

Interstate 680 (I-680) CMCP Fact Sheet

WHAT IS IT?

The Interstate 680 (I-680) **Comprehensive Multimodal Corridor Plan (CMCP)** is a long-range plan developed collaboratively between the California Department of Transportation (Caltrans) and its local and regional partners to identify opportunities for multimodal transportation improvements in the I-680 Corridor. These improvements cover all modes of transportation which include cars, trucks, rail, transit, ferries, bicycles, and walking. The CMCP outlines goals, strategies, projects, and funding priorities to achieve a balanced transportation system that addresses community impacts including air pollution and greenhouse gas emissions.

The CMCP will also support funding applications for corridor projects such as the northbound express lane.

STUDY AREA

I-680 is the primary south-north route traversing the entire length of Contra Costa County. I-680 connects the South Bay region and Alameda County to the south to Solano County to the north. The corridor passes through six cities and unincorporated communities in Contra Costa County.

SCHEDULE

GET INVOLVED!

- Your input will help us identify and prioritize projects to make your travel easier and more reliable.
- Caltrans will include input from interested agencies through our regular stakeholder engagement and seek public input through various outreach activities to assist in the planning process.
