

Establishing Safety Performance Targets for California

Per MAP-21 and the FAST Act (23 USC 148(i)), the State must set safety performance targets on a statewide basis beginning in 2017.

November 28, 2016 and December 12, 2016

Please hold these two important dates so you can participate in discussions to set Safety Performance Targets for the State of California. Our goal is to achieve a significant reduction in traffic fatalities and serious injuries on all public roads.

On **November 28, 2016** FHWA and Caltrans will host an educational workshop to help participants understand the state and federal processes for setting safety performance targets. This full-day session will be held in Sacramento at:

Caltrans Headquarters Board Room (in basement)

1120 N St.

Sacramento, CA 95814

On **December 12, 2016** Caltrans will host a full-day workshop in Sacramento to educate and engage stakeholders in discussions regarding establishing California's statewide safety performance targets. Location to be announced.

We hope you or your representative will be able to participate. Though not required, participation in both sessions is strongly encouraged. For those who cannot attend in person, we will provide a conference line and web link to support remote participation.

Workshop agendas and more logistical details will be coming soon.

If you have questions or if this message was forwarded to you and you would like to be added to the email list please contact John Ensich, Safety Monitoring Specialist at john.ensch@dot.ca.gov.
