

Building Information Modeling for Infrastructure (BIM4I) Program Roadmap

to better connect **people** with **data** and **workflows** for improved **outcomes**

September 2026

BIM4I streamlines how **people** create, manage, share, and use information. It strengthens **data** management and **workflows** to improve the quality of deliverables. The **outcome** is reliable, shared information to deliver, operate, and manage transportation assets.

BIM4I better connects people through innovative, efficient, and secure digital workflows. Updated standards, processes, technology, and training will empower people to collaborate more effectively, enable better decision-making, and improve safety. This enhanced coordination will improve lives and communities through transportation.

BIM4I Program Vision

Leading digital innovation by integrating BIM4I into Caltrans project delivery and asset lifecycle management practices.

BIM4I Program Mission

Develop, implement, and maintain seamless digital project delivery and asset lifecycle management processes through collaboration with stakeholders.
