Acknowledgements

The 2026 edition of the *Building Construction Manual* was updated by a group of dedicated Senior Bridge Engineers from Structure Construction (SC).

The redevelopment of this manual was made possible through the collaboration of SC Technical Team H – Buildings, Soundwalls & Other Transportation Structures. The team worked closely with several Caltrans functional units whose contributions were essential to the completeness and accuracy of this manual. SC extends its appreciation to the Office of Transportation Architecture; the Office of Electrical, Mechanical, Water and Wastewater; and the Office of Strategic Quality Management – Structures Independent Quality Assurance for their invaluable support.

Special appreciation goes to Roy Auer, P.E.; Cheryl Poulin, P.E.; and Barbora Rejmanek for their thorough review and editorial guidance. Their efforts helped maintain a professional and consistent presentation and provided the tools and support necessary to bring this manual to publication.

Signed,

JOHN LAMMERS
Deputy Division Chief
Structure Construction
