

State Route 29 (SR-29)

Pavement Rehabilitation & Complete Street Project Newsletter

ISSUE – 4 – 1-16-26

W

elcome to this installment of the State Route 29 (SR-29) Pavement Rehabilitation and Complete Street Project Newsletter.

Fifteen different alleys have been rehabilitated in recent weeks along SR-29. The alleys will offer a smoother transition on and off the main route and an easier path of travel for pedestrians. If we have clear weather ahead, completion of this portion of work is projected to finish at the end of January, or early February.

In addition, Caltrans' Maintenance will be filling some of the large potholes along SR-29. This is for the interim until our team reaches the full repaving portion of the rehabilitation project.

SR-29 is also seeing an additional project at work. Caltrans is continuing construction on the installation of new electrical equipment to improve pedestrian safety at un-signalized crosswalks around Solano County. This includes new ADA curb ramps and restriping the crosswalks around the intersections along SR-29. Additional lane closures will be utilized along the route.

This Caltrans Newsletter for Solano County will be distributed on a bi-weekly schedule
