CALIFORNIA DEPARTMENT OF TRANSPORTATION

AUTHORIZED MATERIAL LIST FOR TYPE A AND AL JOINT SEALS

The following Type A and AL joint Seals have been authorized for use when specifications require use of a Type A and AL joint seal. Typical uses are filling joints in concrete structures, and can be used in new construction or repair and maintenance of existing expansion joints. This sealant is referenced in Section 51-2.02B of the 2018 Caltrans Standard Specifications.

Manufacturer	Product	Reauthorization Date
Watson Bowman Acme	Wabo Silicone Sealant	10/2022
Sika Corporation	Sikasil 728 RCS	10/2022
The Dow Chemical Company	902 RCS	10/2022

The information contained herein, shall not be used for advertising purposes, nor is it an endorsement by the California Department of Transportation (Caltrans).

Evaluation Criteria: Instructions on how material is placed on the Authorized Material List (AML) can be found in the Authorization Requirements, and Acceptance Criteria for Type A and AL Joint Seals.

If you have questions about this AML, please contact the Caltrans Chemistry Branch by e-mail sent to <Chemistry.Branch@dot.ca.gov>.
