NOTES:
1. ALL pull boxes must be 40% SIZED unless otherwise shown.
2. FOR ACCURATE RIGHT OF WAY DATA, CONTACT RIGHT OF WAY ENGINEERING AT THE DISTRICT OFFICE.

This is one of four examples depicting a proposed CCTV system in the same location with varying existing conditions.
In this scenario, there are existing lighting and sign illumination systems with a service. The service and some of the concepts and pull boxes will become components shared with the new CCTV system. The service is being added to the 2015 standard bid item (8.60) and is being added to existing meters. If the modifications supporting CCTV do not also support the modifications, consider including both the modifications and addition in the bid item modifying Existing Electrical System.

Closed Circuit Television is an example of an electrical system that often cannot be nonstandard bid item with supporting specifications. This is because of multiple new electrical systems. The same requirements for standard bid items apply to nonstandard bid items.
