

# San Bernardino Freeway (I-10) High Occupancy Vehicle Lane Construction Project

CARPPOOL

## I-10 PROJECTS

The San Bernardino Freeway (I-10) has experienced serious congestion while carrying a substantial amount of traffic. To address this issue, carpool lanes will be built in each direction of I-10 between the San Gabriel River Freeway (I-605) and Orange Freeway (SR-57).

The I-10 HOV project will increase the 557 lane miles of managed lane facilities in Los Angeles County, add freeway capacity, reduce congestion by encouraging carpooling, improve traffic flow, and reduce energy consumption, thereby improving air quality.

Soundwalls will be constructed to mitigate noise at various locations throughout the project boundaries and help improve the quality of life for residents.

### Segment 1 Project Facts

From I-605 to Puente Ave.

- Project Limits: 2.1 miles
- Total Cost \$165 million
- **Completed**

### Segment 2 Project Facts

From Puente Ave. to Citrus St.

- Project Limits: 4.1 miles
- Total Cost \$193 million
- Begin Constr. Summer, 2014
- End Constr. Spring, 2019

### Segment 3 Project Facts

From Citrus St. to SR-57

- Project Limits: 5.2 miles
- Total Cost \$195.25 million
- Begin Constr. Spring, 2016
- End Constr. Summer, 2021
