Serious drought. Help save water!

February 13, 2017

Ms. Diane Boyer-Vine Legislative Counsel State Capitol, Room 3021 Sacramento, CA 95814

Mr. Daniel Alvarez Secretary of the Senate State Capitol, Room 3044 Sacramento, CA 95814

Mr. E. Dotson Wilson Chief Clerk of the Assembly State Capitol, Room 3196 Sacramento, CA 95814

Dear Ms. Boyer-Vine, Mr. Alvarez, and Mr. Wilson:

I am pleased to submit the California Department of Transportation's (Caltrans) fourth of five reports on the Project Initiation Document (PID) Program. Caltrans is legislatively mandated through supplemental reporting language in the Supplemental Report of the 2013–14 Budget package (Item 2660-001-0042) to provide a report on Caltrans' PID Program workload to the Senate Budget and Fiscal Review Committee, the Assembly Committee on Budget, the Legislative Analyst's Office, and the Department of Finance no later than January 31 of each year for five years beginning in 2014.

Distribution to the California State Legislature has been made by Caltrans pursuant to California Government Code section 9795. This report can also be found at www.dot.ca.gov/reports-legislature.htm.

Sincerely,

MALCOLM DOUGHER

Director

Serious drought. Help save water!

February 13, 2017

Chair, Joint Legislative Budget Committee 1020 N Street, Room 553 Sacramento, CA 95814 Attention: Ms. Peggy Collins

Dear Chair:

I am pleased to submit the California Department of Transportation's (Caltrans) fourth of five reports on the Project Initiation Document (PID) Program. Caltrans is legislatively mandated through supplemental reporting language in the Supplement Report of the 2013–14 Budget Package (Item 2660-001-0042) to provide a report on Caltrans' PID Program workload to the Senate Budget and Fiscal Review Committee, the Assembly Committee on Budget, the Legislative Analyst's Office, and the Department of Finance no later than January 31 of each year for five years beginning in 2014. This report provides a summary of the PID Program for Fiscal Year 2015–16 from July 1, 2015, through June 30, 2016.

Distribution to the California State Legislature has been made by Caltrans pursuant to California Government Code section 9795. This report can also be found at www.dot.ca.gov/reports-legislature.htm.

Sincerely,

MALCOLM DOUGHERT

Director

Serious drought. Help save water!

February 13, 2017

Mr. Michael Cohen Director Department of Finance State Capitol, Room 1145 Sacramento, CA 95814

Dear Mr. Cohen:

I am pleased to submit the California Department of Transportation's (Caltrans) fourth of five reports on the Project Initiation Document (PID) Program. Caltrans is legislatively mandated through supplemental reporting language in the Supplement Report of the 2013–14 Budget Package (Item 2660-001-0042) to provide a report on Caltrans' PID Program workload to the Senate Budget and Fiscal Review Committee, the Assembly Committee on Budget, the Legislative Analyst's Office, and the Department of Finance no later than January 31 of each year for five years beginning in 2014. This report provides a summary of the PID Program for Fiscal Year 2015–16 from July 1, 2015, through June 30, 2016.

Distribution to the California State Legislature has been made by Caltrans pursuant to California Government Code section 9795. This report can also be found at www.dot.ca.gov/reports-legislature.htm.

Sincerely,

MALCOLM DOUGHERTY

Director

Executive Summary

The California Department of Transportation (Caltrans) is pleased to provide the fourth of five annual reports, with the third full year of reporting, about the Project Initiation Document (PID) Program workload to the California State Legislature.

Caltrans expended \$52,374,213 of its \$62,195,000 Fiscal Year (FY) 2015–16 PID Program allocation to deliver 242 PIDs and begin work on 418 PIDs that will carry over into FY 2016–17. Of the completed PIDs, 217 PIDs are for projects that will be funded through the State Highway Operation and Protection Program (SHOPP) and 25 PIDs for State-sponsored and local-sponsored projects for the State Transportation Improvement Program (STIP) and other non-SHOPP funding sources.

Over the three-year period of FY 2013–14 through FY 2015–16, during which time PIDs were developed primarily for the 2014, 2016, and 2018 programming cycles, Caltrans cumulatively completed a total of 1,091 PIDs: 985 PIDs for SHOPP projects and 106 PIDs for State-sponsored and local-sponsored projects for STIP and other non-SHOPP funding sources. The average work effort to complete all PIDs is 0.59 Person Year (PY) per PID.

The PID Program has successfully delivered PIDs for State-sponsored and locally sponsored projects over the course of three years. During this period, the number of PIDs delivered each year has declined. A reduced number of State Highway Administration (SHA) and Reimbursement positions will be necessary to deliver the PID Program's non-SHOPP workload in the future. Through the BCP process, the PID Program will request an overall staffing reduction of 30 positions and \$4.16 million to align with future workload.

Caltrans remains committed to exploring new approaches and process improvements to enhance cost efficiencies within the PID Program and balance intelligent risk with sound engineering judgment. The two main streamlining techniques being utilized are Small Capital Value Projects (SCVP) and Project Initiation Report (PIR) PID documents. The streamlining commitment is further supported by the fact that more than 47 percent of the three-year SHOPP workload was completed as a SCVP or PIR PID type.

Although the PID Program has captured savings by using the SCVP, Caltrans is realizing negative impacts to scope, cost, and schedule in later phases of project development from its use. As Caltrans shifts to Asset Management, the number of PIR SHOPP PIDs will increase due to increased complexity of multi-objective projects, and the number of SCVP PIDs will decrease as they are used appropriately for less complex projects and incorporated into the PIR process.

The PID Program is subject to three new mandates that will impact the PID workload. The PID Program is required to:

- Consider climate change and include greenhouse gas (GHG) infrastructure carbon estimates in PID documents.
- Develop PIDs for multi-objective Asset Management projects.
- Include complete streets elements in PID development.

Because the PID Program is unable to quantify the resource impact of addressing these new mandates at this time, it will do so within existing staffing levels until data has been collected to substantiate a different request.

Background

Statutory Reference and Purpose

The PID report provides a summary of:

- Type of PIDs produced. (Table 5, Table 8 and Table 9)
- Level of work effort estimated to develop the PIDs by FY and the associated costs.
 (Table 2, Table 5, Table 8 and Table 9)
- Actual level of work effort expended by FY to develop the PIDs and the associated costs.
 (Table 2, Table 5, Table 8 and Table 9)
- Estimated total capital and support costs of the project prior to development of the PID. (Tables 4 and Table 7)
- Estimated total capital and support costs of the project estimated in the completed PID documents. (Table 4 and Table 7)

This report was prepared in accordance with the Supplemental Reporting Language of the 2013 Budget Act and provides a summary of PID development in FY 2015–16. Detailed tables with the above information are included as part of this report.

PID Program Background

A PID is required to be developed and approved by Caltrans before a capital project can be programmed and constructed on the State Highway System (SHS). The PID is designed to ensure a more predictable path through the planning process into project programming and delivery. A PID provides engineering details that document the scope, cost, and schedule of a project for programming transportation funds. PIDs are essential to successful project delivery because they help Caltrans identify risks and limit cost overruns and project delays. PIDs are also used to optimize transportation funds by ensuring only feasible projects move forward into capital project development. The Caltrans PID workload is divided into two areas: (1) SHOPP PIDs and (2) State-sponsored and local-sponsored (non-SHOPP) PIDs.

Caltrans is responsible for maintaining and operating the approximately 50,000 lane-mile California SHS, which serves as the backbone of California's transportation infrastructure. SHOPP PIDs are developed to deliver priority capital projects with the purpose of addressing collision reduction, major damage restoration, bridge preservation, roadway preservation, roadside preservation, mandates, mobility improvement, and facility improvement needs on the State Highway System. All SHOPP PIDs must address projects in the approved financially constrained Ten-Year SHOPP Plan. Once the PIDs are completed, the projects are programmed into the four-year SHOPP Program and delivered through the Capital Outlay Support Program.

Caltrans also develops, reviews, and approves PIDs for State-sponsored and local-sponsored projects on the SHS. The workload includes a variety of projects that address transportation management systems, highway facility additions and enhancements, and highway operational improvements. All State-sponsored and local-sponsored projects must be documented in an approved Regional Transportation Plan and have an identified funding source prior to PID development.

Previous Report

The PID Program Report for FY 2014–15 was submitted to the Legislative Analyst's Office in January of 2016 representing the second full year of data being reported. The PID Program Report for FY 2014–15 illustrated trending cost savings and gains in efficiency.

The FY 2014–15 report concluded that over the two-year period of FY 2013–14 and 2014–15, Caltrans continued streamlining efforts and realized cost savings in the PID Program. On average, Caltrans reduced the cost of completing a PID across all major project types when compared to planned estimates. During the two-year period, Caltrans cumulatively completed a total of 861 PIDs with an average work effort to complete all PIDs of 0.55 PY per PID. This average is consistent with the expected range.

The second full year of data documented that multiple streamlining techniques produced quantitative benefits. Caltrans continued efforts to realize efficiencies in the PID Program through the implementation of streamlining techniques such as the use of SCVP and PIR PID types.

New Mandates Impacting PID Program

Caltrans PID Program is subject to three new mandates that will impact the SHOPP PID workload. Caltrans is now required to: 1) Consider climate change and include GHG infrastructure carbon estimates in PID documents, 2) Develop PIDs for multi-objective Asset Management projects, and 3) Include complete streets elements in PID development.

- Climate Change and GHG Carbon Estimates: Senate Bill 32 (Pavley, Chapter 249, Statutes of 2016) requires the State Air Resources Board to reduce statewide emissions of greenhouse gases by 40% below 1990 levels by 2030 and consider climate change mitigation/adaptation in planning and investment decisions. Caltrans will need to consider climate change in PID development and include GHG infrastructure carbon estimates to be programmed in the 2018 and 2020 SHOPP cycles. The PID Program is using the Federal Highway Administration Infrastructure Carbon Estimator Tool to quantify lifecycle GHG emissions for SHOPP projects during PID development. This tool is designed to allow users to create preliminary estimates of GHG emissions using planning-level data.
- <u>Asset Management</u>: Federal regulations and Senate Bill 486 (DeSaulnier, Chapter 917, Statutes of 2014) require Caltrans to adopt a Transportation Asset Management Plan by 2020. This requires the PID Program to shift from developing PIDs for single to multi-objective projects. An Asset Management pilot is underway to develop nine PIDs for multi-objective projects. A PID for a project that would traditionally focus on bridge work may now address culvert rehabilitation, adding a bike lane, and fish passage improvements. By combining several SHOPP projects into one, Caltrans may capture economies of scale by reducing the number of PIDs needed.
- <u>Complete Streets</u>: In order to comply with Executive Order B-30-15, the PID Program is emphasizing Deputy Directive 64-R2 in the PID Phase. Deputy Directive 64-R2 requires Caltrans to provide for the needs of travelers of all ages and abilities in all planning,

programming, design, construction, operations, and maintenance activities and products on the SHS. PIDs developed for the 2018 and 2020 SHOPP cycles must document the consideration of complete streets elements. This effort requires additional analysis and extensive collaboration with local and regional agencies to develop projects that consider all modes of travel. Adding complete streets elements, such as a sidewalk or bike lane to a project, can require right of way acquisition and environmental considerations, increasing the effort needed to complete each PID.

Because the PID Program is unable to quantify the resource impact of addressing these new mandates at this time, it will do so within existing staffing levels until data has been collected to substantiate a different request.

PID Program Accomplishments

Caltrans is committed to effectively and efficiently managing PID Program resources, to continuously identify strategies to improve PID development, and to seek innovative ways to improve the value and effectiveness of the PIDs. The most notable innovation in recent years has been the expanded use of the SCVP SHOPP PID template and a pilot program to begin exploring use of the new PIR SHOPP PID template.

Small Capital Value Project PID

The SCVP SHOPP PID template was originally intended for all low-risk, non-complex candidate projects. In FY 2013-14, use of the SCVP SHOPP template was expanded to all non-complex projects with the expectation of being able to complete PIDs for these projects using an average of 0.30 PY - a significant savings when compared to the average of 0.50 PY for all PID types completed in the prior year. Over the three-year reporting period, 345 SCVP PIDs have been completed using an average of 0.30 PY, in line with the historic average.

Although the PID Program has captured savings by using the SCVP, Caltrans is realizing negative impacts to scope, cost, and schedule in later phases of project development. A recent analysis of project change requests generated in later phases of project delivery has determined that the SCVP should not be used on complex projects involving utilities, right of way, and environmental risks. The SCVP does not provide the resources needed to adequately assess complex risks. The negative impacts of not fully assessing these risks results in changes to project costs, delays, and inefficient use of programming capacity.

Project Initiation Report Pilot Program

In FY 2013–14, the concept for the PIR was developed to create more consistency and autonomous decision-making in the process to develop SHOPP PIDs. The PIR is a PID that consolidates multiple SHOPP PID formats and utilizes a progressive three-tier structure based on the complexity of the project and level of acceptable risk. The lowest level (Level I) is similar to the existing SCVP PID document used for non-complex projects. The highest level (Level III) addresses SHOPP projects of the highest complexity, risk, and resource needs.

The PIR PID should provide the flexibility needed for Caltrans to transition to multi-objective Asset Management SHOPP projects by allowing the project engineer, in consultation with a project development team, to select the level of analysis needed based on components in each project based on the level of acceptable risk associated with that individual project. The PIR improves the development of SHOPP PIDs by promoting consistency and flexibility in PID development that will support the multi-objective Asset Management based projects.

In FY 2014–15, seven Caltrans districts began to use the PIR format to develop 47 SHOPP PIDs in an initial pilot project to evaluate the effectiveness of the new format for statewide implementation. The PIR pilot was expanded to all Caltrans districts for FY 2015–16, during which 69 PIRs were completed.

The PIR PID is performing in line with expectations, having an average work effort of 0.74 PY over the two-year pilot period that is within the expected work effort range. The PID Program will continue to analyze the PIR's effectiveness to determine how the document can be improved before final implementation in FY 2016–17.

As Caltrans shifts to Asset Management, it can be anticipated that the number of PIR SHOPP PIDs will increase to address complex multi-objective SHOPP projects, and the number of SCVP PIDs will decrease as it is used more appropriately in an effort to limit Project Change Requests in later phases of project development.

FY 2015-16 PID Program Summary

During FY 2015–16, Caltrans expended 342 PYs of the 362 PYs allocated and \$52,374,213 to complete 242 PIDs and begin work on 418 PIDs that will carry over into FY 2016–17. The 242 completed PIDs include 217 PIDs for SHOPP projects and 25 PIDs for State- and local-sponsored non-SHOPP projects for a total project value of \$7.16 billion. The PIDs produced during FY 2015–16 will ultimately lead to projects that will preserve and enhance the SHS, improve safety and mobility for both travelers and highway workers, and sustain and support California's economy.

Table 1 provides a breakout of the FY 2015–16 PID Program allocation and expenditures by primary PID type, carryover work, and associated technical and management support. The difference between the allocated amount of \$62,195,000 and the expended amount of \$52,374,213 is primarily due to less reimbursement work than was anticipated. As shown in Table 1, the PID program received an allocation of \$9,059,000 in reimbursement authority, but expended a total of \$3,131,037 to develop local-sponsored PIDs on a reimbursed basis. This is due to the fact that reimbursed PID work requested by the local agencies at the time of

submittal of the PID Program's BCP does not materialize due to changing priorities at the regional/local level.

Management and technical support expenditures shown in Table 1 total \$9,918,419, exceeding the \$8,400,000 allocation that the PID Program received for FY 2015-16. This is because Management Support expenditures reflect resources used to implement improved project performance tracking and reporting measures in preparation for asset management implementation. Additionally, Technical Support expenditures reflect additional coordination effort associated with the consideration of complete streets components in SHOPP projects.

Table 1–Summary of PID Program (FY 2015–16)

PID Workload Type	2015–16 Budget Allocation	2015–16 Actual Expenditures
Completed SHA PIDs	¢44.726.000	\$17,459,194
Carry Over SHA PIDs	\$44,736,000	\$21,865,564
Completed Reimbursement PIDs	¢0.050.000	\$ 1,021,952
Carry Over Reimbursement PIDs	\$9,059,000	\$ 2,109,085
Management Support	¢9.400.000	\$ 7,086,285
Technical Support	\$8,400,000	\$ 2,832,134
Total	\$62,195,000	\$52,374,214

Caltrans completed a total of 1,091 PIDs over the 3-year period of FY 2013–14 through FY 2015–16. The average work effort to complete all PIDs in the program is 0.59 per PID. Table 2 provides a summary of the PID workload over the three FYs.

Table 2-Three Year Completed PIDs Summary (FY 2013-14 through 2015-16)

Completion FY	Number of Total Projects Completed	Average Planned Cost to Complete the PID (\$)	Average Actual Cost to Complete the PID (\$)	Average Planned Cost to Complete the PID (PY)	Average Actual Cost to Complete the PID (PY)
13–14	333	\$89,099	\$82,736	0.66	0.40
14–15 ¹	516	\$98,104	\$94,230	0.66	0.65
15–16	242	\$97,410	\$110,865	0.64	0.74
Total ²	1091	\$95,201	\$94,412	0.65	0.59

- 1) Number of completed PIDs differs from the FY 2014-15 annual report because ten PIDs were completed as Supplemental PIDs in FY 2015-16. These projects are now displayed as FY 2015-16 completed PIDs.
- 2) Average of all completed SHOPP and Non-SHOPP PIDs in the attached workload.

The number of completed PIDs in FY 2015-16 was lower than previous years for the following reasons:

- FY 2015-16 represents the first year of the two-year period of PID development for the 2018 SHOPP cycle. The number of PIDs delivered in the first year is typically lower with more complex PIDs carrying over into the second year.
- In many cases, PID delivery was deferred to FY 2016-17 to accommodate mandates such as complete streets and greenhouse gas emission analysis.

In FY 2015-16, the average planned cost to complete a PID was 0.64 PY and the actual average cost to complete a PID was 0.74 PY. There were multiple factors contributing to the difference between the planned and actual cost to complete a PID including:

- Changes to federal requirements for pavement projects requiring additional unanticipated work in PID development. This additional work includes adding ADA and bus stop improvements to project scope for projects in urban areas, and performing safety screen inspections.
- Expansion of the PIR Pilot requiring resources to be estimated without established historical data
- Development of PIDs for multiple complex projects which had increased scope and unanticipated resource needs such as the High Occupancy Vehicle Lane to Express Lane conversion project in District 4.

FY 2015-16 SHOPP PID Summary

Through the two-year zero-based budget process, Caltrans received 251 SHA funded positions in FY 2015–16 to work on 451 planned PIDs identified in the 2015 Ten-Year SHOPP Plan targeted for programming in the 2016 and 2018 SHOPP cycles.

This allocation includes additional resources in both FYs 2015–16 and 2016–17 to develop a strategic SHOPP contingency PID workload comprised of pavement, bridge, mobility, and roadside projects valued at \$250 million per year for a total of \$500 million over the two-year Budget Change Proposal (BCP) cycle. The SHOPP contingency PID workload will allow Caltrans to quickly fund SHOPP projects should new revenues become available or project cost savings occur. Development of a SHOPP contingency PID workload is underway and is anticipated to be fully completed in June 2017. Caltrans will need to continue to develop contingency PIDs to optimize the use of all available funding. Caltrans continues to benefit from competitive contractor bids which free up available resources to program contingency PIDs.

The BCP workload is compiled over a year in advance of when the PID development work actually takes place. Due to the long lead time, the BCP workload plan is refined prior to PID development to reflect current reprioritization or newly identified SHOPP projects to address capital maintenance and preservation needs. Although the workload was reprioritized at the start of the fiscal year, the types of projects or PIDs planned to be developed did not change significantly from the BCP workload. Table 3 details the delivery of the reprioritized SHOPP PID workload in FY 2015–16. Based on the reprioritized workload, Caltrans worked on a total of 534 SHOPP PIDs in FY 2015–16, completing 217 SHOPP PIDs and beginning development of 317 SHOPP PIDs that will carry over into FY 2016–17.

The delivery of 217 SHOPP PIDs represents a significant decrease from the number of PIDs delivered in recent years, while the 317 SHOPP PIDs carrying over to FY 2016–17 is an increase compared to the number of carryover SHOPP PIDs in prior years. For comparison, in FY 2013–14, the first year of the previous two-year PID development cycle, the PID program was able to deliver 295 SHOPP PIDs with 178 SHOPP PIDs carrying over into FY 2014–15. PID Program vacancies, which totaled 44 at the end of FY 2015–16, greatly impacted the delivery of SHOPP PIDs resulting in more PIDs carrying over into FY 2016–17 than anticipated.

Table 3 - Summary of SHOPP PIDs by Program (FY 2015-16)

SHOPP Program	Number of PIDs in Reprioritized FY 2015–16 Workload ¹	Number of Carryover PIDs Completed in FY 2015–16	Number of PIDs Started and Completed in FY 2015–16	Number of PIDs carrying over into FY 2016–17	Number of Planned PIDs for FY 2016-17
Bridge	102	9	17	76	85
Collision Reduction	185	37	61	87	142
Mandates	48	2	10	36	64
Mobility	37	2	13	22	46
Roadway/Roadside	115	8	40	67	109
Emergency	33	5	8	20	29
Facilities	5	0	3	2	2
Relinquishment	2	0	1	1	7
Asset Management Pilot	7	1	0	6	6
Total	534	64	153	317	490

¹⁾ Total comprises PIDs completed in FY 2015-16 and active PIDs that will carry over in FY 2016-17.

Prior to PID development, total capital project costs for the 217 PIDs were preliminarily estimated at \$2.18 billion. The total project costs identified in the completed PIDs were estimated at \$3.94 billion, as noted on Table 4. These differences validate the importance of PIDs, as they result in more effective and efficient alignment of project estimates and available capital project resources. The consequences of moving forward with these planned projects without a PID or reliable scope, schedule, and cost estimates would be potential scope changes, schedule delays, and project overruns, ultimately leading to projects being delayed or removed from the SHOPP Program.

Table 4 - Summary of Completed SHOPP PIDs by Program (FY 2015–16)

SHOPP Program	Number of PIDs Completed in FY 2015–16	Estimated Total Project Cost at Pre-PID (\$M)	Total Cost for Programming in Completed PID (\$M)
Bridge	26	\$164	\$264
Collision Reduction	98	\$364	\$580
Mandates	12	\$54	\$98
Mobility	15	\$61	\$75
Roadway/Roadside	48	\$512	\$868
Emergency ¹	13	\$982	\$2,012
Facilities	3	\$40	\$43
Relinquishment	1	\$0	\$0
Asset Management Pilot	1	\$5	\$5
Total	217	\$2,182	\$3,945

¹⁾ Includes one project estimated at \$910M and a completed PID estimate of \$1.81B. This project will be programmed over multiple SHOPP cycles, with \$125M going into the 2018 SHOPP cycle.

For the 217 PIDs completed in FY 2015–16, Caltrans planned to use an average equivalent of 0.59 positions to produce each of these PIDs and actually used an average equivalent of 0.67 positions to complete each one. These average equivalents were calculated based on individual project detail in the attached workload. Table 5 provides a summary of planned cost averages compared to actual average cost by PID type.

Differences in planned versus actual PID costs are due to variances between specific types of projects and the development of PIDs by unique staffing complements. The actual work effort and dollars expended are a reflection of the completed PID project portfolio, actual staff assigned to each PID, and the type of PID selected for each project. Because every project and staffing situation is unique, the PID Program cannot assign standardized or absolute workload norms to each PID. Therefore, the PID Program relies on work effort ranges and engineering judgment based on project complexity and risks to determine resource needs for each PID type. Depending on the project and PID type, the work effort to complete a PID can typically range from the equivalent of 0.1 PY to 1.5 PYs.

Table 5-Summary of Completed SHOPP PIDs by PID Type (FY 2015-16)

PID Type ¹	Number of Total Projects Completed	Average Planned Cost to Complete the PID (\$)	Average Actual Cost to Complete the PID (\$)	Average Planned Work Effort to Complete the PID (PY)	Average Actual Work Effort to Complete the PID (PY)	Work Effort Ranges (PY)
CAPM-PR	12	\$74,066	\$101,558	0.69	0.94	0.1 to 1.5

- 2) Average of all completed SHOPP PIDs in the attached workload.

FY 2015–16 Non-SHOPP PID Summary

Caltrans allocated 50 PYs (19 SHA PYs and 31 reimbursement PYs) in FY 2015–16 to develop PIDs and provide oversight on PID work for 126 State-sponsored and local-sponsored non-SHOPP projects that address transportation management systems, highway facility additions and enhancements, and highway operational improvements. The number of local-sponsored PIDs in the workload fluctuates due to continued scope refinement, changing priorities, and funding constraints at the local and regional levels. Many of these projects involve long lead time for planning and require local agencies to reimburse Caltrans for PID development or oversight work.

Table 6 details the delivery of the reprioritized non-SHOPP PID workload in FY 2015–16. Based on the reprioritized workload, Caltrans worked on a total of 126 PIDs in FY 2015–16, completing 25 PIDs and beginning development of 101 PIDs that will carry over into FY 2016–17.

During FY 2015–16, 25 local-sponsored and State-sponsored PIDs were completed. Prior to PID development, the preliminarily estimated cost for the 25 projects was \$2.30 billion. After PIDs were completed, the estimated project costs totaled \$3.21 billion. These differences in estimated costs support the value of the PIDs, as they result in more effective and efficient alignment of project estimates and available capital project resources. The consequences of moving forward with these planned projects without a PID or reliable scope, schedule, and cost estimate would result in additional project risks, potential scope changes, schedule delays, and project cost overruns. Table 7 provides a summary of project costs for completed State-sponsored and local-sponsored PIDs.

Table 6–Summary of State-sponsored and Local-sponsored PIDs (FY 2015–16)

Type of Projects	Number of PIDs in Re- Prioritized FY 2015–16 Workload ³	Number of PIDs Completed in FY 2015–16	Number of Active PIDs that will Carry Over into FY 2016–17	Number of Planned PIDs for FY 2016-17 ⁴
State- sponsored ¹	30	8	22	37
Local- sponsored ²	96	17	79	107
Total	126	25	101	144

- 1) Funded by SHA.
- 2) Funded by Reimbursement Authority.
- 3) Total comprises PIDs completed in FY 2015–16 and active PIDs that will carry over into FY 2016–17.
- 4) Based on the FY 2015-16 BCP.

Table 7-Summary of Non-SHOPP PIDs Completed in FY 2015-16

Type of Projects	Number of Completed PIDs	Estimated Capital Project Cost Before PID (\$ mil)	Estimated Capital Project Cost After PID (\$mil)
State- sponsored	8	\$925	\$934
Local- sponsored	17	\$1,380	\$2,281
Total	25	\$2,305	\$3,215

Of the 17 local-sponsored PIDs completed in FY 2015–16, 8 PIDs were completed with Caltrans having a lead role in PID development and 17 PIDs were completed with Caltrans performing independent quality assurance (IQA) through the PID development process.

Table 8 provides a summary of planned cost averages compared to actual average cost by PID type. In FY 2015–16, Caltrans planned to use the average equivalent of 1.07 PYs to prepare the non-SHOPP PIDs, but actually expended an average of 1.31 PYs to complete this work.

The average planned costs and positions in Table 8 are based on average statewide projections within each PID category listed. The average actual costs are based upon the average actual Reimbursement position cost. The average actual work efforts are based upon actual hours charged by staff. The costs are a reflection of the completed PID project portfolio, actual staff assigned to each PID, and the type of PID selected for each project. Because every project and staffing situation is unique, the PID Program cannot assign standardized or absolute workload norms to each PID. Therefore, the PID Program relies on work effort ranges and engineering judgment based on project complexity and risks to determine resource needs for each PID type.

Table 8-Completed Local-sponsored PIDs by Role and PID Type (FY 2015-16)

Caltrans Role	PID Type ¹	Number of Total Projects Completed	Average Planned Cost to Complete the PID (\$)	Average Actual Cost to Complete the PID (\$)	Average Planned Work Effort to Complete the PID (PY)	Average Actual Work Effort to Complete the PID (PY)

Conclusion

The PID Program Report for FY 2015–16 represents the third full year of data. As displayed in Table 2, Caltrans has delivered 1,091 SHOPP and Non-SHOPP PIDs using an overall average of 0.59 PY per PID while illustrating a trend of cost savings and gains in efficiency over the three-year reporting period. The delivery of these PIDs moves projects into the next phases of the project delivery process, contributing to the achievement of California's transportation needs.

Over the three-year period of FY 2013–14 through 2015–16, Caltrans cumulatively completed a total of 985 SHOPP PIDs using an average work effort of 0.57 PY per SHOPP PID. On average, Caltrans has delivered SHOPP PIDs across all major project types using less resources than the original planned estimates. Table 9 provides a breakout by PID type of all SHOPP PIDs completed during the three-year reporting period.

Development of a \$500 million SHOPP contingency PID workload began in FY 2015–16 and is anticipated to be fully completed June 2017. Once completed, it is anticipated that a reduced number of positions will be necessary to maintain the rolling queue of SHOPP contingency PIDs in the future.

Table 9-Completed SHOPP PIDs by PID Type (FY 2013-14 through 2015-16)

PID Type ¹	Number of Total Projects Completed	Average Planned Cost to Complete the PID (\$)	Average Actual Cost to Complete the PID (\$)	Average Planned Work Effort to Complete the PID (PY)	Average Actual Work Effort to Complete the PID (PY)	Work Effort Ranges (PY)
CAPM-PR	104	\$105,555	\$108,119	0.69	0.94	0.1 to 1.5
PIR	117	\$111,225	\$112,866	0.74	0.74	0.1 to 1.1
PSR	193	\$102,238	\$106,369	0.70	0.70	0.4 to 1.2
PSR-PDS	5	\$121,793	\$127,795	0.82	0.89	0.2 to 1.3
PSR-PR	40	\$108,347	\$134,899	0.70	0.83	0.5 to 1.3
PSSR	181	\$128,387	\$129,985	0.89	0.80	0.3 to 1.3
SCVP	345	\$53,387	\$48,066	0.37	0.30	0.1 to 0.5
All PID Types ²	985	\$90,731	\$90,014	0.63	0.57	

- 1) Reference Table 11 for additional information on PID types.
- 2) Average of all completed SHOPP PIDs in the attached workload.

During the three-year period, Caltrans continued streamlining efforts and realized cost savings in the PID Program by expanding use of the SCVP PID template and by implementing a pilot program to explore use of the new PIR SHOPP PID template. During this period, 345 SCVP PIDs have been completed using an average of 0.30 PY. While the PID Program has realized savings by expanding use of the SCVP PID template to projects with higher risk and complexity, these projects are experiencing negative impacts to scope, cost, and schedule in later phases of project development.

Caltrans completed 117 PIRs as part of a pilot program using an average of 0.74 PY per PID. While the average number of positions used over the duration of the PIR pilot program exceeds the average number of positions required to complete other PID types, it is anticipated that this cost will decrease over time as staff preparing the PIRs become more familiar with the nuances of the template's structure.

As Caltrans transitions towards Asset Management and a focus on multi-objective projects, it is anticipated that the number of projects in future PID workloads may decrease as projects are combined to realize efficiencies in later phases of project development, offsetting any increase in resource requirements. The flexibility of the PIR template's structure and the involvement of a cross-functional Project Development Team make it the ideal tool to provide the comprehensive analysis needed for these new types of multi-objective projects. As such, the number of SCVP SHOPP PIDs in future workloads are expected to decrease and the number of PIRs are expected to increase in an effort to appropriately scope complex multi-objective projects in a way that limits project change requests in later phases of project development.

Throughout the duration of the three-year reporting period, Caltrans cumulatively completed a total of 106 State-sponsored and local-sponsored PIDs funded through the STIP and other non-SHOPP funding sources. The PIDs were completed using an average work effort of 0.82 PY per PID. During this period, Caltrans has continued implementation of the streamlined PSR-PDS template, which was completed using an average of 0.67 PY per PID. Moving forward, the PID Program will continue to evaluate the effectiveness of the streamlined Project Study Report/Project Development Support template and will make adjustments as appropriate to maximize efficiencies.

The PID Program's projected non-SHOPP workload has shown a trend of either not fully materializing or decreasing over time. Table 10 provides a breakout of State-sponsored and local sponsored PID workload over the three fiscal years. While the PID program has successfully delivered 31 PIDs for State-sponsored projects, the number of PIDs delivered each year has declined with the lack of availability of STIP funding. Additionally, the PID Program has delivered an average of 24 PIDs for locally-sponsored projects in a reimbursed basis. Reimbursement workload is identified by local agencies 18 months prior to PID development in order to request resources through the BCP process. The number of reimbursed PIDs delivered is consistently below the number requested by the local agencies at the time of submittal of the PID Program's BCP due to changing priorities. As such, a reduced number of SHA and Reimbursement positions will be necessary to deliver the PID Program's non-SHOPP workload in the future.

Table 10-State-sponsored and Local-sponsored PIDs by FY

Туре	Fiscal Year	Number of PIDs in Workload	Number of PIDs Completed
State-sponsored	FY 2013–14	27	13
	FY 2014–15	26	10
	FY 2015–16	30	8
	FY 2013-14	82	25
Local-sponsored	FY 2014–15	84	31
	FY 2015–16	96	17

Moving forward with the BCP for FY 2017-18 and FY 2018-19, the PID Program will request an overall staffing reduction of 30 positions and \$4.16 million to align with the future workload and historic vacancy levels. Additionally, the PID Program will continue to investigate new approaches and process improvements to enhance cost efficiencies and balance intelligent risk with sound engineering judgment as they comply with new mandates that will help to shape the future of transportation in California.

Table 11-Summary of PID Types

		Table 11–Summary of		Proje S	es of cts on HS
Type of PIDs		Applicability	Streamlining Benefits	State/ Local	SHOPP
Small Capital Value Project	SCVP	Used for low risk and less complex single alternative projects below \$3 million.	Streamlines PID phase by reducing PID cost and schedule.		X
Project Study Report-Project Development Support	PSR-PDS	Default document for all STIP and local-funded projects. PID includes assessments of major assumptions, risks, and "ballpark" project cost estimates. Detailed studies are done in environmental phase.	Streamlines PID phase by reducing PID cost and schedule.	x	
Project Scope Summary Report	PSSR	Used for candidate projects that have enough information to approve a project alternative.	Combines PID and Project Approval/Environmental Document (PA/ED) phases thus streamlines project delivery.		x
Project Study Report	PSR	Used for higher risk and complex projects. PID includes detail analyses and identifies detailed cost estimates for all project phases.	None at the PID phase. At the PA/ED phase there is potential savings due to fatal flaws being addressed at the PID level.	x	x
Capital Preventive Maintenance Project Report	CAPM- PR	Used for pavement rehabilitation and preservation projects.	Typically combines PID and PA/ED phases, thus streamlines project delivery.		X
Project Study Report-Project Report	PSR-PR	Typically used for candidate projects that have key stakeholder consensus and a clear understanding of the requirements to complete the project.	Combines PID and PA/ED phases thus streamlines project delivery.	x	x
Project Initiation Report	PIR	Utilizes a three-tier structure, with each respective tier containing a progressively higher level of analysis.	Flexible format is intended to consolidate and standardize multiple SHOPP PID formats.		x
