

## Revision Log for Overhead Signs and Electrical Systems

Implementation Date: January 2026

- To align with the updated *Geotechnical Design Reports* module and *Foundation Reports for Bridges* module, the Reporting section was updated to include:
  - Reporting specifics for the Analysis and Design section of the PGDR, GDR, PFR, and FR.
  - Reporting specifics for the Recommendations section of the PGDR, GDR, PFR, and FR.
- Editorial updates to the Investigations section to achieve consistency among all design modules.
- Updated references to 2024 Standard Plans.

Implementation Date: October 2024

- Remove discussion and reporting of wet CIDH construction methods.

Implementation Date: September 2022

- Added investigation, design, and reporting for Electrical Systems to the module.
- Updated tables and references to be consistent with current standard plans.
- Added guidance for non-standard ground conditions.
- Added Foundation Design Recommendations table in the reporting section for inclusion when special design are recommended.

Implementation Date: December 2020

- Updated minimum soil strengths used for design
- Updated references to Standard Plans and Revised Standard Plans
- Removed references to “Reference Sheets” as they have been deleted
- Removed example memo
- Editorial updates

Implementation Date: December 2014

- First Version
