# 1. Introduction

The California Department of Transportation (Caltrans) is undertaking the most ambitious 10-year highway repair program the state has seen in generations, improving conditions of highway infrastructure assets, enhancing operations of the system, providing more transportation mode choices, and adapting to climate impacts. These transformative changes are made possible through increases in federal funding under the *Infrastructure Investment and Jobs Act (IIJA)*, *Bipartisan Infrastructure Law (BIL)*, signed into law in late 2021, in combination with the increase in state transportation funding through SB 1, the *Road Repair and Accountability Act of 2017*.

The Ten-Year Project Book (Project Book) shows how Caltrans plans to achieve its “fix-it-first” priority, while aligning state transportation infrastructure investments with the state climate, health, and social equity goals, as put forth in the *Climate Action Plan for Transportation Infrastructure (CAPTI)*. The Project Book provides a list of the individual projects being planned that are needed to restore the SHS to a condition that meets the performance targets established under SB1 for 2027, and how these conditions will be maintained through 2033 and beyond.

The Project Book is a natural extension of Caltrans’ asset management framework, presented in the *California Transportation Asset Management Plan (TAMP)* and implemented with the *State Highway System Management Plan (SHSMP)*. These two plans, founded on principles of performance management, form the basis to prioritize projects based on their contribution to the overall health of State Highway System (SHS) and its many component parts. The TAMP and SHSMP articulate performance targets established by federal and state legislation and action by the California Transportation Commission (Commission).

There are over **\$53.7 billion** worth of individual projects in the Project Book spanning this 10-year period, all part of Caltrans’ fix-it-first program, known as the SHOPP (State Highway Operation and Protection Program). The SHOPP is supported by state and federal taxes and fees on vehicle fuels with about a third of the funds coming from SB1.

## 1.1 First Five Years of Projects

The projects in this Project Book are at various stages of development through the end of the quarter. Those in the first five years (expected to be advertised for construction now through 2028) have completed or are near complete with formal planning and are currently being designed or are expected to begin design in the next few years. Most have funding approval from the Commission for one or more phases of the project. These projects are well defined but could still require changes in scope, cost, or schedule as they go through the environmental and design processes.

## 1.2 Last Five Years of Projects

Most of the projects in the last five years are undergoing formal planning efforts or at the concept stage. They are typically less defined than the projects in the first five years. They tend to be in a stage of development during which stakeholder input can best be incorporated. These projects typically won’t have Commission funding approval at this stage of development. Projects showing construction advertisement years beyond 2030 are considered conceptual and have the greatest potential for change. These longer-range projects reflect our best prediction of necessary investment over a longer time horizon. These projects won’t have Commission funding approval.

### 1.3 Projects Evolve Over Time

The project development process is subject to many factors that could change the scope, cost, or schedule of projects. They could be replaced by other projects that better respond to changing needs or shifting priorities. For these reasons the Project Book is expected to evolve over time with each quarterly publication.

### 1.4 What Is Included in the List of Projects?

The Project Book lists the project number, project location, general nature of the work, current total cost estimate, and expected advertisement year in a single line for each project. The projects are sorted by District, then by county, and then by ascending route, year, and SB1 eligibility. Projects that are identified as SB1 priorities may include full or partial SB1 funding.

The Project Book summarizes projects by their main activity and performance objective, as defined in the SHSMP and listed below. Projects frequently include other activities beyond the main activity. For instance, Pavement projects can also include work in ADA Pedestrian Infrastructure, Bicycle and Pedestrian Infrastructure, Signs, and Lighting.

- ❑ **Pavement:** Pavement on Class I, II, and III Roadways
- ❑ **Bridge:** Bridge and Tunnel Health, Bridge Scour Mitigation, Bridge Seismic Restoration, Bridge Goods Movement Upgrades
- ❑ **Drainage:** Drainage Restoration, Drainage Pump Plants
- ❑ **Mobility:** Transportation Management Systems (TMS), ADA Pedestrian Infrastructure, Operational Improvements, Weigh-in-Motion scales (WIM), Commercial Vehicle Enforcement Facilities (CVEF)
- ❑ **Safety:** Proactive Safety, Reactive Safety
- ❑ **Signs and Lighting**
- ❑ **Major Damage:** Major Damage Emergency Restoration, Permanent Restoration
- ❑ **Protective Betterments:** Roadway Protective Betterments
- ❑ **Sustainability:** Zero Emission Vehicle (ZEV) Infrastructure, Fish & Wildlife Connectivity
- ❑ **Climate Adaptation & Resilience**
- ❑ **Stormwater**
- ❑ **Bicycle and Pedestrian Infrastructure**
- ❑ **Roadside:** Roadside Rehabilitation, Safety Roadside Rest Area (SRRA) Rehabilitation
- ❑ **Facilities:** Transportation Related Facilities (TRF), Office Buildings
- ❑ **Advance Mitigation**
- ❑ **Relinquishment**

The intent of this publication is to raise awareness of planned future projects, not to provide detailed project information. Each of the Caltrans districts maintain project level websites that provide detailed project information in their jurisdiction (<https://dot.ca.gov/programs/asset-management/caltrans-project-portal>). In addition, an interactive map-based version of the Project Book with additional project-specific details and data downloads can be found on the Caltrans website (<http://projectbook.dot.ca.gov/>).

### 1.5 A Fiscally Balanced and Performance Driven Portfolio

The Project Book was developed by the districts under the following requirements:

- Each District’s project portfolio performance meets or exceeds the Asset Management performance objective targets for newly planned years in the last 5-years.
- Each District’s proposed project portfolio is financially constrained and balanced for newly planned years in the last 5-years.

Caltrans uses this Project Book to improve transparency by providing a roadmap to achieve performance targets. The information contained in the Project Book improves awareness and collaboration on transportation projects leading to better overall asset management for the people of California.

## 2. Project Book Summary

The statewide project portfolio is comprised of a total of **2,173 projects** with a total project cost of over **\$53.7 billion**. Table 1 and Table 2 provide summaries by activity and fiscal year. Table 3 summarizes Senate Bill 1 (SB 1) priority activities. Table 4 presents a summary of the District’s project portfolios by Metropolitan Planning Organization (MPO), Regional Transportation Planning Agency (RTPA), and County. Figure 1 presents a County level map with the estimated total cost of projects within each county. Figure 2 presents the performance for all projects in the Project Book for the four primary asset classes – pavement, bridge, drainage, and transportation management systems. Table 5 presents the complete list of projects in the Project Book.

Table 1 – Activity Summary by Project Costs (\$K)

Activity	Advertised Years										Long Lead*	Grand Total (\$K)
	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33
