Each detail must have a name or designation for both, body. Typical loop spacing

For detailed, on ED-10 (2010) and/or ED-1 on a.

Noted that a line on the same plan sheet, the collective or legend entry must include the sheet identification and number on which the detail is shown (e.g. "Details, see sheet ED-10). Put fiber assignment tables on electrical

Standard drawings from other agencies, when referenced in the project, must be included as part of the project plans referring to standard drawing numbers from another agency is not acceptable. Identify which bid item includes payment for the work involved. Refer to Section 2-1.5 Standard drawings from Other Agencies for further information.

Electrical details are project specific details for work shown on the electrical systems sheets that are not included in the Standard Plans. Refer to Section 2-2.6 Construction Details for further information. A modified standard plan or a combination of standard plan details must be shown and labeled as a modified detail. Provide sufficient dimensioning and limits for the modified detail so that quantities involved are calculable. See Section 2-1.5 Use of Standard Plans.

If a detail includes dimensions, the statement "NO SCALE" is typically added below the name of the detail unless a scale is desired. If a detail has no dimensions (e.g. a schematic wiring diagram), the statement "NO SCALE" is necessary. If all details on one electrical systems details plan sheet do comply with either of the aforementioned cases, inclusion or absence of the statement "NO SCALE" applies to the entire electrical details sheet.
