Electrical Service for Pumping Plants

The contract "Special Provisions" specify the requirements for furnishing electrical service to pumping plants and also specify the provisions for handling the electrical service charges. Generally, the service charges become the obligation of the State upon acceptance of the contract, but may become the State's obligation at some other time during the life of the contract if so specified in the "Special Provisions".

The Structure Representative must notify the District Resident Engineer, so that he may notify the District Office sufficiently in advance to allow time for making arrangements with the utility company for continuing, changing, or discontinuing the service.
