Bridge Design Details 4.1 October 2019

Deck Contours

A DECK CONTOURS sheet shall be included in the contract plans for all new structures. As a rule, deck contours should not be included for bridge decks that are to match an existing structure profile or cross-slope, such as a widening or deck replacement.

Plan

1. Place the deck contours at the top of the sheet and orient it in the same direction as the PLAN view shown on the GENERAL PLAN sheet.
2. Show North arrow.
3. The preferred scale is 1” = 20’. Small structures may be shown at maximum 1” = 10’. Do not fill up the sheet with smaller scales.
4. If the bridge is long, and continuation is needed, identify with match line(s). Match lines are often used on a single sheet for longer bridges. Using match lines does not necessarily mean there will be additional sheets.
5. Extend contours 10 feet beyond the edge of deck and 10 feet beyond the Beginning/End of Bridge (BB/EB), end of wingwall, or approach slab, whichever is farthest.
6. Dimension distances from alignment to both edges of deck.
7. Verify that the deck contours are drawn correctly. Spot check them in several places along the alignment, including at BB/EB, the end of approach slabs, drain inlets, the low point/high point of the structure, and a few other random locations.
8. For structures that are to receive a deck overlay such as HMA or Polyester Concrete Overlay, the contours shall be drawn at the top of the concrete deck. A note shall be included to indicate the location of the contours.

Example: Contours are shown at top of concrete deck. Grades have been lowered 1” below the Profile Grade for polyester concrete overlay.

9. Note contour interval and that camber is not included.
10. Label alignment, stations, edges of deck, and centerlines of abutments and bents. Do not include curve or other alignment data.
11. Show wingwall and retaining wall layout lines.
12. If the super elevation changes within the bridge, approach slab, or retaining wall limits, a SUPERELEVATION DIAGRAM shall be included.

13. The GENERAL NOTES and QUANTITIES may be placed on this sheet when space is not available on the GENERAL PLAN sheet.
Figure 4A.A.1 Deck Contours Detailing Example 1
Figure 4A.A.3 Deck Contours Detailing Example 3
Figure 4A.A.4 Deck Contours Detailing Example 4

NOTE:
1. Contours do not include grout or forework settlement.
2. C.C. contour intervals shown:
   - 6" intervals along station line.

SUPERELEVATION DIAGRAM
NO SCALE
Figure 4A.A.5 Deck Contours Detailing Example 5

NOTES:
1. Contours do not include guardrail.
2. Contour interval = 0.05'.
3. 1/8" intervals along section line.

MATCH LINE, SEE "DECK CONTOURS NO. 3" SHEET

“4-Scale” Contour Sheets

Two copies of the "4-Scale" Contour sheet(s) are provided to Structure Construction during EXPEDITE as a part of the Resident Engineer Pending File. “4-Scale” Contours sheet(s) are used by contractors during construction to determine the location of structure components (e.g., deck, soffit elevations, etc.). These sheets are critical in determining the layout and extent of falsework that is required for a structure. A copy of the "4-Scale" Contour sheet(s) is also used by the Structure Representative to verify that the structure is being built correctly and to the correct elevations.

The following guidelines should be observed, in addition to the items listed for the DECK CONTOUR plan sheet(s) in Bridge Design Details: 4-1 Deck Contours.

1. The “Deck Contours Label” cell shall be placed on each “4-Scale” sheet. If the plot is 6 feet or longer, the label shall be placed at each end of the sheet.

2. The “4-Scale” sheet(s) shall be plotted using (¼" = 1'-0").

3. If a structure is too wide to fit on a standard plot (22" wide), a match line should be utilized. Normally this match line is placed along an alignment or other controlling layout line.

4. Once the plots are made you MUST check the accuracy of the contours drawn and the scale of the plots in both the “X” and “Y” directions. Image scale adjustments may be required due to distortions by the printing process.
