and is consistent with the public involvement procedures under 23 CFR 450 (§ 93.112) and the SACOG Public Participation Plan.

This air quality conformity determination includes interagency consultation and a public review period to give all affected parties an opportunity to comment. SACOG initiated interagency consultation by discussing the conformity approach with jurisdictional agencies and provided an opportunity for review and comment on the draft conformity determination prior to releasing the draft analysis for public review. Following that step, the Draft Amendment #3 to the 2009/12 MTIP, Amendment #1 to the MTP2035, and the Conformity Determination will begin circulating December 1 for public review. SACOG invites public review and comments through December 15. After the public hearing at the December 4 Transportation Committee meeting, the Board will vote on Amendment #3 to the 2009/12 MTIP, Amendment #1 to the MTP2035, and the conformity determination at its December 18 meeting.

In previous conformity determinations, SACOG had documented that all TCMs have been implemented; nevertheless, we are in the process of updating the status report to assure federal agencies that we are in compliance with this requirement. Pursuant to 40 CFR 93.113, SACOG has made a commitment to conduct an on-going monitoring process to document the timely implementation of all transportation control measures (TCMs) in approved state implementation plans (SIPs). In its 1987 report, the EPA noted that “in general, most of the agencies that committed to carrying out measures under the 1982 Air Quality Plan (AQP) have fulfilled those commitments and, in many cases, have taken actions which go beyond their 1982 Plan commitments.” No additional TCMs have been added to SIPs in the region since the 1982 Plan. If any TCMs are found to be still ongoing or not fully implemented, those will be documented and addressed. SACOG is currently in the process of updating the status of TCMs from the 1982 SIP, and is working closely with FHWA and EPA to compile this documentation prior to the end of 2008. (§ 93.113).

As documented in Tables 1, 2 and 3 (attached) the conformity analysis performed on Amendment #15 to the 2007/10 MTIP and the Metropolitan Transportation Plan for 2035 (MTP) is consistent

with the analysis performed for the Plan, in accordance with 23 CFR 450.324 (f) (2) (§ 93.114), § 93.118 (a-e) and § 93.119 for areas with SIP budgets and § 93.119 (g) dealing with areas without applicable SIP budgets.

Once the conformity analysis years for each pollutant (ROG, NO<sub>x</sub>, CO and PM-10) have been selected, SACOG uses its SACMET travel demand model to generate daily vehicle miles traveled (VMT) and total trips for each analysis year in question using population and employment assumptions, as shown in Table 1 attached. The outputs from the transportation model are then inputted into a PC-based version of EMFAC2002, which is used to generate emissions. The list of projects for each analysis year is defined by both the Metropolitan Transportation Plan (MTP) and Metropolitan Transportation Improvement Program (MTIP) for the first years of the Plan and by the MTP for all future conformity analysis years (§ 93.119 (h, i)).

As stated previously, Amendment #3 to the 2009/12 MTIP and Amendment #1 to the MTP2035 rely on a previous emissions analysis that was prepared for the MTP that was approved by the SACOG Board of Directors on March 20, 2008 and was approved by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) on May 16, 2008 (§ 93.122 (g)).

1) MTIP Inventories include emission forecasts for northern Solano County.

2) Local adjustments for 2008 include state and local measures (SECAT) that were not included in the baseline modeling (see Appendix D of the 2005 ROP/SIP for additional information).

PM-10 BUILD VS NO-BUILD CONFORMITY TEST FOR THE 2035 METROPOLITAN TRANSPORTATION PLAN (MTP)										
EMISSION CATEGORY	TONS PER DAY OF EMISSIONS									
	2008		2013		2020		2025		2035

PM-10	7.7643	7.7632	8.37	8.29	9.57	9.40	10.29	10.02	11.10	10.66

Nonattainment area for PM-10 is Sacramento County only. The Build vs No-Build Test is used for PM-10 conformity findings because ARB has not established any PM-10 budgets for Sacramento County.

The 2008 emissions are carried out to the 4th decimal because the difference in VMT between build and no-build was only 5,335 miles.

**Summary of Latest Planning Assumptions  
that were used to develop the MTP 2035  
Conformity Determination**

<p>On May 24, 2007, SACOG's RPP approved a list of assumptions to use in developing the air quality conformity determinations associated with the MTP 2035, Amendment #15 to the 2007/10 MTIP and the new 2009/12 MTIP.</p>	
Assumption 1	<p>The SACOG Board of Directors adopted a new set of population, housing, and employment projections for the years 2013, 2018 and 2035 at its March 17, 2007 meeting to be used for all future conformity determinations. The SACOG Board previously adopted population and employment numbers for the year 2035 at its December 14, 2006 meeting, replacing earlier projections dating from December 16, 2004. Projections for all other milestone years will be interpolated using the 2013, 2018 and 2035 numbers, plus the base year (2005) datasets.</p>
Assumption 2	<p>EMFAC 2002 will be used to develop emission estimates for the conformity determinations associated with the adoption of the MTP 2035 and amendment of the 2007/10 MTIP. The modeling required for this regional emissions analysis will begin prior to August 1, 2007 (it began on June 4, 2007). The emission budgets used in the conformity determinations are from the ROP SIP.</p>
Assumption 3	<p>SACOG will use the most recent emission control factors supplied by the California Air Resources Board (CARB) for use in any future conformity determinations.</p>
Assumption 4	<p>SACOG will claim emission reduction credits from the implementation of Congestion Mitigation and Air Quality (CMAQ) projects upon proper documentation.</p>
Assumption 5	<p>SACOG will continue to incorporate emissions estimates for that part of Solano County within the Sacramento federal ozone nonattainment area in all future conformity determinations as agreed to under SACOG's existing Memorandum of Understanding (MOU) with the Metropolitan Transportation Commission (MTC).</p>
Assumption 6	<p>SACOG will claim emission reduction credits from the implementation of the Sacramento Emergency Clean Air and Transportation (SECAT) program upon proper documentation.</p>
