NOTES:
1. Rolling assembly except chain link fabric to be galvanized after fabrication
2. Rolled end conform to horizontal and vertical alignment. Post must be vertical. Horizontal angle must be bent to conform to horizontal alignment if radius is 150'-0" or less.
3. Horizontal angle shall be continuous over not less than two intermediate posts, except that a shorter length is permitted of expansion joints and other roll discontinuities.
4. When railing is placed on curved horizontal alignement with radius of 150'-0" or less, install a 1½" x 3" deep hole in slab and set in epoxy adhesives.
