STAGE CONSTRUCTION AND TRAFFIC HANDLING PLAN, EXAMPLE "70 SC-5"

The main purpose of "Stage Construction" plans is to show areas of work (construction activity) and show没错， ships at all the areas of work. Points to be noted in the stage and on vehicular directional arrows within lanes as needed.

Refer to DBB 91 Section 5 for additional PWP devices information.
Offset distances to the PWP devices from the edge of the roadway should be in compliance with the PWP barrier's recommended/approved standards.
DBB 91 Section 5’s Mobile Barrier System and Impact Attenuator Vehicle information is not usually present in these plans.
