

Caltrans Air Quality Research – Division of Transportation and Planning

Overview

The [Division of Transportation Planning \(DOTP\)](#) funded most of the studies since about 2000 that are included in the [UCD/Caltrans Air Quality Project](#) collection. Since the close of the Air Quality Project, DOTP has worked mainly through the [Division of Research, Innovation, and System Information \(DRISI\)](#) process and with [NCHRP and AASHTO](#). DOTP staff members have also participated in panels and working groups for research and technical assistance projects in the [Division of Environmental Analysis \(DEA\)](#). DOTP did not originate new air quality research projects of its own after about 2010.
