

Revision Log for Sound Walls

Implementation Date: January 2026

- To align with the updated *Geotechnical Design Reports* module, the Reporting section was updated to include:
 - Reporting specifics for the Analysis and Design section of the PGDR and GDR.
 - Reporting specifics for the Recommendations section of the PGDR and GDR.
- New section: *Design Considerations: Sound Walls with Liquefaction and Lateral Spreading*
- Editorial updates to the Investigations section to achieve consistency among all design modules.

Implementation Date: December 2020

- Update references to Standard Plans
- Revised sampling and testing requirements for non-saturated cohesive soil
- Removed SPT/Friction Angle (ϕ) table as it is now located in the *Soil Correlations* module
- Requires special design for saturated cohesive soil
- Removed all text related to design in saturated cohesive soil

Implementation Date: July 2010

- First Version
